

FAMILY FIRST PREVENTION SERVICES PATHWAYS

A family with identified prevention needs can receive services in one of multiple ways.

CPS Family Assessment Response (FAR)

For cases where allegations are considered to be low to moderate risk and non-emergency, the family would be eligible for a FAR assessment versus an investigation. In addition, if the child(ren) can remain safely in the home, the case remains in FAR for ongoing services and prevention planning. This pathway is part of the initial implementation phase for the Family First Prevention Plan.

Family Voluntary Services (FVS)

After a CPS investigation if the family has significant risk factors and the child(ren) can remain safely in the home, the case is transferred to FVS. FVS will develop a prevention plan, monitor ongoing safety, risk, and progress, and provide services to address needs of the family. This pathway is part of the initial implementation phase for the Family First Prevention Plan.

Additional DCYF Program

There are multiple programs within DCYF that can provide prevention services and support to families. Children on trial return home following out of home placement, Family Reconciliation Services (FRS), youth discharged from state juvenile rehabilitation services and potentially others. DCYF is interested in exploring how family first prevention services can support these families in these programs. This pathway will be part of future implementation phases for the Family First Prevention Plan.

Community

DCYF is interested in developing a pathway to ensure children and families are supported within their own communities. Families that need concrete supports and services during a crisis often are reported to child protective services, which can result unnecessarily in an investigation that is traumatic and harmful to those involved. An alternative pathway will be explored in Washington State to support and connect families to critical and stabilizing services to prevent unnecessary future child welfare involvement. This pathway will be part of future implementation phases of the Family First Prevention Plan.

Prevention In Family Services Approaches To Family Wellness:

Prevention in Family Services David R. Mace, 1983-11 The vast literature on family problems suggests that most researchers and professionals see these problems as inevitable and their own role as one of curing rather than preventing them The family wellness movement attempts to step back a stage with the emphasis on prevention rather than cure Citing parallels with the movement towards prevention in medicine Mace draws upon the insights of noted workers in the field who discuss their own roles in developing family enrichment programmes Their readable accounts of the philosophical and practical benefits of family wellness will make this book crucial reading for family researchers social service professionals educators clergy and students *Sourcebook of Family Theories and Methods* Pauline Boss, William J. Doherty, Ralph LaRossa, Walter R. Schumm, Suzanne K. Steinmetz, 1993-03-31 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots i e sources from which these orientations and strategies flow Thus an appropriate way to preface this book is to talk first of its roots its beginnings In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself A goal was thus set to write a book that like Janus would face both backward and forward a book that would give readers both a perspective on the past and a map for the future There were precedents for such a project The Handbook of Marriage and the Family edited by Harold Christensen and published in 1964 the two Contemporary Theories about the Family volumes edited by Wesley Burr Reuben Hill F Ivan Nye and Ira Reiss published in 1979 and the Handbook of Marriage and the Family edited by Marvin Sussman and Suzanne Steinmetz then in production **Journal of Human Services Abstracts** ,1984 **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 **A Clinician's Guide to Maintaining and Enhancing Close Relationships** , **Low-Cost Approaches to Promote Physical and Mental Health** Luciano L'Abate, 2007-06-06 Most physical and mental health professionals will agree that their time space and funds are generally in short supply even under optimal conditions Their participants clients or patients too will admit to similar deficits of time and patience even with optimal motivation Overburdened mental health facilities are trying to cope with limited budgets and overworked and underpaid personnel Low Cost Approaches to Promote Physical and Mental Health addresses both sides of this shortfall by offering either self administered or easily administered verbal and non verbal interventions designed to promote positive health behaviors while requiring little or no outside funding Editor Luciano L Abate continues his long tradition of prolific innovations by identifying major changes in today's health care systems and explaining how targeted prescriptive promotion prevention strategies can enhance traditional primary secondary and tertiary interventions in key behavioral and relational areas Nutrition weight obesity control diets meal planning vitamins and minerals herbal supplements Exercise expressive movement relaxation meditation and mindfulness Writing for mental health promotion from structured protocols workbooks to less structured focused expressive and guided

writing including diaries and autobiographies Sex sexuality affection intimacy and fear of intimacy Mother child bonding as well as couple and family togetherness Spirituality and forgiveness in dealing with inevitable life hurts and disappointments Friendships and support groups Plus leading edge interventions including emotional intelligence animal companionship and computer technology Reviews of each promotional approach are engaging effective and consistent with standard psychological practice for lasting results either away from or in addition to non clinical and clinical settings schools hospitals seniorcitizen centers etc L Abate and his fifty colleagues have designed a future oriented sourcebook for mental and public health professionals who want to maximize their resources and those of their participants

Understanding and Helping Families Andrew I. Schwebel, Mark A. Fine, Andrew Schwebel, 2014-04-04 This book presents a new approach to understanding the family unit and how and why it functions as it does The approach focuses on the cognitions of family members and how these in turn shape individuals behavior and the functioning of the family system The use of the cognitive behavioral perspective in family science has gained a quick and broad acceptance among social scientists and practitioners during the past decade One reason for its success is that the basics of the approach are easy to learn and apply Specifically the approach maintains that a person who believes that he or she is a failure will because of this cognition act in certain self defeating ways and have various self deprecating feelings The wide acceptance of the cognitive behavioral approach rests on more than its simplicity the approach has repeatedly proven itself in the laboratory and in the clinic The knowledge readers of this volume will gain about the cognitive behavioral approach provides them with tools that they can use to better understand not only the family interactions but the thoughts feelings and behaviors of individuals including themselves in the family setting **The Science of Well-Being: Integration into Clinical Child Psychiatry,**
