Improving Compliance with International Environmental Law Jacob Werksman,James Cameron,Peter Roderick,2014-01-14 Measures for regulating the behaviour of nation states in relation to the global environment have increasingly taken the form of international treaties and conventions Many have argued that this has proved to be an ineffective way of halting unsustainable development for the provisions of these agreements are either too weak or are flouted regularly by the parties concerned This volume seeks to address the crucial question of how compliance with these agreements could be encouraged effectively without damaging the fragile political consensus that is emerging on environmental issues With extensive use of case studies Improving Compliance will make stimulating reading for all students and researchers working in this area as well as for anyone concerned about the effectiveness of international environmental measures

Governing Global Biodiversity Philippe G. Le Prestre,2017-05-15 Predictions about the success of the Convention on Biological Diversity CBD are pessimistic It has now become commonplace to bemoan the scope ambition and deeply political nature of a convention that addresses issues ranging from ecosystems protection to the exploitation of genetic resources from conservation to justice and from commerce to scientific knowledge Ten years after its adoption how can we assess the difference that the CBD has made Is it in danger of collapsing under its own weight or is it building the foundations of new patterns of relations between societies and nature What achievements can we record and what challenges does it face In this book which is unique in its scope diversity and the wealth of information it contains contributors from a variety of academic disciplines tackle an issue of enduring importance to the protection of biodiversity and enhance our understanding of humanity s capacity to reconcile its various aspirations and halt the destructive path upon which it is set
