Present At The Creation The Fortieth Anniversary Of The Marshall Plan:

Present at the Creation Armand Clesse, Archie C. Epps, 1990 **The Marshall Plan Today** John Agnew, J. Nicholas Entrikin, 2004-06-24 This volume has as its focus the role of the Marshall Plan as both a force in the transformation of European Economic practices and a stimulus to political integration in Europe This organizing theme is framed in terms of two other issues that are central to contemporary debates in international political economy and geopolitical studies the origins and development of the Cold War and the growing globalisation of the world economy In relating the Marshall Plan to these issues this book goes beyond the typical diplomatic history approach to place the Plan in the context of both the political economy of late twentieth century Europe and the impact of American models of business and government that came with the Plan *The Laws That Shaped America* Dennis W. Johnson, 2009-05-31 For better and sometimes for worse Congress is a reflection of the aspirations wants and priorities of the American people It reflects the kaleidoscope of special interests and unselfish service to others of favors sought and sacrifices made During each two year session of Congress thousands of pieces of legislation are proposed many hundreds are given serious consideration but far fewer are eventually enacted into law Most enactments have limited impact affect few and are quietly forgotten in the flow of legislative activity However a small number of laws have risen to the level of historical consequence These are the laws that have shaped America and they are the subject of this book Which pieces of legislation were the most significant for the development of the nation Which have had an immediate or lasting impact on our society Which laws so affected us that we could not imagine how our lives would be without them Dennis W Johnson vividly portrays the story of fifteen major laws enacted over the course of two centuries of American democracy For each law he examines the forces and circumstances that led to its enactment the power struggles between rival interests the competition between lawmakers and the administration the compromises and principled stands and the impact of the legislation and its place in American history **Thomas Schelling and the Nuclear Age** Robert Ayson, 2020-09-23 An illuminating insight into the work of Thomas Schelling one of the most influential strategic thinkers of the nuclear age By the time of the Cuban Missile Crisis and the United States early forays into Vietnam he had become one of the most distinctive voices in Western strategy This book shows how Schelling's thinking is much more than a reaction to the tensions of the Cold War In a demonstration that ideas can be just as significant as superpower politics Robert Ayson traces the way this Harvard University professor built a unique intellectual framework using a mix of social scientific reasoning from economics to social theory and psychology As such this volume offers a rare glimpse into the intellectual history which underpins classical thinking on nuclear strategy and arms control thinking which still has an enormous influence in the early twenty first century **North Atlantic Treaty Organization** Phil Williams, 2024-11-01 This volume consists of major books written in the English language on NATO as well as an extensive listing of journal articles that deal with various aspects of the Alliance All the major debates that have taken place over the

last forty years are discussed

Present at the Creation Armand Clesse, Archie C. Epps, 1990 **Remaking France** Brian Angus McKenzie, 2005 Offers a historical case study by examining the Marshall Plan as the form of public diplomacy of the United States in France after World War Two

Michigan Law Review, 2001 **Current Bibliographical Information** Dag Hammarskjöld Library, 1990 **The**

Martindale-Hubbell Law Directory ,2004 *American Foreign Policy, Current Documents* ,1987 *Science, the State, and International Society* Martha Finnemore,1991 *Common Progress* James A. Yunker,2000-02-28 Yunker sets forth the case for initiation of a massive foreign development assistance effort termed the World Economic Equalization Program WEEP The scale of the program would dwarf that of all historical foreign aid programs yet the proposed contributions by the donor nations would not be unmanageable The richest nations would contribute amounts ranging from three to seven percent of their Gross National Products Computer simulations of a model of the proposed program over a 50 year period show the possibility of a tremendous rise in the living standards of the poor nations while at the same time the living standards of the rich nations continue to rise at rates closely comparable to those of the recent past Sensitivity analysis demonstrates that the optimistic conclusions forthcoming from the baseline policy simulation remain robust against wide variations in the numerical parameter values However since it is obvious that real world results might not resemble results derived from computer simulation of a theoretical model the recommendation put forward is that a World Economic Equalization Program be initiated on a tentative and provisional basis with the explicit intention of terminating it if after a reasonable period of time real world results are insufficiently promising A provocative analysis and proposal aimed primarily at economists and policy makers involved with economic development international economics and global economic policy **In Search of a Usable Past** Barry Machado,2007 In recent years the Marshall Plan has been invoked on numerous occasions as a solution for problems domestic and foreign This study aims to establish the relevance for contemporary postwar reconstruction projects of an experimental foreign policy conceived and executed back in the late 1940s and early 1950s The monograph clarifies why and how the Marshall Plan was adopted what its essential features were and why it succeeded in western Europe concluding that it had important and mutually reinforcing aspects political psychological and economics Page vii
