*Redefining Urban and Suburban America* Bruce Katz, Robert E. Lang, 2004-05-13 The early returns from Census 2000 data show that the United States continued to undergo dynamic changes in the 1990s with cities and suburbs providing the locus of most of the volatility Metropolitan areas are growing more diverse especially with the influx of new immigrants the population is aging and the make up of households is shifting Singles and empty nesters now surpass families with children in many suburbs The contributors to this book review data on population race and ethnicity and household composition provided by the Census s short form and attempt to respond to three simple queries Are cities coming back Are all suburbs growing Are cities and suburbs becoming more alike Regional trends muddy the picture Communities in the Northeast and Midwest are generally growing slowly while those in the South and West are experiencing explosive growth Warm dry places grew Cold wet places declined note two authors Some cities are robust others are distressed Some suburbs are bedroom communities others are hot employment centers while still others are deteriorating And while some cities cores may have been intensely developed including those in the Northeast and Midwest and seen population increases the areas surrounding the cores may have declined significantly Trends in population confirm an increasingly diverse population in both metropolitan and suburban areas with the influx of Hispanic and Asian immigrants and with majority populations of central cities for the first time being made up of minority groups Census 2000 also reveals that the overall level of black to nonblack segregation has reached its lowest point since 1920 although high segregation remains in many areas *Redefining Urban and Suburban America* explores these demographic trends and their complexities along with their implications for the policies and politics shaping metropolitan America The shifts discussed here have significant influence

Sunderman, 2013-05-01 This book examines what equity means in a nation where the schools are becoming more diverse The authors consider how well our educational reform policies often framed in the language of equity and opportunity measure up to the challenges of achieving equity in a diverse nation While there is growing awareness of the increasing racial ethnic and socioeconomic diversity of the nation there is little recognition of how these trends affect the schools particularly in formerly homogeneous communities At the same time inequalities in student achievement between different racial ethnic and socioeconomic groups persist even as educational policy has intensified the focus on the achievement gap These two challenges make definitions of equity and opportunity as urban problems obsolete and call for a critical examination of educational policy and reform from an equity perspective Central themes include the critical examination of how equity is conceived under the law and in policy the experiences of minority students in suburban schools and the impact of current reform policies and strategies for achieving greater educational opportunities for all students This book is designed for graduate and undergraduate courses in educational policy and policy analysis for policymakers interested in a critical examination of current reform policies and options and educational leaders and administrators struggling with the implementation of reform mandates From a policy

perspective it includes a survey of the evolution of educational policies and reforms since the 1960s and traces the mix of legal and legislative legacies that have informed educational policy and equity It describes how trends in suburban diversification affect the schools something that has largely escaped the attention of educational reformers It provides school based and non school based remedies for achieving equity in diversifying suburban communities and articulates alternatives to the current accountability for performance approach It offers new and innovative analyses of current approaches to school reform including an analysis of how accountability tests can create the illusion of reducing the achievement gap and an examination of the paradoxes of federally funded compensatory policies that incorporate market based strategies Novel approaches such as social emotional learning and placed based college access strategies are examined through an equity lens

Confronting Urban Legacy Xiangming Chen, Nick Bacon, 2013-10-18 *Confronting Urban Legacy* fills a critical lacuna in urban scholarship As almost all of the literature focuses on global cities and megacities smaller secondary cities which actually hold the majority of the world's population are either critically misunderstood or unexamined in their entirety This neglect not only biases scholars understanding of social and spatial dynamics toward very large global cities but also maintains a void in students learning This book specifically explores the transformative relationship between globalization and urban transition in Hartford Connecticut while including crucial comparative chapters on other forgotten New England cities Portland Maine along with Lawrence and Springfield Massachusetts Hartford's transformation carries a striking imprint of globalization that has been largely missed from its 17th century roots as New England first inland colonial settlement to its emergence as one of the world's most prosperous manufacturing and insurance metropolises to its present configuration as one of America's poorest post industrial cities which by still retaining a globally lucrative FIRE Sector is nevertheless surrounded by one of the nation's most prosperous metropolitan regions The myriad of dilemmas confronting Hartford calls for this book to take an interdisciplinary approach The editors introduction places Hartford in a global comparative perspective Part I provides rich historical delineations of the many rises and not quite falls of Hartford Part II offers a broad contemporary treatment of Hartford by dissecting recent immigration and examining the demographic and educational dimensions of the city suburban divide and Part III unpacks Hartford's current social economic and political situation and discusses what the city could become Using the lessons from this book on Hartford and other underappreciated secondary cities in New England urban scholars leaders and residents alike can gain a number of essential insights both theoretical and practical

*Why Don't American Cities Burn?* Michael B. Katz, 2012-05-25 At 1 27 on the morning of August 4 2005 Herbert Manes fatally stabbed Robert Monroe known as Shorty in a dispute over five dollars It was a horrific yet mundane incident for the poor heavily African American neighborhood of North Philadelphia one of seven homicides to occur in the city that day and yet not make the major newspapers For Michael B Katz an urban historian and a juror on the murder trial the story of Manes and Shorty exemplified the marginalization social isolation and indifference that plague American

cities Introduced by the gripping narrative of this murder and its circumstances Why Don't American Cities Burn charts the emergence of the urban forms that underlie such events Katz traces the collision of urban transformation with the rightward moving social politics of late twentieth and early twenty first century America He shows how the bifurcation of black social structures produced a new African American inequality and traces the shift from images of a pathological black underclass to praise of the entrepreneurial poor who take advantage of new technologies of poverty work to find the beginning of the path to the middle class He explores the reasons American cities since the early 1970s have remained relatively free of collective violence while black men in bleak inner city neighborhoods have turned their rage inward on one another rather than on the agents and symbols of a culture and political economy that exclude them The book ends with a meditation on how the political left and right have come to believe that urban transformation is inevitably one of failure and decline abetted by the response of government to deindustrialization poverty and race How Katz asks can we construct a new narrative that acknowledges the dark side of urban history even as it demonstrates the capacity of government to address the problems of cities and their residents How can we create a politics of modest hope Tomorrow's Cities, Tomorrow's Suburbs William

Lucy, 2020-06-16 Cities ruled the first half of the 20th century the second half belonged to the suburbs Will cities become dominant again Can the recent decline of many suburbs be slowed This book predicts a surprising outcome in the decades long tug of war between urban hubs and suburban outposts The authors document signs of resurgence in cities and interpret omens of decline in many suburbs They offer an extensive analysis of the 2000 census with insights into the influence of income disparities housing age and size racial segregation immigration and poverty They also examine popular perceptions and misperceptions about safety and danger in cities suburbs and exurbs that affect settlement patterns This book offers evidence that the decline of cities can continue to be reversed tempered by a warning of a mid life crisis looming in the suburbs It also offers practical policies for local action steps that planners elected officials and citizens can take to create an environment in which both cities and suburbs can thrive **The Geography of Opportunity** Xavier de Souza

Briggs, 2006-03-30 A popular version of history trumpets the United States as a diverse nation of immigrants welcome to all The truth however is that local communities have a long history of ambivalence toward new arrivals and minorities Persistent patterns of segregation by race and income still exist in housing and schools along with a growing emphasis on rapid metropolitan development sprawl that encourages upwardly mobile families to abandon older communities and their problems This dual pattern is becoming increasingly important as America grows more diverse than ever and economic inequality increases Two recent trends compel new attention to these issues First the geography of race and class represents a crucial litmus test for the new regionalism the political movement to address the linked fortunes of cities and suburbs Second housing has all but disappeared as a major social policy issue over the past two decades This timely book shows how unequal housing choices and sprawling development create an unequal geography of opportunity It emerges from a project

sponsored by the Civil Rights Project at Harvard University in collaboration with the Joint Center for Housing Studies and the Brookings Institution The contributors policy analysts political observers social scientists and urban planners document key patterns their consequences and how we can respond taking a hard look at both successes and failures of the past Place still matters perhaps more than ever High levels of segregation shape education and job opportunity crime and insecurity and long term economic prospects These problems cannot be addressed effectively if society assumes that segregation will take care of itself Contributors include William Apgar Harvard University Judith Bell PolicyLink Angela Glover Blackwell PolicyLink Allegra Calder Harvard Karen Chapple Cal Berkeley Camille Charles Penn Mary Cunningham Urban Institute Casey Dawkins Virginia *Diversity and Disparities* John Logan, 2014-11-01 The United States is more diverse than ever before Increased immigration has added to a vibrant cultural fabric and women and minorities have made significant strides in overcoming overt discrimination At the same time economic inequality has increased significantly in recent decades and the Great Recession substantially weakened the economic standing not only of the poor but also of the middle class *Diversity and Disparities* edited by sociologist John Logan assembles impressive new studies that interpret the social and economic changes in the United States over the last decade The authors leading social scientists from many disciplines analyze changes in the labor market family structure immigration and race They find that while America has grown more diverse the opportunities available to disadvantaged groups have become more unequal Drawing on detailed data from the decennial census the American Community Survey and other sources the authors chart the growing diversity and the deepening disparities among different groups in the United States Harry J Holzer and Marek Hlavac document that although the economy always rises and falls over the business cycle the Great Recession of 2007 2009 was a catastrophic event that saw record levels of unemployment especially among less educated workers young people and minorities Emily Rosenbaum shows how the Great Recession amplified disparities in access to home ownership and demonstrates that young adults especially African Americans are falling behind previous cohorts not only in home ownership and wealth but even in starting their own families and households Sean F Reardon and Kendra Bischoff explore the rise of class segregation as higher income Americans are moving away from others into separate and privileged neighborhoods and communities Immigration has also seen class polarization with an increase in both highly skilled workers and undocumented immigrants As Frank D Bean and his colleagues show the lack of a path to legal status for undocumented immigrants inhibits the educational and economic opportunities for their children and grandchildren Barrett Lee and colleagues demonstrate that the nation and most cities and towns are becoming more diverse by race and ethnicity However while black white segregation is slowly falling Hispanics and Asians remain as segregated today as they were in 1980 *Diversity and Disparities* raises concerns about the extent of socioeconomic immobility in the United States today This volume provides valuable information for policymakers journalists and researchers seeking to understand the current state of the nation
