Preventing Mental Illness Despo Kritsotaki, Vicky Long, Matthew Smith, 2018-10-16 This book provides an overview of a diverse array of preventive strategies relating to mental illness and identifies their achievements and shortcomings The chapters in this collection illustrate how researchers clinicians and policy makers drew inspiration from divergent fields of knowledge and practice from eugenics genetics and medication to mental hygiene child guidance social welfare public health and education from risk management to radical and social psychiatry architectural design and environmental psychology It highlights the shifting patterns of biological social and psychodynamic models while adopting a gender perspective and considering professional developments as well as changing social and legal contexts including deinstitutionalisation and social movements Through vigorous research the contributors demonstrate that preventive approaches to mental health have a long history and point to the conclusion that it might well be possible to learn from such historical attempts The book also explores which of these approaches are worth considering in future and which are best confined to the past Within this context the book aims at stoking and informing debate and conversation about how to prevent mental illness and improve mental health in the years to come Chapters 3 10 and 12 of this book are available open access under a CC BY 4 0 license at link.springer.com

Preventing Mental Ill-Health Jennifer Newton, 2013-05-07 Is there any evidence that we can reduce the incidence of mental ill health Is it possible to prevent recurrence of mental ill health Aspirations to achieve both these goals have featured in mental health policy and practice for over 100 years This comprehensive and accessible book draws on research on the development and persistence of behavioural problems in childhood adult depression and schizophrenia The association between social disadvantage and mental ill health as well as the need for preventive care to start from conception and the crucial importance of maternal mental health are discussed A variety of prominent programmes which have good evidence of efficacy are described These include Targeted approaches with individuals and families Macro policies affecting housing and employment Lifestyle contributions such as diet and exercise However some attempts to achieve preventive benefits have not succeeded and reflecting on these problems is an important feature of this review Jennifer Newton has written extensively on these issues for over twenty years and her careful examination of the research literature provides a succinct overview of the state of current knowledge which will benefit mental health professionals and students of health psychology and public health It also takes a life course perspective and considers how when and why vulnerability persists
