**Presidential Risk Behavior in Foreign Policy** William A. Boettcher III, 2005-04-15 Bringing together research on the situational determinants of risk propensity and on individual personality predispositions Boettcher draws on findings from political science psychology economics business and sociology to develop a Risk Explanation Framework REF to study the person in the situation Using structured focused comparison he examines six foreign policy cases from the Truman and Eisenhower administrations to explore how aspirations fears time pressures and other factors influence risk taking This is thus an important contribution to the study of international relations foreign policy decision making prospect theory and risk behavior personality theory and information processing Presidential Risk Behavior in Foreign Policy William A. Boettcher III, 2005-05-11 Bringing together research on the situational determinants of risk propensity and on individual personality predispositions Boettcher draws on findings from political science psychology economics business and sociology to develop a Risk Explanation Framework REF to study the person in the situation Using structured focused comparison he examines six foreign policy cases from the Truman and Eisenhower administrations to explore how aspirations fears time pressures and other factors influence risk taking This is thus an important contribution to the study of international relations foreign policy decision making prospect theory and risk behavior personality theory and information processing Prudence Or Peril William A. Boettcher (III), 1997 **Risk and Presidential Decision-making** Luca Trenta, 2016-05-20 This book aims at gauging whether the nature of US foreign policy decision making has changed after the Cold War as radically as a large body of literature seems to suggest and develops a new framework to interpret presidential decision making in foreign policy It locates the study of risk in US foreign policy in a wider intellectual landscape that draws on contemporary debates in historiography international relations and Presidential studies Based on developments in the health and environment literature the book identifies the President as the ultimate risk manager demonstrating how a President is called to perform a delicate balancing act between risks on the domestic political side and risks on the strategic international side Every decision represents a risk vs risk trade off in which the management of one target risk leads to the development countervailing risks The book applies this framework to the study three major crises in US foreign policy the Cuban Missile Crisis the seizure of the US Embassy in Tehran in 1979 and the massacre at Srebrenica in 1995 Each case study results from substantial archival research and over twenty interviews with policymakers and academics including former President Jimmy Carter and former Senator Bob Dole This book is ideal for postgraduate researchers and academics in US foreign policy foreign policy decision making and the US Presidency as well as Departments and Institutes dealing with the study of risk in the social sciences The case studies will also be of great use to undergraduate students **Risk and Resolution** R. Greg Brown, 2019-05-20 America repeatedly finds itself mired in military interventions long after public buy in to the national interest has waned Why is the timely disengagement of military forces so difficult to achieve Traditional international relations theories diminish the

role of the individual leader in favor of the state or international institutions Behavioral science theories have in recent years experienced a resurgence However the dominant behavioral explanation of foreign policy decision making prospect theory while it focuses on how people tend to make decisions under risk still minimizes the influence of the individual president Decisions to disengage military forces are presidential decisions just like the decisions to commit forces to foreign interventions If we accept this then it is important to understand if and if so why some presidents inherently are more or less acceptant of the risks disengagement presents This book operationalizes a competing personality based model of decision making under risk Referred to here as the trait based model it is assessed using disengagement opportunities in three varied levels of military intervention across four presidencies humanitarian relief turned nation building under George H W Bush and Bill Clinton in Somalia compelling air campaigns turned peace making keeping in Bosnia and Kosovo under Clinton and major combat operations turned irregular warfare in Iraq under George W Bush and Barack Obama Data for the model predominantly comes from existing presidential personality profiles based on the dominant model of personality theory the five factor model augmented by Myers Briggs Type Inventory data from public sources This study aims to explain the roughly 30 percent of cases which defy prospect theory's predictions and to better explain those cases where prospect theory might heretofore have sufficed The results suggest specific personality traits do in fact point to presidents predispositions toward risk which in turn help explain their disengagement decisions This work may be only the second to apply the five factor model to presidential foreign policy decision making and is the first to do so in the context of disengagement decisions Hopefully it will foster further work in both areas

#### **The Road to War in Iraq: Comparative Foreign Policy Analysis**

Chris Featherstone, 2025-04-09 This book combines three Foreign Policy Analysis FPA models to explain both how and why the US and UK decided to invade Iraq in 2003 These three FPA models each examine a different but closely related aspect of the individual level of decision making Firstly Groupthink examines how pathologies of small group decision making affected the processes in the US and UK decision to invade Iraq Secondly the Leadership Style framework examines how the individual leader's style of exercising their leadership affected the navigation of the decision making process Thirdly analogical reasoning examines how decision makers frame their actions both in their own decision making and in how they present their decision to the wider public By achieving these objectives The Road to War contributes to the field of FPA and to our understanding of how the decision to invade Iraq was taken The comparative use of these FPA models within a single framework means that this book responds to the calls for multifactorial research within FPA proposing and testing a framework that provides more complex answers through adopting a multifactorial framework These more nuanced complex answers then reveal more about the role of the individuals involved in the decision to invade Iraq and how their cognition affected the process that led to the decision to invade

#### **Fiascos in Public Policy and Foreign Policy Kai**

Oppermann, Alexander Spencer, 2018-04-19 The collection brings together scholars from Public Policy and Foreign Policy to

address the theme of policy fiascos So far research on failure and fiascos in both Public Policy and Foreign Policy has existed independent of each other with very little communication between the two sub disciplines The contributions aims to bridge this divide and bring the two sides into a dialogue on some of the central issues in the study of fiascos including how to define identify and measure policy failure and success the social and political contestation about what counts as policy fiascos the causes of policy fiascos and their consequences the attribution of blame as well as processes of learning from fiascos A common theme of the collection will be to explore different epistemological and methodological approaches to studying policy fiascos The volume appeals to scholars and practitioners interested in policy failures and fiascos both within and among states and other international actors This book was previously published as a special issue of the Journal of European Public Policy

**Rumbles of Thunder** Steve Chan, 2022-12-27 It is widely believed that shifts in the balance of power between an established hegemon and a rising upstart can lead to war To what extent does this proposition hold true for Sino American relations today Steve Chan examines a range of international relations theories and popular narratives that suggest an elevated risk of confrontation between the two powers Probing the recent deterioration in Sino American relations he considers whether several factors that can raise or lower international tension apply to the current situation Chan demonstrates that power shifts do not preordain violent outcomes nor does their absence ensure peace Criticizing overly mechanistic frameworks he emphasizes that domestic politics international political economy and the choices of individual leaders are all crucial to understanding why wars happen Chan demonstrates that claims of a rising China catching up to and even poised to overtake the United States are alarmist American structural advantages will endure for some time to come Contrary to prevailing narratives China does not act like a revisionist power seeking to overturn the system while the United States far from defending the international order has frequently undermined it However Chan cautions Taiwan remains a flashpoint for a possible Sino American conflict Bringing together expertise in IR theory and keen political acumen **Rumbles of Thunder** challenges conventional wisdom on the likelihood of war between the United States and China

**Fuses, Chains, and Backlashes** Steve Chan, 2025-06-23 How do interstate conflicts start spread and escalate Not all local or regional rivalries develop into devastating multistate wars but those that do cause upheaval across the world It is important therefore to study causal chains and pathways that can trigger a conflict of international proportions **Fuses Chains and Backlashes** analyzes the factors and processes that have historically ignited wars among the great powers and applies the resulting insights to examine the potential for contemporary Sino American competition to flare into conflict Distinguished political scientist Steve Chan emphasizes the importance of considering multiple enabling conditions for system level conflict including power shifts armament races alliance dynamics and enduring rivalries But these conditions in themselves do not always lead to war Chan introduces the idea of a catalyst or fuse that ignites the combustible mixture produced by these variables interactions He traces the origins of many large conflagrations to local feuds such as the dispute

across the Taiwan Straits which in turn invite intervention by third parties like the United States By analyzing possible causal pathways to interstate war and applying this historical empirical context to the present day relationship between the US and China Chan hopes to help us learn from the past and avoid future catastrophe *Presidential Leadership in Feeble Times* Mark Zachary Taylor, 2024 Do presidents matter for America's economic performance The Gilded Age presidents of the late nineteenth century seem like weak and forgettable leaders but they hold the key to answering this question precisely because of their supposed impotence In *Presidential Leadership in Feeble Times* Mark Zachary Taylor tells the story of three decades of Gilded Age economic upheaval with a focus on presidential leadership why did some presidents crash and burn while others prospered Neither education nor experience mattered much Nor did brains personal ethics or party affiliation Instead Taylor finds that a president's effectiveness as an economic leader flows primarily from their vision for the country and their leadership style **A Cultural Theory of International Relations** Richard Ned Lebow, 2008-12-11 An original theory of politics and international relations based on ancient Greek ideas of human motivation **Introduction to Political Psychology** Martha L. Cottam, Elena Mastors, Thomas Preston, 2022-05-02 Introduction to Political Psychology explores the many psychological patterns that influence individual political behavior The authors introduce readers to a broad range of theories concepts and case studies of political activity arguing that individuals are driven or motivated to act in accordance with personality characteristics values beliefs and attachments to groups The book explains many aspects of political behavior whether seemingly pathological actions or normal decision making practices which sometimes work optimally and sometimes fail Thoroughly updated throughout the book examines patterns of political behavior in areas including leadership group behavior voting race nationalism terrorism and war This edition features coverage of the 2016 election and profiles former U S President Donald Trump while also including updated data on race relations and extremist groups in the United States Global issues are also considered with case studies focused on Myanmar and Syria alongside coverage of social issues including Black Lives Matter and the MeToo movement Accessibly written and comprehensive in scope it is an essential companion for all graduate and upper level undergraduate students of psychology political science and political psychology It will also be of interest to those in the policy making community especially those looking to learn more about the extent to which perceptions personality and group dynamics affect the policy making arena It is accompanied by a set of online instructor resources *Thucydides's Trap?* Steve Chan, 2020-01-03 The Peloponnesian War 431-404 BCE ostensibly arose because of the fear that a rising Athens would threaten Sparta's power in the Mediterranean The idea of Thucydides' Trap warns that all rising powers threaten established powers As China increases its power relative to the United States the theory argues the two nations are inevitably set on a collision course toward war How enlightening is an analogy based on the ancient Greek world of 2,500 years ago for understanding contemporary international relations How accurate is the depiction of the history of other large armed conflicts such as the two world wars as a challenge mounted by a rising

power to displace an incumbent hegemon Thucydides's Trap Historical Interpretation Logic of Inquiry and the Future of Sino American Relations offers a critique of the claims of Thucydides's Trap and power transition theory It examines past instances of peaceful accommodation to uncover lessons that can ease the frictions in ongoing Sino American relations

**Enduring Rivalries in the Asia-Pacific** Steve Chan, 2013-08-22 Enduring rivalries recurrently ensnare states in militarized disputes and wars Are they poised to intensify in the Asia Pacific a region characterized by regime and cultural differences territorial contests and competing nationalist and regime claims It is often argued that these conditions and recent power shifts are likely to lead to conflict escalation and contagion especially in Sino American relations Steve Chan's book challenges this common view and argues instead that Asia Pacific rivalries are likely to be held in abeyance He suggests that the majority of leaders in the region wish to base their political legitimacy on their economic performance rather than popular mobilization against foreign enemies Economic interdependence and political multilateralism have restrained and in some cases reversed rivalries Although Asia Pacific states will continue to quarrel Chan argues that their relations are more stable today than at any other time since 1945

**Mobilizing the Past** Steve Chan, 2025-07-29 Historical analogies are often utilized to frame and formulate foreign policies illuminate issues of war and peace and mobilize support for particular political programs The historical record however can be distorted in a variety of ways leading to overly simplistic misleading conclusions that impair sound policy and scholarship This danger is most imminent and palpable when there exists premature academic consensus pressure to conform to political orthodoxy intellectual complacency and cognitive resistance to alternate interpretations of historical episodes We must be especially vigilant to guard against these pitfalls when deliberating one of the most high stakes topics in global politics the alarming potential for military conflict between the United States and China Past precedents and parallels regularly inform analyses of China's relations with the US By highlighting serious errors of commission or omission in popular narratives and scholarly studies concerning international relations in general and Sino American relations in particular Steve Chan challenges commonly accepted lessons of history and cautions against the misuse and misunderstanding of the past in examining China's rise and its implications for international peace and stability This far reaching book presents alternative overlooked historical accounts that are highly pertinent to Sino American relations today making it essential for researchers and students of international affairs

**China, the US and the Power-Transition Theory** Steve Chan, 2007-09-12 This volume analyzes the extent of ongoing power shifts among the leading powers exploring the portents for their future growth and seeking indicators of their relative commitment to the existing international order

**The Energy and Security Nexus: A Strategic Dilemma (Enlarged Edition)** Carolyn W. Pumphrey, Strategic Studies Institute, 2013-05-21 The relationship between energy and security has been receiving increasing attention over the last few years Energy literally drives the global economy Societies rely on it for everything from advanced medical equipment to heating cooling and irrigation Whether it derives from advanced nuclear

reactors in developed nations or simple woodstoves in the developing world energy is recognized as vital to human welfare It influences our economic political and social policies Possessing or not possessing sufficient energy determines a state s political and economic power Competition for energy has been is and will be a source of conflict The choices nation states make when it comes to energy will have a profound bearing on a wide range of security concerns from nuclear proliferation to climate change

**The Energy and Security Nexus** ,2012 The relationship between energy and security has been receiving increasing attention over the last few years Energy literally drives the global economy Societies rely on it for everything from advanced medical equipment to heating cooling and irrigation Whether it derives from advanced nuclear reactors in developed nations or simple wood stoves in the developing world energy is recognized as vital to human welfare It influences our economic political and social policies Possessing or not possessing sufficient energy determines a state s political and economic power Competition for energy has been is and will be a source of conflict The choices nation states make when it comes to energy will have a profound bearing on a wide range of security concerns from nuclear proliferation to climate change

Contesting Revisionism Steve Chan,Huiyun Feng,Kai He,Weixing Hu,2021-06-18 How can we know a country such as the United States or China is revisionist that is whether it intends to upset the international order What motivates states to act the way they do Contesting Revisionism focuses on a particular kind of motivation inclining a state to challenge the existing norms rules and institutions of international order revisionism The authors offer a critique of the existing discourse on revisionism and investigate the origin and evolution of the foreign policy orientations of revisionist states in the past Furthermore they introduce an ensemble of indicators to discern and compare the extent of revisionist tendencies on the part of contemporary China and the United States Questioning the facile assumption that past episodes will repeat in the future they argue that hard revisionism relying on war and conquest is less viable and likely in today s world Instead soft revisionism seeking to promote institutional change is more relevant and likely Focusing on contemporary Sino American relations they conclude that much of the current discourse based on power transition theory is problematic A dominant power is not inevitably committed to the defense of international order nor does a rising power always have a revisionist agenda to challenge this order The transformation of international order does not necessarily require a power transition between China and the US nor does a possible power transition necessarily augur war After developing the concept of revisionism both theoretically and empirically they conclude with a series of policy recommendations for enhancing international stability and diminishing tension in Sino American relations
