trained expert and mom of two who can empower us to make better less fraught decisions and stay sane in the years before preschool

Resources in Education, 1998 Everyday Goodbyes Nancy Balaban, 2006 Separation often evokes feelings of fear and anxiety in all of us children parents and teachers alike Because the success or failure of early separation experiences can affect a child's movement toward independence teachers and parents must know how to help young children cope with the unpleasant feelings sometimes associated with separation In Everyday Goodbyes her follow up to Starting School From Separation to Independence Nancy Balaban once again addresses this critical aspect of child development Emphasizing the need for parents and teachers to work together in phasing children into a child care preschool or kindergarten program she offers many sensitive practical suggestions to ease the separation process for all involved Positioning separation as the underlying curriculum for all early childhood programs this wonderful book helps teachers and parents to understand why children take time to adjust Photographs and real life anecdotes of children teachers and parents illustrate all aspects of the adjustment process and activities for the classroom that support children's movement toward independence and self confidence are included

84887 5 574 pp *Handbook of Child Psychopathology* Michel Hersen, 2013-11-11 Although the field of child psychopathology is of relatively recent origin it is a healthy burgeoning one Within the past 10 to 20 years numerous articles and books have been published and the field can now be described as emerging with an identity of its own No longer can child psychopathology be viewed simply as a downward extension of adult psychopathology Rather children must be viewed as children not as miniature adults Such a situation requires that issues of child psychology and developmental psychology be intimately considered when delineating the problems of children Such a focus has guided our efforts in soliciting contributors and topics for this volume All contributors are active researchers and clinicians in the area of child psychopathology and all are acutely aware of the special considerations of child and developmental psychology as they relate to child behavior problems Further all contributors are empirically minded consequently the various chapters are data based and represent the most up to date knowledge available However since research based knowledge is more abundant in some topic areas than in others the chapters vary in length and scope

International Mother Language Day: Enhancing Home Language Development from a Young Age Natalia Meir, He Sun, Vicky Chondrogianni, 2023-10-05 **Technology and Students with Special Educational Needs** Adina Shamir, Malka Margalit, 2016-04-08 Heterogeneous classes including students with Special Educational Needs SEN are increasingly becoming fixtures of the twenty first century school As a result the question of how to devise more effective innovative and diverse tools has posed a significant challenge for educators and the research community This collection considers how technology may provide SEN children with greater opportunities to acquire academic skills while preparing them for a successful transition to adulthood Computers and other new technologies hold great promise for facilitating the inclusion of SEN individuals into modern society Precisely because they are characterized by multiple representations of knowledge computerized learning environments offer effective support tools for the instruction of SEN students faced with barriers that make learning a more complex process Yet despite the blossoming of this field research on how the use of

technology may benefit SEN students is in its early stages The development of the theoretical knowledge and empirical databases necessary to assess the impact of computers on learners characteristics and educators teaching goals lag behind the introduction of the respective technological innovations To meet this challenge this volume presents a review of the latest advances in how new technologies and their software may potentially enhance SEN students performance in school and out This book was originally published as a special issue of the European Journal of Special Needs Handbook of Child Psychopathology Thomas H. Ollendick, 2013-11-11 In our first edition of the Handbook in 1983 we noted that child psychopathology should no longer be viewed simply as a downward extension of adult psychopathology Rather we suggested that children must be viewed as children not as miniature adults and that a merger of clinical child psychology and developmental psychology must occur in order for this objective to be realized Now 6 years later we are sufficiently encouraged to assert that this synthesis at least on a conceptual level is well under way Yet much growth remains to be seen along practical lines The real test of the synthesis of these two fields of study will be evidenced on the battlefield that is the front line of clinical practice Just how integrated clinical child psychology and developmental psychology really are remains to be seen Nonetheless progress is well under way Careful attention to developmental and other contextual issues guided us in our efforts to solicit contributors for this second edition All the contributors are active researchers and clinicians in the area of child psychopathology and all are keenly aware of the subtle nuances and special considerations of clinical and developmental psychology as they relate to child behavior problems In addition all the contributors are empirically minded as a result the chapters are data based and represent some of the most up to date knowledge currently available However as research based knowledge is more abundant and conclusive in some topic areas than in others the chapters vary in length and scope Handbook of Positive Psychology in Schools Michael J. Furlong, Richard Gilman, E. Scott Huebner, 2009-03-04 National surveys consistently reveal that an inordinate number of students report high levels of boredom anger and stress in school which often leads to their disengagement from critical learning and social development If the ultimate goal of schools is to educate young people to become responsible and critically thinking citizens who can succeed in life understanding factors that stimulate them to become active agents in their own learning is critical A new field labeled positive psychology is one lens that can be used to investigate factors that facilitate a student's sense of agency and active school engagement The purposes of this groundbreaking Handbook are to 1 describe ways that positive emotions traits and institutions promote school achievement and healthy social emotional development 2 describe how specific positive psychological constructs relate to students and schools and support the delivery of school based services and 3 describe the application of positive psychology to educational policy making By doing so the book provides a long needed centerpiece around which the field can continue to grow in an organized and interdisciplinary manner Key features include Comprehensive this book is the first to provide a comprehensive review of what is known about positive psychological constructs and the school experiences of

children and youth Topical coverage ranges from conceptual foundations to assessment and intervention issues to service delivery models Intrapersonal factors e g hope life satisfaction and interpersonal factors e g positive peer and family relationships are examined as is classroom and school level influences e g student teacher and school community relations Interdisciplinary Focus this volume brings together the divergent perspectives methods and findings of a broad interdisciplinary community of scholars whose work often fails to reach those working in contiguous fields Chapter Structure to insure continuity flow and readability chapters are organized as follows overview research summary relationship to student development examples of real world applications and a summarizing table showing implications for future research and practice Methodologies chapters feature longitudinal studies person centered approaches experimental and quasi experimental designs and mixed methods

Research in Young Children's Literacy and Language Development Olivia N. Saracho, 2019-12-13 The importance of the early years in young children's lives and the rigid inequality in literacy achievement are a stimulating backdrop to current research in young children's language and literacy development This book reports new data and empirical analyses that advance the theory of language and literacy with researchers using different methodologies in conducting their study with both a sound empirical underpinning and a captivating analytical rationalization of the results The contributors to this volume used several methodological methods e g quantitative qualitative to describe the complete concept of the study the achievement of the study and the study in an appropriate manner based on the study's methodology The contributions to this volume cover a wide range of topics including dual language learners Latino immigrant children children who have hearing disabilities parents and teachers beliefs about language development early literacy skills of toddlers and preschool children interventions multimodalities in early literacies writing and family literacy The studies were conducted in various early childhood settings such as child care nursery school Head Start kindergarten and primary grades and the subjects in the studies represent the pluralism of the globe a pluralism of language backgrounds ethnicity abilities and disabilities This book was originally published as a special issue of Early Child Development and Care

Research in Education ,1970 **Canadian Books in Print** ,2003 *Social Issues in America* James Ciment, 2015-03-04 More than 150 key social issues confronting the United States today are covered in this eight volume set from abortion and adoption to capital punishment and corporate crime from obesity and organized crime to sweatshops and xenophobia
