Reducing Risks For Mental Disorders Frontiers For Preventive Intervention Research:

Reducing Risks for Mental Disorders Institute of Medicine, Committee on Prevention of Mental Disorders, 1994-01-01
The understanding of how to reduce risk factors for mental disorders has expanded remarkably as a result of recent scientific advances. This study, mandated by Congress, reviews those advances in the context of current research and provides a targeted definition of prevention and a conceptual framework that emphasizes risk reduction. Highlighting opportunities for and barriers to interventions, the book draws on successful models for the prevention of cardiovascular disease, injuries, and smoking. In addition, it reviews the risk factors associated with Alzheimer's disease, schizophrenia, alcohol abuse, and dependence, depressive disorders, and conduct disorders, and evaluates current illustrative prevention programs. The models and examination provide a framework for the design, application, and evaluation of interventions intended to prevent mental disorders and the transfer of knowledge about prevention from research to clinical practice. The book presents a focused research agenda with recommendations on how to develop effective intervention programs, create a cadre of prevention researchers, and improve coordination among federal agencies.

Evidence-Based Interventions for Students with Learning and Behavioral Challenges Richard J. Morris, Nancy Mather, 2008-01-14
This book assembles into one volume summaries of school-based intervention research that relates to those who deal on a regular basis with the growing body of students having high incidence learning disabilities and/or behavior disorders, special educators, school psychologists, and clinical child psychologists. Chapter authors begin with an overview of their topic, followed by a brief section on historical perspectives, before moving on to the main section: a critical discussion of empirically based intervention procedures. In those instances where evidence-based prescriptions can legitimately be made, authors discuss best practices and the conditions (e.g., classroom environment, teacher expertise) under which these practices are most effective. A final

section deals with policy issues **The SAGE Handbook of Drug & Alcohol Studies** Torsten Kolind, Betsy Thom, Geoffrey Hunt, 2016-10-20 With contributions from leading international academics across the social sciences this accessible handbook takes a critical look at the key theories disciplinary approaches contemporary issues and debates in the field Part I Central Social Science Theories Drug and Alcohol Studies Part II Pillars in Social Science Drug and Alcohol Studies Part III Controversies and New Approaches in Social Science Drug and Alcohol Studies This Handbook is an excellent reference text for the growing number of academics students scientists and practitioners in the drug and alcohol studies community

Plenary Papers of the 1999 Conference on Criminal Justice Research and Evaluation--enhancing Policy and Practice Through Research: Preventing school violence, 1999 Foreword This year's annual conference on criminal justice research and evaluation is a milestone of sorts Some 30 years ago the President's Commission on Law Enforcement and Administration of Justice noted with alacrity that the revolution of scientific discovery had largely bypassed the problems of crime and crime control The method of objective analysis that had been used with stunning success to raise living standards help people live healthier lives and explore the heavens had unaccountably failed to be applied to one of the era's most pressing problems To the great good fortune of succeeding generations the Commission in its wisdom recommended creation of a Federal research agency dedicated to the scientific study of crime and criminal justice with the aim of informing and aiding the work of practitioners The National Institute of Justice the agency established by Congress to carry out that mission has for the past three decades been seeing the returns on that investment multiply Criminology has become a respected field of scholarly inquiry and we have built an impressive body of knowledge that has helped us better understand criminal behavior and the justice system More important the results of scholarly inquiries have been and are being applied to the day to day operations of law enforcement corrections the courts and other elements of the justice system In the conference which revisited the Commission with the theme Enhancing Policy and Practice Through Research we saw how the investment continues to yield returns The plenary sessions in particular emphasized praxis research put to the service of real world situations Because of the distinctiveness of this year's plenary panels we decided to publish them in three separate volumes viewing crime from the street level addressing school violence through research based policy developed through an interdisciplinary approach and understanding the involvement of women and girls in the criminal justice system Sudhir Venkatesh and Richard Curtis bring the ethnographer's perspective to the analysis of street crime analyzing respectively the financial activity of gangs and recent trends in drug dealing Their method distinct from that of conventional quantitative social science calls for intensive observation over long periods and involves the quest for what is a iv specific to single places and times and what is generalizable The close up street level observations of study subjects offer singular insights for practitioners who deal with these individuals as offenders In this panel we also benefited from the perspective of Charles Ramsey Chief of the Metropolitan Police Department Washington D C His indication that drug trafficking and gang crime

persist in his jurisdiction despite the overall drop in crime offers proof of the ethnographer's caution against facile generalization. This year marks the first time the program offices of the Office of Justice Programs OJP the Corrections Program Office the Drug Courts Program Office the Executive Office for Weed and Seed and the Violence Against Women Office have joined the OJP bureaus as conference sponsors. Because these offices work so closely with the practitioner community I feel their sponsorship is an added expression of their commitment to research. I think they would endorse Chief Ramsey's succinct assessment of the role of research in affecting crime levels in the years to come as bringing to light findings useful for fashioning real world solutions. The best way to predict the future the Chief said is to help create it. Those who wish to read more can find abstracts of the conference sessions on the World Wide Web at <http://www.ilj.org>. Defining Prevention Science Zili Sloboda, Hanno Petras, 2014-07-08. Whoever coined the adage an ounce of prevention is worth a pound of cure could not have known how important this adage would become. The challenge of altering the health trajectories of poor lifestyle decisions for such behaviors as smoking, drinking, and using illicit drugs, violence, dropping out of school, engagement in risky sexual behaviors, and crime through prevention research has led to a new discipline: prevention science. *Defining Prevention Science* covers this emerging field of science: its goals, its conceptual and theoretical foundations, its methods, and especially its utility. Not content to simply differentiate the field from its close allies—epidemiology, psychology, neuroscience, sociology, economics—the text explains how these many disciplines enhance each other at both research and intervention levels and how prevention science draws on these biological, behavioral, and social sciences to create an innovative knowledge base that has provided cost-effective, evidence-based prevention interventions and policies. To this end, familiar developmental benchmarks are recast in prevention health promotion context, from the crucial importance of adolescence in encountering and deterring high-risk behaviors to the risks and resiliencies of single mother families. An international group of contributors offers current findings, up-to-date methods for effective evidence-based interventions, and improvements in research technologies in these key areas: Physical, cognitive, and emotional

vulnerability across the life course The roles of developmental influences in prevention Intervention development delivery and implementation Bringing the intervention approach to research design New directions in analytic methods Cost analysis and policy implications Advances in Prevention Science Defining Prevention Science aims to inspire further refinements in the field and encourage communication among researchers in its own and related disciplines including public health epidemiology psychology and criminology This is the first volume in the series Advances in Prevention Science that provides the framework for other volume that will focus on such issues as Prevention Science in School Settings Complex Relationships and Processes Preventing Crime and Violence and The Prevention of Substance Use **Preventing**
