Redefining Student Learning Roots Of Educational Change:

Redefining Student Learning Hermine H. Marshall, 1992 Presenting an alternative view of where educational reform must begin the contributors contend that we must begin with rethinking the nature of learning and with newer knowledge about how students learn Only then can the conditions that support the type of learning that will create productive citizens for the 21st century be considered The book begins with the need to redefine learning by increasing awareness of the relationship between how students learn and efforts to improve schools The next seven chapters present examples of classroom research to provide a glimpse of what happens when teachers implement newer views of learning based on how students actively construct knowledge in meaningful and multi connected networks These examples serve to provide clues about what learning may look like in classrooms with these goals and to raise questions about factors that support and or constrain teachers in providing opportunities for students to extend understanding to solve complex problems Writing Portfolios in the Classroom Robert Calfee, Pamela Perfumo, 2012-10-12 This volume presents chapters by researchers practitioners and policymakers who study the impact of classroom portfolios in the assessment of writing achievement by elementary and middle grade students The focus throughout the volume is on the tension between classroom assessment and externally mandated testing It presents the efforts of researchers practitioners and policymakers to understand the impact of classroom portfolios for the assessment of writing achievement by elementary and middle grade students Under the auspices of the Center for the Study of Writing the editors conducted a national survey of exemplary portfolio projects arranged for a series of video visits and held several working conferences The result of this work is a broad ranging tale the aspirations of teachers and administrators to move the machinery of schooling in the direction of more authentic and engaging tasks the puzzlement of students when they realize that the assignments are real and that the teacher may not have a right answer in mind and the tensions between ivory tower ideas and everyday classroom practice Divided into four sections this research volume provides a historical perspective develops the conceptual framework that serves as a background for many activities described throughout and discusses numerous practical issues that confront today s researchers and practitioners views the phenomenon of writing portfolios through a variety of broadview lenses such as teacher enthusiasm student reflection assessment tension the portfolio as metaphor and the locus of control conveys important conceptual issues with a balance toward pragmatics and offers unique insights from the perspective of one individual who serves as scholar researcher and teacher *Discourse Analysis of Language and Literacy Events in Educational Settings* David Bloome, Stephanie Power-Carter, W. Reflect, Learn Pete Hall,Alisa Simeral,2015-04-15 It s not the doing that matters it s the thinking about the doing said John Dewey As a teacher you work hard to make a positive difference in the lives of your students But this kind of progress doesn t

happen overnight and it doesn't happen accidentally. It's the result of intentionality, planning, effort, and thought. The difference between learning a skill and being able to implement it effectively resides in your capacity to engage in deep, continuous thought about that skill. In other words, recognizing why you do something is often more important than knowing how to do it. To help you deepen your thinking and reflect on your capacity as an educator, Pete Hall and Alisa Simeral return to the Continuum of Self Reflection which they introduced to coaches and administrators in their best-selling *Building Teachers' Capacity for Success* and redesign its implementation so you can take charge of your own professional growth. In these pages, you'll find tools specifically made to enhance self-reflection on professional practice, including the Continuum of Self Reflection and the Reflective Cycle. You'll be able to assess your current self-reflective tendencies, identify opportunities to reflect on your instruction, and begin to forge a path toward continuous growth and educational excellence.

However, it is now clear that future progress is going to be stalled by the extent of disagreement among motivation scientists to some basic yet controversial questions. To help move motivation science toward greater coherence, we decided to recruit prominent scholars to voice their contrasting perspectives. Such debate is not only interesting but it also makes future research discoveries, collaborations, and applications more fruitful. It is in this spirit that we put together a volume to address those controversies that are most likely to provide insight.
