Preparing For Armageddon A Critique Of Western Strategy:

Preparing for Armageddon Philip K. Lawrence, 1988 *Preparing for Armageddon* Philip K. Lawrence, 1988 This book looks into the issues surrounding nuclear proliferation and strategy *Strategic Studies and World Order* Bradley S. Klein, 1994-05-05 In this 1994 book Bradley Klein draws upon debates in international relations theory to raise important questions about the nature of strategic studies He argues that post modern critiques of realism and neorealism open up opportunities for new ways of thinking about nuclear deterrence In clear and uncluttered language he explores the links between modernity state building and strategic violence and argues that American foreign policy and NATO undertook a set of dynamic political practices intended to make and remake world order in the image of Western identity Klein warns against too facile a celebration of the end of the Cold War concluding that it is even more imperative today to appreciate the scope and power of the Western strategic project The book will be of interest to students of international relations theory strategic studies peace studies and US foreign policy **Strategy in the Contemporary World** John Baylis, James J. Wirtz, Colin S. Gray, 2013 The fourth edition of this successful textbook has been revised and updated in light of recent events and includes a new chapter on the rise of cyberpower Its comprehensive coverage of issues of war and peace such as terrorism intelligence and weapons of mass destruction makes it the major strategic studies textbook in the field **The State, Society, and Limited Nuclear War** Eric Mlyn, 1995-02-01 Drawing on theories of the state archives and interviews with top defense policymakers this book tells an important story of interest to any reader concerned with how security policy is fashioned in the United States [Possibility of a Nuclear War in Asia](#) G. G. Pamidi, 2012-01-01 This book attempts to fuse two topical subjects and deal with them in a holistic manner It is oft said and is also widely believed that the 21st century belongs to Asia and that the two giants of Asia namely China and India are going to dominate the world in the ensuing decades It is also implicitly accepted that nuclear weapons are going to be there at least for the foreseeable future These are the two topics that have been analysed in this book nuclear weapons and the emerging epicenter of global affairs namely Asia The book deals with the fundamental nature of nuclear weapons itself It purposely steers away from the Cold War mindset of viewing nuclear weapons in a western manner and attempts to unravel the manner in which the nations of Asia view these weapons in their own unique way It is also about the nature of disputes in Asia and the security environment in Asia both presently as well as in the foreseeable future Since it is a fact that there are unresolved disputes in the region the book also deals with the aspect of analysis of potential conflict scenarios Will the countries succeed in settling their disputes diplomatically Can deterrence succeed What will happen if that fails What will be the shape of future conflicts This book makes a modest attempt to provide answers to some of these perplexing questions that plague policy makers and strategists in Asia today Since the study is from an Indian perspective the focus is naturally biased more towards South Asia vis a vis the other parts of Asia Though the book attempts to answer all questions some tough questions typically deny neat solutions As

the author admits the aim of the book is to get both the policy and decision makers as well as the professional military to think about these issues so that in time workable solutions can be evolved Toward Other Worlds Michael R. Collings, 2010-05-01 This collection of 25 essays of literary criticism includes pieces on British poet John Milton British fantasy writer C S Lewis American horror writer Stephen King American SF and fantasy writer Orson Scott Card British horror writer Clive Barker and several others Complete with bibliography and index NATO and Eastern Europe After 2000 Laure Paquette, 2001 NATO is acutely aware of its increased status as a force for stability in a drastically altered Atlantic community The number of its initiatives is on the increase just as a new political economic and military Europe emerges The Cold War s end has wrought as many changes as there are continuities in the security environment Eastern and Central European states especially NATO and PfP members enjoy an increasing importance to NATO both as trading partners and as new participants in the civil society While the literature on relations between NATO and the East Europeans is rather limited the study of the overall posture of those states in the international system is almost non-existent so that the consequences of their posture for NATO s renewed concept are unknown The study of these countries security posture and strategic interactions with Central European states in general promotes the renewed role of NATO This book shows that each of the long term relations with Poland the Czech Republic Romania and Bulgaria is subordinated to the goal of entering the European Union and that their different values will make relations difficult This will test NATO s new strategic concept to the limit It also shows the importance of strategic thinking **Keyguide to Information Sources in Strategic Studies** Ken Booth, Eric Herring, 1994 A reference for researchers studying the military dimension of international relations Introduces strategic studies its history and scope organizations channels of communication literature and changes provides an annotated bibliography of material relating to the Cold War period and after and lists selected organizations in 59 countries that are continuing sources or nodes of information Annotation copyright by Book News Inc Portland OR **The Genocidal Mentality** Robert J. Higgott, James L. Richardson, 1991 Multiple Modernities, Civil Society and Islam Masoud Kamali, 2006 Both Turkey and Iran consider themselves modern Islamic states

though with radically different status in today's social and political world In *Multiple Modernities* Civil Society and Islam Masoud Kamali explores the historical factors that have shaped such dissimilar Muslim states including the continued influence of Europe and the United States Kamali's assertion that the Muslim world is far more multifaceted and pluralistic than generally portrayed is a message particularly relevant today *Multiple Modernities* is critical reading for those interested in the history both ancient and modern of Islamic movements around the world *Limited War, Limited Autonomy* Eric Jay Mlyn,1991 *European Security Beyond the Cold War* Adrian G. V. Hyde-Price,1991-08-28 Current world events are shattering many accepted views of national security New views of collective security incorporating reform integration and unification are replacing nationalistic policies of security How will European security be shaped in light of these changes Adrian Hyde Price takes up this issue one of the most vital contemporary questions in world politics in this intriguing volume In his consideration of the forces and processes at work in the fundamental transformations that have been reshaping Europe over recent years the author focuses on the unification of Germany Mikhail Gorbachev's reform program the accelerating pace of West European integration through the European Community and the uncertainties surrounding America's future role in a Europe beyond containment This major work outlines four types of possible alternative security structures for the year 2010 and suggests a number of principles which should govern the construction of a new security system for a Europe beyond the cold war A collection of up to date information and detailed analysis this farsighted and pioneering volume is valuable reading for scholars and practitioners in political science international relations and European studies this book represents serious thinking and should be able to assist most readers in getting if not a hold then a finger on the unfolding situation it is a solid work nowhere else is all that information collected and presented systematically a solid historical presentation of especially the second half of the 1980s *International Affairs* The most impressive characteristic of the book is the way in which it manages to cover an immense amount of empirical and theoretical ground in a fashion which is very easy to read The style is straight forward without being mechanical it reduces to a manageable level the great complexity of European security today in a manner which strongly re *Limited War, Limited Autonomy* Eric Mlyn,1991
