**Guerrillas and Revolution in Latin America** Timothy P. Wickham-Crowley, 2018-06-26 In this comparative survey of guerrilla movements in Latin America Timothy Wickham Crowley explores the origins and outcomes of rural insurgencies in nearly a dozen cases since 1956 Focusing on the personal backgrounds of the guerrillas themselves and on national social conditions the author explains why guerrillas emerged strongly in certain countries but not others He considers for example under what circumstances guerrillas acquire military strength and why they do or do not secure substantial support from the peasantry in rural areas

*Shock to the System* Michael K. Miller, 2021-07-20 How violent events and autocratic parties trigger democratic change How do democracies emerge Shock to the System presents a novel theory of democratization that focuses on how events like coups wars and elections disrupt autocratic regimes and trigger democratic change Employing the broadest qualitative and quantitative analyses of democratization to date Michael Miller demonstrates that more than nine in ten transitions since 1800 occur in one of two ways countries democratize following a major violent shock or an established ruling party democratizes through elections and regains power within democracy This framework fundamentally reorients theories on democratization by showing that violent upheavals and the preservation of autocrats in power events typically viewed as antithetical to democracy are in fact central to its foundation Through in depth examinations of 139 democratic transitions Miller shows how democratization frequently follows both domestic shocks coups civil wars and assassinations and international shocks defeat in war and withdrawal of an autocratic hegemon due to autocratic insecurity and openings for opposition actors He also shows how transitions guided by ruling parties spring from their electoral confidence in democracy Both contexts limit the power autocrats sacrifice by accepting democratization smoothing along the transition Miller provides new insights into democratization s predictors the limited gains from events like the Arab Spring the best routes to democratization for long term stability and the future of global democracy Disputing commonly held ideas about violent events and their effects on democracy Shock to the System offers new perspectives on how regimes are transformed **The**

**Democracy Without Decency** William M.

Epstein, 2013-05-31 The conservative attacks on the welfare system in the United States over the past several decades have put liberal defenders of poverty relief and social insurance programs on the defensive In this no holds barred look at the reality of American social policy since World War II William Epstein argues that this defense is not worth mounting that the claimed successes of American social programs are not sustained by evidence Rather than their failure being the result of inadequate implementation or political resistance stemming from the culture wars these programs and their built in limitations actually do represent what the vast majority of people in this country want them to be However much people may speak in favor of welfare the proof of what they really want is in the pudding of the social policies that are actually legislated The stinginess of America s welfare system is the product of basic American values rooted in the myth of heroic individualism and reinforced by a commitment to social efficiency the idea that social services need to be minimal and compatible with current social arrangements

**The Internationalization of Communal Strife (Routledge Revivals)** Manus I.

Midlarsky, 2014-06-03 First published in 1992 this edited collection argues that conflicts have a growing tendency both to intensify and to lengthen thus increasing the likelihood of external actors being drawn into the on going violence Here leading experts in comparative and international politics examine this tendency of communal conflicts to spill over into the international arena They also look at the conditions under which these processes do not occur and are mediated successfully The authors combine theoretical perspectives with case studies covering examples from the origins of the First World War to state building in Iraq and whether it was a precursor of the Iran Iraq War and the Gulf Crisis They present both a global overview and a focus on the state as the single most important intermediary in the internationalization process A comprehensive and relevant reissue this volume will appeal to students and scholars of International Relations Comparative Politics and Strategic Studies

*Peasant Cooperation and Capitalist Expansion in Central Peru* Norman Long, Bryan R.

Roberts, 2014-11-06 This book brings together the research into regional development and social change carried out in highland Peru by a team of British and Latin American social anthropologists and sociologists The area studied the Mantaro Valley of central Peru is one of the most densely populated and economically differentiated of highland zones it is also notable for its community based forms of cooperation and its high level of peasant political activity The book presents a series of case studies that examine cooperative forms of organization in relation to developments in the regional economy and to changes in national policy The analysis attempts to avoid interpreting local processes merely as responses to externally initiated change It stresses instead the need to consider the interplay of local and national forces because local groups and processes themselves affect the pattern of regional and national development The case studies cover a range of political and economic topics from peasant movements to the achievements and shortcomings of government sponsored agricultural and manufacturing cooperatives The concluding chapter by the editors explores the theoretical implications of
