Economic globalization is transforming practically every service sector. The legal industry that has long remained insulated too has not remained untouched by the effects of globalization. The outsourcing of legal services in the past one decade has transformed the legal landscape. Legal outsourcing to India is becoming increasingly popular among U S and European law firms and corporations. This book broadly seeks to discuss three main topics surrounding legal process outsourcing: LPO, its emerging trends, the legal challenges it raises, and the hitherto unrecognized potential it holds. Firstly, this book clarifies concepts of LPO and its operating models practiced by U S and U K law firms and corporations. Secondly, the outsourcing of legal services creates significant challenges for ethics rules including conflict of interests, attorney-client privilege, supervision, and fee sharing. Thirdly, this research explores the hidden potential of LPO to improve access to justice. This book develops an altogether new proposal where Indian LPO professionals could help alleviate the access to justice problem among indigent and low-income populations of the United States. Weiler, 1991

Medical malpractice has been at the center of recurring tort crises for the last quarter century. In 1960, expenditures on medical liability insurance in the United States amounted to about 60 million. In 1988, the figure topped 7 billion. Physicians have responded not simply with expensive methods of defensive medicine but also with successful pressure upon state legislatures to cut back on the tort rights of seriously injured patients. Various reforms have been proposed to deal with the successive crises, but so far none have proved to be effective and fair. In this landmark book, Paul Weiler argues for a two-part approach to the medical malpractice crisis. First, he proposes a thorough revision of the current tort liability regime which would concentrate available resources on meeting actual financial losses of seriously injured victims. It would also shift the focus of tort liability from the individual doctor to the hospital or other health care organization. This would elicit more effective quality assurance programs from the institutions that are in the best position to reduce our current unacceptable rate of physician-induced injuries. But in states such as New York, Florida, and Illinois, where the current situation seems to have gone beyond the help of even drastic tort reform, the preferred solution is a no-fault system. Weiler shows how such a system would provide more equitable compensation, more effective prevention, and more economical administration than any practical alternative. **California Law Revision Commission.
