Disclosure in Health and Illness Mark Davis, Lenore Manderson, 2014-04-24 Disclosure is a frequently used but rarely interrogated concept in health and social welfare Abuse disability sexuality and health status can be disclosed to peers and professionals and on some occasions disclosure is a requirement and not a choice This innovative collection examines the new social and political implications of disclosure practices in health and illness We make our identities and our connections with others by sharing life stories experiences and innermost desires and are often asked to disclose facts about our lives bodies and minds at times with unintended consequences Yet how and what why and when people disclose and perceive question and expose and in what ways has rarely received critical analytic attention The contributors take up these problems by foregrounding the many shades of disclosure from the secret through the telling of diagnosis to the more prosaic sharing of narratives from everyday life The processes and implications of disclosing are addressed in areas such as illness trajectories and end of life decisions ethical research practices medical procedures and interpersonal relationships Exploring the idea of disclosure as a moral imperative and a social act this book offers a diverse range of empirical case studies social theories and methodological insights to show how dominant and normative understandings of social relationships and their obligations shape our understanding of acts of disclosure enquiry and exposure It will be of interest to students and academics with an interest in narrative studies medical anthropology bioethics health psychology health studies and the sociology of health and illness *Prep for College Adm Exam Eol 2000 G 12* Holt Rinehart & Winston, 1999-05-12
