Current Catalog National Library of Medicine (U.S.), *Reconceptualizing the Nature of Science for Science Education* Sibel Erduran, Zoubeida R. Dagher, 2014-08-20 Prompted by the ongoing debate among science educators over nature of science and its importance in school and university curricula this book is a clarion call for a broad re conceptualizing of nature of science in science education The authors draw on the family resemblance approach popularized by Wittgenstein defining science as a cognitive epistemic and social institutional system whose heterogeneous characteristics and influences should be more thoroughly reflected in science education They seek wherever possible to clarify their developing thesis with visual tools that illustrate how their ideas can be practically applied in science education The volume's holistic representation of science which includes the aims and values knowledge practices techniques and methodological rules as well as science's social and institutional contexts mirrors its core aim to synthesize perspectives from the fields of philosophy of science and science education The authors believe that this more integrated conception of nature of science in science education is both innovative and beneficial They discuss in detail the implications for curriculum content pedagogy and learning outcomes deploy numerous real life examples and detail the links between their ideas and curriculum policy more generally **Journal of Scientific & Industrial Research**, 1984 **The Publishers Weekly**, 1983 *Presented Discourse in Popular Science* Olga Pilkington, 2018-07-03 In *Presented Discourse in Popular Science* Olga A Pilkington explores the forms and functions of the voices of scientists in books written for non professionals This study confirms the importance of considering presentation of discourse outside of literary fiction popular science uses presented discourse in ways uncommon for fiction yet not conventional for non fiction either This analysis is an acknowledgement of the social consequences of popularization Discourse presentation of scientists reconstructs the world of the scientific community as a human space but also projects back into it an image of the scientist the public wants to see At the same time Pilkington's findings strengthen the view of popularization that rejects the notion of a strict divide between professional and popular
