Kenneth S. Goodman,Robert C. Calfee,Yetta M. Goodman,2013-10-01 Accountability in the form of standardized test scores is built into many government literacy policies with severe consequences for schools and districts that fail to meet ever increasing

performance levels The key question this book addresses is whose knowledge is considered in framing government literacy policies The intent is to raise awareness of the degree to which expertise is being ignored on a worldwide level and pseudo science is becoming the basis for literacy policies and laws The authors all leading researchers from the U S U K Scotland France and Germany have a wide range of views but share in common a deep concern about the lack of respect for knowledge among policy makers Each author comes to the common subject of this volume from the vantage point of his or her major interests ranging from an exposition of what should be the best knowledge utilized in an aspect of literacy education policy to how political decisions are impacting literacy policy to laying out the history of events in their own country Collectively they offer a critical analysis of the condition of literacy education past and present and suggest alternative courses of action for the future

Teacher Education and the Political Matthew Clarke,Anne Phelan,2017-01-12 Teacher Education and the Political is a striking book which addresses the nature and purpose of teacher education in a global context characterised by economic and political anxieties around declining productivity and social inclusion These anxieties are manifested in recent policy developments such as the promotion of professional standards the deregulation and marketisation of teacher education and the imposition of performance related regimes that tie teachers pay to outcomes in high stakes testing The book assesses the implications of such policies for the work of teachers as well as for teacher educators and those undertaking initial teacher training It is argued that these policy moves can be read as a depoliticising and de intellectualising of teacher education In this context they illustrate how contemporary theory can provide a language for critiquing recent developments and imagining new trajectories for policy and practice in teacher education Drawing on the work of theorists from Derrida and Mouffe to Agamben and Lacan this book argues for the need to maintain a space for intellectual autonomy as a critical dimension of the ethico political work of teachers Together these ideas and analyses provide examples of the power of negative thinking illustrating its capacity to unsettle comfortable truths and foreground the political nature of teacher education Current teachers teacher educators and school leaders will be particularly interested readers alongside those concerned with policy in the wider educational landscape
