## **Presidents Parliaments And Policy:**

Presidents, Parliaments, and Policy Stephan Haggard, Matthew D. McCubbins, 2001-01-15 Advocates of parliamentary rule have been highly critical of presidentialism for dividing powers and providing the opportunity for gridlock between branches Fixed executive terms can saddle publics with ineffectual leaders who are not easily removed Yet the great theorists of presidential rule beginning with the Federalists saw very different qualities in the same institutions a desirable combination of strong leadership with checks on executive discretion These diverse assessments arise because we have surprisingly little comparative work on how presidential democracies function The introductory essays in this volume lay the theoretical groundwork for such comparative analysis Drawing on detailed cases of economic policymaking in Asia Latin America and Central Europe this book shows the diversity of presidential systems and isolates the effects of presidentialism from other factors that influence public policy such as party systems In doing so it casts doubt on the critics of presidential rule and underscores the continuing vitality of this particular form of democratic rule

**The Structure of Policy Evolution** Oldrich Bubak, 2023-02-17 This book advances novel tools for the study analysis and development of public policy essential in a world of growing diversity complexity and accelerating change Inspired by research in technology innovation the book brings its forward applications into the studies of policy and institutional systems answering among others the disciplinary need for a common model of change Relating together the dynamics and the structure of policy evolution the unified approach offers scholars important new insights into the logics and direction of policy development while advancing policy practitioners capacity for forecasting and optimizing designs Analyzing social and labour market policy development across two model jurisdictions the United Kingdom and Denmark it substantiates the new approach while demonstrating its significance to the study of welfare modernization and to policy scholarship more generally The book will be of key interest to scholars and students of policy and institutional development policy analysis and public administration and management as well as comparative policy evolutionary and complexity policy and social policy and welfare state modernization research

Patterns of Parliamentary Behavior Herbert Döring, 2017-03-02 This volume begins where the first D ring book of 1995 finished by considering what effects the rules had on legislative output during the same period It addresses four distinct yet complementary research topics the connection between a number of veto players and law production in West European parliamentary democracies the impact of closed versus open rules the effects of committee structure and organization on the degree of conflict or consensus on the procedure of passing legislation the importance of agenda setting and agenda control for the prevention of cycling across issues and the distribution of particular benefits of shifting and transient majorities Fundamental to this volume is the ability of the project group to fashion an original data set As a consequence this volume is able to ascertain the extent to which parliamentary procedures contributed to shaping policy output in this field during the 1980s

**Falling Behind** , Shaping the Metropolis Zack Taylor, 2019-05-23 Rising income inequality and concentrated

poverty threaten the social sustainability of North American cities Suburban growth endangers sensitive ecosystems water supplies and food security Existing urban infrastructure is crumbling while governments struggle to pay for new and expanded services Can our inherited urban governance institutions and policies effectively respond to these problems In *Shaping the Metropolis* Zack Taylor compares the historical development of American and Canadian urban governance both at the national level and through specific metropolitan case studies Examining Minneapolis St Paul and Portland Oregon in the United States and Toronto and Vancouver in Canada Taylor shows how differences in the structure of governing institutions in American states and Canadian provinces cumulatively produced different forms of urban governance Arguing that since the nineteenth century American state governments have responded less effectively to rapid urban growth than Canadian provinces he shows that the concentration of authority in Canadian provincial governments enabled the rapid adoption of coherent urban policies after the Second World War while dispersed authority in American state governments fostered indecision and catered to parochial interests Most contemporary policy problems and their solutions are to be found in cities *Shaping the Metropolis* shows that urban governance encompasses far more than local government and that states and provinces have always played a central role in responding to urban policy challenges and will continue to do so in the future

**Legislative Institutions and Lawmaking in Latin America** Eduardo Alemán, George Tsebelis, 2016-09-01 In this volume twelve experts on Latin American politics investigate the ways in which the interaction between legislative institutions and the policy positions of key actors affects the initiation and passage of legislation covering seven Latin American Countries Argentina Brazil Chile Colombia Mexico Peru and Uruguay These seven presidential systems vary widely in terms of their legislative institutions and the position of relevant actors The introduction provides a framework to understand the interaction of legislative majorities political institutions and policy position and each chapter begins with a description of the constitutional and congressional rules that allocate powers to propose amend and veto legislation The authors then identify the political actors who have these prerogatives and apply the framework to show how their policy positions and relative strengths influence legislative decision making The findings are consistent with the basic argument of the book that presidents with extensive legislative powers may be constrained by the positions of their legislative allies whereas weaker presidents may be well positioned to build successful coalitions to achieve their legislative goals The essays in this volume demonstrate that institutional design which determines the allocation of legislative powers must be considered along with the policy preferences of key legislative actors in order to construct a full picture of law making Oxford Studies in Democratization is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Senior Research Fellow Nuffield College University of

Oxford     **Politicians and Economic Reform in New Democracies** Kent Eaton, 2010-11 As economic reform in developing countries has shifted from macroeconomic stabilization to liberalization opportunities for legislators to influence the process and outcome of reform have increased and their role has become more important This book focuses attention on differences in institutional structure in political parties and electoral rules to show how they create incentives that can explain the varying ways in which legislators respond to policy initiatives from the executive branch In Argentina and the Philippines presidents proposed similar fiscal reforms in the 1990s expanding tax bases strengthening tax administration and redesigning tax revenue sharing with subnational governments Drawing on archival research and interviews with policy makers Kent Eaton follows the path of legislation in these three areas from initial proposal to final law to reveal how it was shaped by the legislators participating in the process Obstacles to the adoption of reform he demonstrates are greater in candidate centered systems like the Philippines where the cultivation of personal reputations is paramount than in party centered systems like Argentina s where loyalty to party leaders is emphasized To test his argument further Eaton looks finally at other kinds of reform ventured in these two countries and at tax reforms attempted in some other countries
