Maki, 2023-07-03 This book challenges institutions and their programs to prioritize the use of chronological assessment results to benefit enrolled students in comparison with the more common practice of prolonged assessment

cycles that generally benefit future students Peggy Maki advocates for real time assessment processes to identify patterns of underperformance and obstacles that require timely interventions for enrolled students to succeed In tandem with the sets of educational practices and policies that many institutions have now undertaken to close achievement and graduation rates across our diverse student demographics such as developing clear degree pathways she calls on all higher education providers if they are to remain relevant and meet their social purpose in our complex world to urgently recalibrate their assessment processes to focus on currently enrolled students progress towards achieving a high quality degree regardless of when they matriculate or re enter higher education She demonstrates that we already have sufficient examples and evidence to implement real time assessment of students as they progress through their studies She draws on the practices of specialized accredited programs such as those in the professions that assess in real time on the experiences of institutions that have adopted competency based education and on the affordances of technologies that now provide faculty and students with up to the minute diagnostics. She identifies the six principles necessary to implement a real time assessment process illustrated by case studies of how campuses have operationalized them to advance students equitable progress towards achieving a high quality degree and demonstrates the benefits of real time assessment compared to more future oriented processes among which is engaging students in reflecting on their own progress along their degree pathways She advocates for the use of well documented national outcomes based frameworks such as Liberal Education and America's Promise LEAP its aligned Valid Assessment of Learning in Undergraduate Education scoring rubrics VALUE the Degree Qualifications Profile and discipline based outcomes assessments to ensure high quality degrees that meet well defined standards and criteria She also identifies how data systems and technological developments help to monitor closely and respond in time to students patterns of underperformance The book is an urgent call for higher education to achieve the values of equity transparency and quality it espouses and ensure that all students graduate in a timely fashion with the competencies they need to be active and productive citizens <u>Decision Making for Student Success</u> Benjamin L. Castleman, Saul Schwartz, Sandy Baum, 2015-03-12 Each year many students with affordable college options and the academic skills needed to succeed do not enroll at all enroll at institutions where they are not well positioned for success or drop out of college before earning a credential Efforts to address these challenges have included changes in financial aid policy increased availability of information and enhanced academic support This volume argues that the efficacy of these strategies can be improved by taking account of contemporary research on how students make choices In Decision Making for Student Success scholars from the fields of behavioral economics education and public policy explore contemporary research on decision making and highlight behavioral insights that can improve postsecondary access and success This exciting volume will provide scholars researchers and higher education administrators with valuable perspectives and low cost strategies that they can employ to improve outcomes for underserved populations Effective Educational Programs, Practices, and

Policies for English Learners Liliana Minaya-Rowe,2014-10-01 The central issue of this volume is how to meet the linguistic and academic needs of the increasing numbers of English learners ELs At the center of educational turns is the role of school professionals in this Common Core Standards era Teacher education programs and professional development or pre service and in service programs for teachers of ELs are currently being reframed to reflect the new demands placed on all teachers in light of the new standards The expectation is that ELs can learn and their teachers possess the expertise to teach both discipline content and academic English at the same time The large numbers of ELs across the country have created a wide gap between what teachers have been trained to do and the skills they need to teach and reach them effectively This practical handbook brings together research policy and practice on teacher effectiveness pre service and in service programs in the context of student linguistic and cultural diversity Key features include Clearly articulated teacher training and professional development programs Coverage of Common Core curriculum and a variety of instructional programs and practices with research based tools to implement them and Policies to equitably and effectively prepare ELs academically and linguistically
