Preventive Psychiatry G. N. Christodoulou, V. Kontaxakis, 1994-08-23 **Youth Mental Health** Peter J. Uhlhaas, Stephen J. Wood, 2020-04-14 Experts discuss the potential of early intervention to transform outcomes for people with mental disorders Mental illness represents one of the largest disease burdens worldwide yet treatments have been largely ineffective in improving the quality of life for millions of affected individuals in part because approaches taken have focused on late stage disorders in adulthood This volume shifts the focus by placing the developmental stage of youth at the center of mental health The contributors challenge current nosology explore mechanisms that underlie the emergence of mental disorders and propose a framework to guide early intervention Offering recommendations for the future the book holds that early intervention in youth has the potential to transform outcomes for people with mental disorders and to reconfigure the landscape of mental health The contributors discuss epidemiology classification and diagnostic issues including the benefits of clinical staging the context for emerging mental disorders including both biological and sociocultural processes biological mechanisms underlying risk for psychopathology including aspects of neural circuitry and developing and implementing prevention and early intervention including assessment and intervention modalities and knowledge translation in early treatment of schizophrenia Contributors Nicholas B Allen Mario Alvarez Jimenez G Paul Amminger Shelli Avenevoli Hannah F Behrendt Tolulope Bella Awusah Maximus Berger Byron K Y Bitanirwe Drew Blasco John D Cahill Joanne S Carpenter Andrew M Chanen Eric Y H Chen Shane D Colombo Christoph U Correll Christopher G Davey Kim Q Do Damien A Fair Helen L Fisher Sophia Frangou John Gleeson Robert K Heinssen Ian B Hickie Frank Iorfino Matcheri S Keshavan Kerstin Konrad Phuong Thao D Le Francis Lee Leslie D Leve Sarah A Lieff Cindy H Liu Beatriz Luna Patrick D McGorry Urvakhsh Meherwan Mehta Andreas Meyer Lindenberg Shreya V Nallur Christopher Niell Merete Nordentoft Dost ng r George C Patton Tom Paus Ulrich Reininghaus Bernalyn Ruiz Fred Sabb Akira Sawa Michael Schoenbaum Gunter Schumann Elizabeth M Scott Jai Shah Vinod H Srihari Ezra Susser John Torous Peter J Uhlhaas Swapna K Verma T Wilson Woo Stephen J Wood Lawrence H Yang

Alison R Yung Unmet Need in Psychiatry Gavin Andrews, Scott Henderson, 2000-01-06 This book considers ways to resolve the imbalance between the demand and supply of mental health services Treatment services in most countries reach only a minority of people identified as suffering from a mental disorder Few countries can provide adequate health services for all the mentally ill yet none has developed a rational system to decide who should be treated The questions are clear Could we develop a staged treatment process to reach all in need If not how do we decide who to treat What should the criteria be for deployment of scarce treatment resources How do we determine such criteria What are the ethical implications of applying such criteria In this pioneering work an international team of eminent psychiatrists epidemiologists health administrators economists and health planners examine these questions The result will inform and encourage all concerned with the equitable provision of mental health care

Clinical Manual of Prevention in Mental Health

Michael T. Compton, 2009-10-13 According to David Satcher M D Ph D the 16th U S Surgeon General we know a great deal more about treating mental illnesses than about preventing them and promoting mental health In his foreword to Clinical Manual of Prevention in Mental Health Dr Satcher applauds this guide as timely and vital as it provides new and emerging research on the importance of prevention in mental health Clinical Manual of Prevention in Mental Health was conceived through discussions within the Prevention Committee of the Group for the Advancement of Psychiatry GAP and features contributions from 30 highly regarded clinicians and researchers who are experienced in the treatment and prevention of specific types of mental illnesses Clinical Manual of Prevention in Mental Health will help you move toward widespread adoption of mental illness prevention in your own practice setting This important new reference provides practical suggestions to help you work toward preventing or implementing preventive measures in the treatment of Mood disorders Anxiety disorders Schizophrenia Substance use disorders Suicidality Family violence Conduct disorder and other adolescent disorders Late life depression dementia and mild cognitive impairment Physical illnesses in psychiatric settings Cigarette smoking Compared with other areas of medicine such as the prevention of infectious disease our understanding of the prevention of mental illnesses remains in a relatively nascent state especially in terms of how prevention can be incorporated into routine clinical practice The authors of the various chapters have endeavored to balance reviewing the available research knowledge with providing guidance for practicing clinicians on how such knowledge can be incorporated into everyday practice Clinical Manual of Prevention in Mental Health urges clinicians everywhere to inquire about risk factors and protective factors in patients lives in addition to focusing on the presenting problem It is the authors intent to provide mental health professionals with the knowledge and practical applications necessary to be prevention minded in all of their interactions with patients families and the community

Prevention in Mental Health

Marco Colizzi, Mirella Ruggeri, 2022-05-19 The book brings together into a single text the interrelated but different research efforts to translate the current evidence on risk and outcome of severe mental disorders into a preventive perspective The book also introduces a holistic approach to prevention in mental health by combining biological psychological and environmental evidence that attempts to blunt the risk and reduce the number of individuals with mental health vulnerabilities who eventually progress to the manifestation of a severe mental disorder Finally the book wants also to highlight the possibility to overcome the single disorder oriented preventive approach in an attempt to intercept a wider at risk youth population and explore clinical research areas underperformed where future efforts will have to concentrate Mental health problems have their peak of incidence during the transition from childhood to young adulthood interesting up to 20% adolescents Half of those eventually developing such difficulties experience clinically relevant mental distress by the age of 14 Even more importantly the symptomatic onset is generally anticipated by non specific warning signs of psychosocial impairment potentially evolving in any severe mental disorder This is of crucial importance as almost one in two health problems contributing to the global disease burden across the 0-25 age span is a mental disorder The search for preventive strategies among youth has developed over the past 2-3 decades invigorated by a rethinking of mental disorders ineluctable prodromal phase into a period where the trajectory of illness can be slowed down blunted or even halted The paradigms for implementing preventing approaches in mental health have often developed independent of each other This book aims at summarizing the available evidence and make a step towards a more mature vision of the potentialities of promotion and prevention in mental health
