Rediscovering Freedom:

Rediscovering a Lost Freedom Patrick Garry, 2017-07-12 Since ratification of the First Amendment in the late eighteenth century there has been a sea change in American life. When the amendment was ratified individuals were almost completely free of unwanted speech but today they are besieged by it. Indeed the First Amendment has for all practical purposes been commandeered by the media to justify intrusions of offensive speech into private life. In its application the First Amendment has become one-sided. Even though America is virtually drowning in speech the First Amendment only applies to the speaker's delivery of speech. Left out of consideration is the one participant in the communications process who is the most vulnerable and least protected: the helpless recipient of offensive speech. In *Rediscovering a Lost Freedom* Patrick Garry addresses what he sees as the most pressing speech problem of the twenty-first century: an often irresponsible media using the First Amendment as a shield behind which to hide its socially corrosive speech. To Garry the First Amendment should protect the communicative process as a whole. And for this process to be free and open, listeners should have as much right to be free from unwanted speech as speakers do of not being thrown in jail for uttering unpopular ideas. *Rediscovering a Lost Freedom* seeks to modernize the First Amendment. With other constitutional rights, changed circumstances have prompted changes in the law. Restrictions on political advertising seek to combat the perceived influences of big money; the Second Amendment right to bear arms, due to the prevalence of violence in America, has been curtailed; and the Equal Protection clause has been altered to permit affirmative action programs aimed at certain racial and ethnic groups. But when it comes to the flood of violent and vulgar media speech, there has been no change in First Amendment doctrines. This work proposes a government-facilitated private right to censor. Redisco *Rediscovering Freedom* John Lester, Pierre

Spoerri, 1992 **Rediscovering Values** Hugh Mercer Curtler, 2016-06-16 The author's primary purpose in this short book is to clearly define the nature of value and restore it to a central place in discussions of ethical and aesthetic problems. He begins the book with a broad cultural perspective on the issue of postmodernism in general, then takes a closer look at recent attempts to reduce values to evaluation to deny their objectivity. The central chapter focuses on the question "What Is Value?" after which Curtler discusses values in the fine arts and literature, concluding with the question of values in education.

Rediscovering America's Sacred Ground Barbara A. McGraw, 2012-02-01 Returning to the ideas of John Locke and the Founders themselves, Barbara A. McGraw examines the debate about the role of religion in American public life and unravels the confounded rhetoric on all sides. She reveals that no group has been standing on proper ground and that all sides have misused terminology: religion, secular, dichotomies, public, private, and concepts, separation of church and state, in ways that have little relevance to the original intentions of the Founders. She rediscovers a theology underlying the founding documents of the nation that is neither anyone's particular religion nor one requiring religion. Instead, it justifies freedom of conscience for all and provides a two-tiered public forum: a civic public forum and a conscientious public forum for the debate itself and

the actions that debate inspires America's Sacred Ground this theology and its public forum determines the meaning of freedom and the ways in which Americans can pursue the good good government good communities good families good relations between individuals and good individuals from a plurality of perspectives By exploring our past McGraw answers the critical question Who are we as a people and what do we stand for *Rediscovering the West* Stephen C.

Historical Dictionary of Heidegger's Philosophy Frank Schalow, Alfred Denker, 2010-08-20. By the time Martin Heidegger passed away on May 26th, 1976, he had become the most important and controversial philosopher of his age. While many of his former students had become important philosophers and thinkers in their own right, Heidegger also inspired countless others like Jacques Derrida, Michel Foucault, and Jean-Paul Sartre. The second edition of the *Historical Dictionary of Heidegger's Philosophy* is an historical perspective on the development of Heidegger's thought in all its nuances and facets. Schalow and Denker cast light on the historical influences that shaped the thinker and his time through a chronology, an introductory essay, a bibliography, appendixes that include German and Greek to English glossaries of terms, and a complete listing of Heidegger's writings, lectures, courses, and seminars, and a cross-referenced dictionary section offering over 600 entries on concepts, people, works, and technical terms. This volume is an invaluable resource for student and scholar alike.

Moving Towards Low Carbon Mobility Moshe Givoni, David Banister, 2013-01-01. For a thorough and thoughtful perspective on what it will take to decarbonize cities of the future, this book is a must-read. Technology alone, we are told, will not create the post-carbon city. As important as coming to grips with a complex web of cultural, institutional, financial, and social factors that powerfully shape mobility choices now and in the future, a balanced, holistic approach that reveals how the many elements of contemporary transport systems work together offers the best hope for achieving more sustainable, less carbon-intensive mobility futures. Robert Cervero, University of California, Berkeley, US. This is not just another book about transport and climate change. It sensibly places transport within the much broader concept of mobility and explores all aspects of travel behaviour of people and goods and the infrastructure needs to serve these, leading to a balanced set of policy proposals. This volume, compiled by an internationally eminent team of researchers, is essential reading for all those wanting a balanced and objective analysis of this critical topic. Roger Vickerman, University of Kent, UK. A unique assemblage of papers by top international experts that together cover every aspect of the

transport mobility environment relationship today's central issue for transport planners worldwide Sir Peter Hall University College London UCL UK The transport sector has been singularly unsuccessful in becoming low carbon and less resource intensive This book takes an innovative and holistic social cultural and behavioural perspective as well as covering the more conventional economic and technological dimensions to provide a more complete understanding of the mobility and transport system and its progress towards high carbon mobility The book uses this platform to explore the means to achieve low carbon mobility through outlining alternative pathways through an investigation of theories of change and through alternative visions of the low carbon transport city The book's core message is that the complexity of the mobility and transport system should not encourage inaction but strong and immediate action In addition to implementing a wide range of policy measures the book argues for a fundamental change in thinking when it comes to transport policy governance and analysis approaches before low carbon mobility becomes a reality Bringing together the latest thinking on transport mobility and the environment this book will appeal to researchers and students interested in sustainability issues and sustainable transport and transport related areas in particular including policy makers as well as a more general professional audience
