Drug and Alcohol Abuse Prevention Roland R. Watson, 2012-12-06

A major national goal is to improve our health and advance our opportunities to pursue happiness Simultaneously there are increasing health care costs and increasing demands to accomplish more with less financial support Treatment costs can be reduced and health improved by preventing the toxic effects of drugs This first volume of our new series Drug and Alcohol to reduce the use and Abuse Reviews focuses on strategies abuse of common compounds known to cause major damage to health alcohol tobacco and illicit drugs such as cocaine and heroin With the number of deaths attributable to the consumption of alcohol in the US at about 100 000 per year the annual cost of addictions will be 150 billion by 1995 A variety of approaches to preventing drug abuse are being applied by governmental agencies and health care providers to reduce costs These include school based interventions driver education programs media interventions health warning labels physician guidance economic disincentives restricted availability punishments and penalties environmental protections and social support approaches With such a range of options it becomes critical to evaluate and choose the most effective systems for a given population We feel that the present collection of critical survey articles constitutes a thorough examination of the issues and strategies associated with prevention and trust that readers will find the book exceedingly helpful in understanding and planning what needs to be done
