## **Preventing A New Eastwest Divide:**

Preventing a New East-West Divide Armand Clesse, Rudolf L. Tökés, 1992      *Enlargement of the European Union* Allan F. Tatham, 2009-01-01 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture history and economics has supplanted the long dominant theme of widening and deepening particularly since the Union's expansion has become primarily eastward The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives In the course of its presentation it details the actual pre accession Europeanization process and its complex history Among the key elements discussed are the following the conflict between widening and deepening and the effect on EU institutional reform institutional requirements on candidate countries pre accession criteria and negotiations administrative capacity judicial capacity and legal approximation in accession states capacity of the EU to absorb new Member States and EC law as part of European identity Also covered are specific historical details of particular pre accession negotiations e g Greece Spain Portugal Malta and Cyprus the still inconclusive negotiations with Turkey and the Western Balkan states and political factors involved in the non accession of Norway Iceland and Switzerland Assembling powerful evidence and applying incisive analysis the author's conclusion shows that absent further and major EU institutional reform it will be difficult for an enlarging Union to continue to deliver the goods A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe this book will prove invaluable to anybody interested in the European integration project particularly lawyers academics officials and policymakers in the EU Member States      **The Reuniting of Europe** José I. Torreblanca, 2017-09-20 This title was first published in 2001 In 1989 central and Eastern European countries broke free from the Soviet Union and looked upon the European Community to support their return to Europe Some years later leaders of the European Community meeting in Copenhagen in June 1993 endorsed for the first time the membership aspirations of the recently democratized countries of Central and Eastern Europe This insightful text examines the negotiations debates tensions and contradictions behind the process of approximation between the two halves of Europe both within the EC itself as well as between the EC and the countries of Central and Eastern Europe The extensive consultation of unpublished internal documents and a theoretically relevant and well written analysis ensures that this book is an indispensable resource for students and researchers of EC EU relations with Central and Eastern Europe      Transformation of Pension Systems in Central and Eastern Europe Winfried Schmohl, Sabine Horstmann, 2002-06-26 Given the highly specialised subject matter which so easily degenerates into rather tedious calculations this book is really amazingly interesting and competently executed The late Mark Blaug formerly of the University of London and University of

Buckingham UK     The New Detente Mary Kaldor, Gerard Holden, Richard A. Falk, 1989 Introduction by Mary Kaldor     The European Union and Conflict Prevention Emma J. Stewart, 2006 The book examines the evolution of EU conflict prevention as an internal EU process and as an area of external cooperation with the UN OSCE and NATO Conflict prevention has emerged as a prominent EU policy in the post Cold War era Yet how suited is the organisation to practice conflict prevention and what does the record of cooperation with other key European organisations tell us about the EU's external priorities The book critically analyses the EU's policy and outcomes to date concluding that conflict prevention is underdeveloped by the EU and is in danger of being marginalised in favour of shorter term crisis management Moreover EU external cooperation reinforces this the priority is cooperation in crisis management with the UN and NATO rather than longer term cooperation with the OSCE

**Military Strategies of the New European Allies** Håkan Edström, Jacob Westberg, 2022-12-30 This book analyses how and to what extent ex communist states have adjusted their defence strategies since joining the EU and NATO and how differences and similarities between their strategies can be explained Between 1999 and 2013 four phases of enlargement took place when the European Union EU and NATO allowed 11 new former communist states to enter both organisations These states share some common attributes and experiences related to strategic culture and common experiences during the Cold War era that can potentially explain similarities in behaviour and preferences among them However the strategic adjustments among these states are far from uniform In an effort to explain these differences the book introduces three intervening variables 1 differences in relative power and position in the international system 2 national geographical characteristics and 3 historical experiences related to formative periods of state building processes as well as wars and armed conflicts Empirically the book strives to present and analyse the defence strategies of each of the new allies by conducting a structured focused comparison of official strategic documents from the twenty first century for each of the 11 cases Theoretically and methodologically it introduces an analytical framework enabling us to explain both similarities and differences in the formulation of the strategies of the 11 states and to shed light on their external and internal efforts to promote their strategic interest by operationalising the dependent variable defence strategy The analytical framework combines elements of structural realism with classical realism and constructivist research on unit level characteristics related to relative power and perceptions of strategic exposure This book will be of much interest to students of strategic studies European Union policy NATO and International Relations in general

**Beyond Containment and Division** Frans Alphonso Maria Alting Von Geusau, 1993-11-01 The collapse of the totalitarian system and the disintegration of the Soviet Union took the West by complete surprise For many years Western co-operation and West European integration proceeded on the assumption that the division of Europe and Germany would be there to stay

**Beyond Containment and Division** Frans A.M. Alting von Geusau, 2023-12-04 The collapse of the totalitarian system and the disintegration of the Soviet Union took the West by complete surprise For many years Western cooperation and West European integration proceeded on the assumption that the division of Europe and Germany would be there to stay As a consequence the Western states are now having great difficulties in adapting their cooperative arrangements to the challenges of a new European

environment and in coping with the political problems that had been swept under the carpet for the sake of preserving bipolar stability In his new book Alting von Geusau offers a fresh and timely analysis of Western cooperation from a post totalitarian perspective He reminds the reader of America s involvement and the tragic consequences of the two world wars He explains why the order of Yalta was a myth and how the Soviet designs for Europe were ultimately defeated by civil resistance Post war American leadership created the free space for the remarkable growth of Western organisations and the dynamics of European integration American and French policies of containment are reexamined for the same post totalitarian perspective and found in need to adapt to the new realities In two final chapters the author carefully reviews the agreements reached in the principal Western and European organizations between November 1989 and January 1992 with a view to adapting their tasks to the new Europe He also underlines the emerging importance of a new partnership between the United States and united Germany Combining historical legal and political analysis this new title is an important source of reference and a highly useful textbook for advanced students in European organization and Western cooperation In addition it will be especially useful to training programmes for scholars students and diplomats from East and Central Europe and the republics of the former Soviet Union
