Modern Jewish Philosophy and the Politics of Divine Violence Daniel H. Weiss,2023-04-06 Is commitment to God compatible with modern citizenship In this book Daniel H Weiss provides new readings of four modern Jewish philosophers Moses Mendelssohn Hermann Cohen Franz Rosenzweig and Walter Benjamin in light of classical rabbinic accounts of God s sovereignty divine and human violence and the embodied human being as the image of God He demonstrates how classical rabbinic literature is relevant to contemporary political and philosophical debates Weiss brings to light striking political aspects of the writings of the modern Jewish philosophers who have often been understood as non political In addition he shows how the four modern thinkers are more radical and more shaped by Jewish tradition than has previously been thought Taken as a whole Weiss book argues for a fundamental rethinking of the relationship between Judaism and politics the history of Jewish thought and the ethical and political dynamics of the broader Western philosophical tradition

Walter Benjamin and the Idea of Natural History Eli Friedlander,2024-01-16 In this incisive new work Eli Friedlander demonstrates that Walter Benjamin s entire corpus from early to late comprises a rigorous and sustained philosophical questioning of how human beings belong to nature Across seemingly heterogeneous writings Friedlander argues Benjamin consistently explores what the natural in the human comes to that is how nature is transformed actualized redeemed and overcome in human existence The book progresses gradually from Benjamin s philosophically fundamental writings on language and nature to his Goethean empiricism from the presentation of ideas to the primal history of the Paris arcades Friedlander s careful analysis brings out how the idea of natural history inflects Benjamin s conception of the work of art and its critique his diagnosis of the mythical violence of the legal order his account of the body and of action of material culture and technology as well as his unique vision of historical materialism Featuring revelatory new readings of Benjamin s major works that differ sometimes dramatically from prevailing interpretations this book reveals the internal coherence and philosophical force of Benjamin s thought

The Ecology of Tropical East Asia Richard T. Corlett,2019-06-27 Tropical East Asia is home to over one billion people and faces massive human impacts from its rising population and rapid economic growth It has already lost more than half of its forest cover to agriculture and urbanization and has the highest rates of deforestation and logging in the tropics Habitat loss coupled with

hunting and the relentless trade in wildlife products threatens all its large and many of its smaller vertebrates. Despite these problems, the region still supports an estimated 15–25% of global terrestrial biodiversity, and a growing environmental awareness means that it is no longer assumed that economic development justifies environmental damage and no longer accepted that this trade-off is inevitable. Effective conservation action now depends on integrating a clear understanding of the ecological patterns and processes in the region with the varied needs of its human population. This third edition continues to provide an overview of the terrestrial ecology of Tropical East Asia from southern China to Indonesia and from Bhutan and Bangladesh to the Ryukyu Islands of Japan. It retains the balance between compactness and comprehensiveness of the previous editions and the even-handed geographical treatment of the whole region but it updates both the contents and the perspective. Approximately one-third of the text is new or greatly modified, reflecting the explosion of new research in the region in the last few years and the increasing use of new tools, particularly from genomics and remote sensing. The change in perspective largely reflects the growing realization that we are in a new epoch, the Anthropocene, in which human activities have at least as large an influence as natural processes and that stopping or reversing ecological change is no longer an option. This does not mean that biodiversity conservation is no longer possible or worthwhile, but that the biodiverse future we strive for will inevitably be very different from the past. *The Ecology of Tropical East Asia* is an advanced textbook suitable for senior undergraduate and graduate level students taking courses on the terrestrial ecology of the East Asian tropics as well as an authoritative regional reference for professional ecologists, conservationists, and interested amateurs worldwide.
