Stress, Risk, and Resilience in Children and Adolescents Robert J. Haggerty, 1996-09-28 Many children's behavioral problems have multiple causes and most children with one problem behavior also have others. The co-occurrence and interrelatedness of risk factors and problem behavior is certainly an important area of research. This volume recognizes the complexity of the developmental processes that influence coping and resilience and the roles sociocultural factors play. The contributors focus on four themes that have emerged in the study of risk and coping over the past decade: interrelatedness of risk and problems, individual variability in resilience and susceptibility to stress processes, and mechanisms linking multiple stressors to multiple outcomes and interventions and prevention. Psychologists, pediatricians, and others involved in the research or care of children will take great interest in this text.

Severe Stress and Mental Disturbance in Children Cynthia R. Pfeffer, 1996 Severe Stress and Mental Disturbance in Children uniquely blends current research and clinical data on the effects of severe stress on children. Each chapter is written by international experts in their fields. Stressful events occur throughout the life cycle. But how do major stressful events: accidents, sexual abuse, violence, divorce, adoption, natural disasters during the developmental stages relate to adulthood? Psychiatrists, psychologists, social workers, pediatricians, other health care and medical professionals and students can use this book as a current review of the topic, a reference, and a clinical guide. It offers a new perspective on the understanding, diagnosis, and treatment of stress in children.
