Presenting The Turkey The Fabulous Story Of A Flamboyant And Flavourful Bird:

Presenting the Turkey Sabine Eiche, 2004 **The Turkey** Andrew F. Smith, 2010-10-01 Talking turkey about the bird you thought you knew Fondly remembered as the centerpiece of family Thanksgiving reunions the turkey is a cultural symbol as well as a multi billion dollar industry As a bird dinner commodity and as a national icon the turkey has become as American as the bald eagle with which it actually competed for supremacy on national insignias Food historian Andrew F Smith s sweeping and multifaceted history of Meleagris gallopavo separates fact from fiction serving as both a solid historical reference and a fascinating general read With his characteristic wit and insatiable curiosity Smith presents the turkey in ten courses beginning with the bird itself actually several different species of turkey flying through the wild The Turkey subsequently includes discussions of practically every aspect of the iconic bird including the wild turkey in early America how it came to be called turkey domestication turkey mating habits expansion into Europe stuffing conditions in modern industrial turkey factories its surprising commercial history of boom and bust and its eventual ascension to holiday mainstay As one of the easiest of foods to cook the turkey s culinary possibilities have been widely explored if little noted The second half of the book collects an amazing array of over one hundred historical and modern turkey recipes from across America and Europe From sandwiches to salmagundi you ll find detailed instructions on nearly every variation on the turkey Historians will enjoy a look back at the varied appetites of their ancestors and seasoned cooks will have an opportunity to reintroduce a familiar food in forgotten ways **The Perfection of Nature** Mackenzie Cooley, 2022-10-26 A deep history of how Renaissance Italy and the Spanish empire were shaped by a lingering fascination with breeding The Renaissance is celebrated for the belief that individuals could fashion themselves to greatness but there is a dark undercurrent to this f ted era of history The same men and women who offered profound advancements in European understanding of the human condition and laid the foundations of the Scientific Revolution were also obsessed with controlling that condition and the wider natural world Tracing early modern artisanal practice Mackenzie Cooley shows how the idea of race and theories of inheritance developed through animal breeding in the shadow of the Spanish Empire While one strand of the Renaissance celebrated a liberal view of human potential another limited it by biology reducing man to beast and prince to stud Race Cooley explains first referred to animal stock honed through breeding To those who invented the concept race was not inflexible but the fragile result of reproductive work As the Spanish empire expanded the concept of race moved from nonhuman to human animals Cooley reveals how as the dangerous idea of controlled reproduction was brought to life again and again a rich complex and ever shifting language of race and breeding was born Adding nuance and historical context to discussions of race and human and animal relations The Perfection of Nature provides a close reading of undertheorized notions of generation and its discontents in the more than human world The New World in Early Modern Italy. 1492-1750 Elizabeth Horodowich, Lia Markey, 2017-11-16 Italians became fascinated by the New World in the early modern

period While Atlantic World scholarship has traditionally tended to focus on the acts of conquest and the politics of colonialism these essays consider the reception of ideas images and goods from the Americas in the non colonial states of Italy Italians began to venerate images of the Peruvian Virgin of Copacabana plant tomatoes potatoes and maize and publish costume books showcasing the clothing of the kings and queens of Florida revealing the powerful hold that the Americas had on the Italian imagination By considering a variety of cases illuminating the presence of the Americas in Italy this volume demonstrates how early modern Italian culture developed as much from multicultural contact with Mexico Peru Brazil and the Caribbean as it did from the rediscovery of classical antiquity

Presenting the Turkey Sabine Eiche, 2004 In this book art historian Sabine Eiche has assembled a delightful collection of art to illustrate the turkey's adventures in Europe The idea for *Presenting the Turkey* came to the author by reading a letter dated in 1531 written by an agent of Duke Francesco Maria della Rovere of Urbino who recounted having seen something

Naturalists in the Field, 2018-04-24 Interposed between the natural world in all its diversity and the edited form in which we encounter it in literature imagery and the museum lie the multiple practices of the naturalists in selecting recording and preserving the specimens from which our world view is to be reconstituted The factors that weigh at every stage are here dissected analysed and set within a historical narrative that spans more than five centuries During that era every aspect evolved and changed as engagement with nature moved from a speculative pursuit heavily influenced by classical scholarship to a systematic science drawing on advanced theory and technology Far from being neutrally objective the process of representing nature is shown as fraught with constraint and compromise With a Foreword by Sir David Attenborough Contributors are Marie Addyman Peter Barnard Paul D Brinkman Ian Convery Peter Davis Felix Driver Florike Egmond Annemarie Jordan Gschwend Geoff Hancock Stephen Harris Hanna Hodacs Stuart Houston Dominik Huenniger Rob Huxley Charlie Jarvis Malgosia Nowak Kemp Shepard Krech III Mark Lawley Arthur Lucas Marco Masseti Geoff Moore Pat Morris Charles Nelson Robert Peck Helen Scales Han F Vermeulen and Glyn Williams

Senses of Space in the Early Modern World Nicholas Terpstra, 2024-03-28 How did early moderns experience sense and space How did the expanding cultural political and social horizons of the period emerge out of those experiences and further shape them This *Element* takes an approach that is both global expansive and locally rooted by focusing on four cities as key examples Florence Amsterdam Boston and Manila They relate to distinct parts of European cultural and colonialist experience from north to south republican to monarchical Catholic to Protestant Without attempting a comprehensive treatment the *Element* aims to convey the range of distinct experiences of space and sense as these varied by age gender race and class Readers see how sensory and spatial experiences emerged through religious cultures which were themselves shaped by temporal rhythms and how sound and movement expressed gathering economic and political forces in an emerging global order This title is also available as Open Access on Cambridge Core

Spirits of the Air Shepard Krech, 2009 Before the massive environmental change wrought by the European colonization of the South hundreds of

species of birds filled the region's flyways in immeasurable numbers. Before disease war and displacement altered the South's earliest human landscape, Native Americans hunted and ate birds and made tools and weapons from their beaks, bones, and talons. More significant to Shepard Krech III, Indians adorned themselves with feathers, invoked avian powers in ceremonies and dances, and incorporated bird imagery on pottery, carvings, and jewelry. Krech, a renowned authority on Native American interactions with nature, reveals as never before the omnipresence of birds in Native American life. From the time of the earliest known renderings of winged creatures in stone and earthworks through the nineteenth century, when Native southerners took part in decimating bird species with highly valued fashionable plumage, *Spirits of the Air* examines the complex and changeable influences of birds on the Native American worldview. We learn of birds for which places and people were named, birds common in iconography and oral traditions, birds important in ritual and healing, and birds feared for their links to witches and other malevolent forces. Still, other birds had no meaning for Native Americans. Krech shows us these invisible animals too, enriching our understanding of both the Indian bird dynamic and the incredible diversity of winged life once found in the South. A crowning work drawing on Krech's distinguished career in anthropology and natural history, *Spirits of the Air* recovers vanished worlds and shows us our own anew. **Provenance and Possession** K. J. P. Lowe, 2024-04-09

A thought-provoking study of how knowledge of provenance was not transferred with enslaved people and goods from the Portuguese trading empire to Renaissance Italy. In the fifteenth and sixteenth centuries, Renaissance Italy received a bounty of goods from Portuguese trading voyages: fruits of empire that included luxury goods, exotic animals, and even enslaved people. Many historians hold that this imperial opening up of the world transformed the way Europeans understood the global. In this book, K. J. P. Lowe challenges such an assumption, showing that Italians of this era cared more about the possession than the provenance of their newly acquired global goods. With three detailed case studies involving Florence and Rome and drawing on unpublished archival material, Lowe documents the myriad occasions on which global knowledge became dissociated from overseas objects: animals and people. Fundamental aspects of these imperial imports, including place of origin and provenance, she shows failed to survive the voyage and make landfall in Europe. Lowe suggests that there were compelling reasons for not knowing or caring about provenance and concludes that geographical knowledge, like all knowledge, was often restricted and not valued. Examining such documents as ledger entries, journals, and public and private correspondence, as well as extant objects and asking previously unasked questions, Lowe meticulously reconstructs the backstories of Portuguese imperial acquisitions, painstakingly supplying the context. She chronicles the phenomenon of mixed-ancestry children at Florence's foundling hospital, the ownership of inanimate luxury goods, notably those possessed by the Medicis, and the acquisition of enslaved people and animals. How and where goods were acquired, Lowe argues, were of no interest to fifteenth and sixteenth-century Italians; possession was paramount. [Imagining the Americas in Medici Florence](#) Lia Markey, 2016-11-30. The first full-length study of the impact of the discovery of the Americas on Italian Renaissance art.

and culture Imagining the Americas in Medici Florence demonstrates that the Medici grand dukes of Florence were not only great patrons of artists but also early conservators of American culture In collecting New World objects such as featherwork codices turquoise and live plants and animals the Medici grand dukes undertook a vicarious conquest of the Americas As a result of their efforts Renaissance Florence boasted one of the largest collections of objects from the New World as well as representations of the Americas in a variety of media Through a close examination of archival sources including inventories and Medici letters Lia Markey uncovers the provenance history and meaning of goods from and images of the Americas in Medici collections and she shows how these novelties were incorporated into the culture of the Florentine court More than just a study of the discoveries themselves this volume is a vivid exploration of the New World as it existed in the minds of the Medici and their contemporaries Scholars of Italian and American art history will especially welcome and benefit from Markey s insight
