green spaces that challenge traditional ideas about what constitutes a garden. They examine the changing attitude toward nature as something to be dominated or embraced, ordered or allowed to range freely, exploited or conserved. Examples of the highly prescribed hortus conclusus or enclosed spaces of the Middle Ages are found in the Italian Renaissance gardens and the symmetries of Versailles and Les Tuileries. After the rise of Romanticism in the late eighteenth century, English gardeners such as William Kent and Capability Brown embraced the concept that nature should prevail over man's manipulation of it and created gardens that broke through traditional enclosures. A century later, while the American West witnessed both the conquering spirit of the homesteaders and the first stirrings of the conservation movement, urban parks and gardens were created as oases to which all people had access. The book concludes with a look at contemporary gardens where efforts to reclaim landscapes and repurpose crumbling infrastructure are taking place within an atmosphere of ecological sensitivity, appreciating the idea that the whole planet is a garden and all who live in it are gardeners.

Eyes of the Nation Vincent Virga, Alan Brinkley, Library of Congress, 2004. A magnificent one-volume pictorial and narrative history of the United States with more than five hundred exceptional illustrations, many reproduced here for the first time.

[The Reason for Flowers](#) Stephen Buchmann, 2015-07-21. Library Journal, 1965-04

Botanophilia in Eighteenth-Century France R.L. Williams, 2013-03-09. The book describes the innovations that enabled botany in the Eighteenth century to emerge as an independent science, independent from medicine and herbalism. This encompassed the development of a reliable system for plant classification and the invention of a nomenclature that could be universally applied and understood. The key that enabled Linnaeus to devise his classification system was the discovery of the sexuality of plants. The book, which is intended for the educated general reader, proceeds to illustrate how many aspects of French life were permeated by this revolution in botany between about 1760 to 1815, a botanophilia sometimes inflated into botanomania. The reader should emerge with a clearer understanding of what the Enlightenment actually was, in contrast to some popular second-hand ideas today.
