This study was developed to encourage nomination of historic park landscapes of national origins of a design ethic for natural parks a policy the work of the western field office 1927 to 1932 a process of park planning a decade of expansion 1933 to 1942 a new deal for state parks 1933 to 1942 Registering historic park landscapes in the National Register of Historic Places other listings in the National Register of Historic Places Bibliography Illustrated An Everglades Providence Jack E. Davis, 2009 Profiles the suffragist feminist and environmentalist who fought for the preservation and protection of the Everglades and won the battle that turned it into a national wilderness area *Nature's New Deal* Neil M. Maher, 2007-12-12 The Great Depression coincided with a wave of natural disasters including the Dust Bowl and devastating floods of the Ohio and Mississippi rivers Recovering from these calamities and preventing their reoccurrence was a major goal of the New Deal In *Nature's New Deal* Neil M. Maher examines the history of one of Franklin D. Roosevelt's boldest and most successful experiments the Civilian Conservation Corps describing it as a turning point both in national politics and in the emergence of modern environmentalism Indeed Roosevelt addressed both the economic and environmental crises by putting Americans to work at conserving natural resources through the Soil Conservation Service the Tennessee Valley Authority and the Civilian Conservation Corps or CCC The CCC created public landscapes natural terrain altered by federal work projects that helped environmentalism blossom after World War II Maher notes Millions of Americans devoted themselves to a new vision of conservation one that went beyond the old model of simply maximizing the efficient use of natural resources to include the promotion of human health through outdoor recreation wilderness preservation and ecological balance And yet as Maher explores the rise and development of the CCC he also shows how the critique of its campgrounds picnic areas hiking trails and motor roads frames the debate over environmentalism to this day From the colorful life at CCC camps to political discussions in the White House and the philosophical debates dating back to John Muir and Frederick Law Olmsted *Nature's New Deal* captures a key moment in the emergence of modern environmentalism

Presenting Nature Linda Flint McClelland, 1993 **Presenting Nature** Department of the Interior, 2015-06-29 Excerpt from *Presenting Nature The Historic Landscape Design of the National Park Service 1916 to 1942* Just over fifty years ago the Civilian Conservation Corps CCC ended and with it eclipsed a grand era of park building marked by naturalistic principles craftsmanship and native materials Rooted in the American park movement of the nineteenth century naturalistic park design flourished under the stewardship of the National Park Service in the early twentieth century Park designers landscape architects architects and engineers forged a rich legacy of roads and trails that blended with the natural scenery picturesque park villages campgrounds and picnic areas scenic overlooks and majestic views Many of these places have

fulfilled the National Park Service's dual mission to conserve the natural scenery and to provide for public use enjoyment and appreciation. They have continued to serve visitors for several generations. Park managers, public officials, and preservationists are now being called upon to recognize these places, appreciate their historic significance, and protect them as cultural resources. This study has been developed by the National Register of Historic Places Interagency Resources Division. National Park Service primarily to encourage nomination of historic park landscapes of national and state parks to the National Register of Historic Places. The idea for the study came from the growing interest in landscape preservation and the concern that while significant park buildings and structures were being recognized, the larger landscapes of which they were an integral part were being overlooked. The objective was to develop a national context for identifying, evaluating, and registering the vast number of historic park landscapes influenced by the design ethic developed and practiced by the National Park Service. The largest group of these are areas of national state and local parks developed by the CCC under the direction of landscape architects, architects, and engineers of the National Park Service in the 1930s. The initial funding for this study came from a grant from the Horace Albright, now Albright Wirth Employee Development Fund of the National Park Foundation, a non-profit organization devoted to supporting National Park Service employees and initiatives. The study is written from the perspective of landscape architecture, the profession having primary responsibility for the physical development of the parks from 1916 to 1942. Just after the turn of the century, prominent landscape architects proclaimed their stewardship of significant natural areas, set forth naturalistic theories for park development, and advocated the founding of the National Park Service. Chapter One describes the continuing relationship between the profession and the National Park Service, while Chapter Two traces the roots of a naturalistic ethic of park design from landscape gardener Andrew Jackson Downing and park builder Frederick Law Olmsted Sr. to twentieth-century practitioners such as Henry Hubbard and Frank Waugh. As called upon in a 1918 statement of policy, National Park Service officials looked to landscape engineers and landscape architects to locate and design facilities in ways that harmonized with the natural setting and ensured that natural features and scenery remained unimpaired. Chapter Three describes the contributions of the park service's first landscape engineers to the creation of a design ethic for national parks. Chapter Four tells the story of the founding and growth of the Landscape Division of the Western Field Office, which was modeled after a professional design office and guided the development of national parks through a process of master planning and advances in the naturalistic design of roads, trails, overlooks, bridges, and buildings. Chapter Five closely examines the planning process through which areas of each park were designated for v *Subject Guide to Books in Print*, 1991 Presenting Nature Gordon Press Publishers, 1997-06

Wilderness by Design Ethan Carr, 1999-01-01 Carr delves into the planning and motivations of the people who wanted to preserve America's scenic geography. He demonstrates that by drawing on historical antecedents, landscape architects and planners carefully crafted each addition to maintain maximum picturesque wonder. Tracing the history of landscape park

design from British gardens up through the city park designs of Frederick Law Olmsted Carr places national park landscape architecture within a larger historical context Presenting Nature Linda Flint McClelland,1993 *Presenting Nature* : Linda Flint McClelland,1993 Building the National Parks Linda Flint McClelland,1998 The Office of Strategic Services the forerunner of the Central Intelligence Agency was founded in 1942 by William Wild Bill Donovan under the direction of President Roosevelt who realized the need to improve intelligence during wartime A rigorous recruitment process enlisted agents from both the armed services and civilians to produce operational groups specializing in different foreign areas including Italy Norway Yugoslavia and China At its peak in 1944 the number of men and women working in the service totaled nearly 13 500 This intriguing story of the origins and development of the American espionage forces covers all of the different departments involved with a particular emphasis on the courageous teams operating in the field The volume is illustrated with many photographs including images from the film director John Ford who led the OSS Photographic Unit and parachuted into Burma in 1943 *Vineyard* ,2005 Mission 66 Ethan Carr,2022-02 After World War II Americans visited the national parks in unprecedented numbers yet funding remained at prewar levels and park conditions steadily declined In 1956 a ten year billion dollar initiative titled Mission 66 was launched to reimagine the National Park Service Environmental and park historians architectural and landscape historians and all who care about our national parks will enjoy Ethan Carr s copiously illustrated history of a critical period in the development of the national park system **Pioneers of American Landscape Design** Robin S.
