**Evidence and Innovation in Housing Law and Policy** Lee Anne Fennell, Benjamin J. Keys, 2017-08-29

No area of law and policy is more central to our well being than housing yet research on the topic is too often produced in disciplinary or methodological silos that fail to connect to policy on the ground This pathbreaking book which features leading scholars from a range of academic fields cuts across disciplines to forge new connections in the discourse In accessible prose filled with cutting edge ideas these scholars address topics ranging from the recent financial crisis to discrimination and gentrification and show how housing law and policy impacts household wealth financial markets urban landscapes and local communities Together they harness evidence and theory to capture the state of play in housing generating insights that will be relevant to academics and policymakers alike This title is also available as Open Access

[Community, Home, and Identity](#) Terry L. Turnipseed, 2016-05-23

Community home and identity are concepts that have concerned scholars in a variety of fields for some time Legal scholars sociologists anthropologists psychologists and economists among others have studied the impacts of home and community on one's identity and how one's identity is manifested in one's home and in one's community This volume brings together some of the leading thinkers about the connections between community home and identity Several chapters address how the law

and lawyers contribute or detract from the creation and maintenance of community and in some cases the conscious destruction of communities Others examine the protection of individual and group identities through rules related to property title and use of such things as Home and identity property      *Gentrification in Neighbourhood Development* Yvonne Franz, 2015 English summary This book aims at a comprehensive understanding of diverging urban rejuvenation practices and gentrification processes in New York City Berlin and Vienna Regulatory and supportive mechanisms at policy and planning level have been identified through a comparative analysis of urban rejuvenation policies and actors embeddedness Those mechanisms enable the development of contextualised parameters that support projection attempts of future gentrification processes at the neighbourhood level As a result a reflective understanding of gentrification and policy recommendations are drawn at a general level The recommendations refer to the political understanding of gentrification and its role in urban development This analysis argues that cities should include gentrification as a driving force in urban policies However processes of gentrification require mediation and monitoring by public authorities who should be aware of the risk of social fragmentation As a consequence cities should move towards a social entrepreneurial city that moves beyond the simple distribution of financial resources and responsibilities and ensures social responsibility within the force field of ongoing neoliberal forces German description Diese Publikation zielt auf ein umfassendes Verstandnis unterschiedlicher Stadterneuerungspraktiken die sich auf die Erhaltung der baulichen Substanz beziehen sowie Gentrification Prozesse in New York City Berlin und Wien ab Dabei wird eine vergleichende Analyse von politischen Strategien und involvierten AkteurInnen angewendet um regulierende und unterstützende Mechanismen auf der politischen und stadtplanerischen Ebene zu identifizieren Diese Mechanismen ermöglichen die Entwicklung von kontextualisierten Parametern Als Ergebnis dienen eine reflektierte Betrachtung von Gentrification und Empfehlungen die auf einer stadübergreifenden Ebene Entwicklungsleitlinien für den politischen Umgang mit Gentrification und dessen Rolle in der Stadtentwicklung aufzeigen

**A History of Housing in New York City** Richard Plunz, 2016-10-18 Since its emergence in the mid nineteenth century as the nation's metropolis New York has faced the most challenging housing problems of any American city but it has also led the nation in innovation and reform The horrors of the tenement were perfected in New York at the same time that the very rich were building palaces along Fifth Avenue public housing for the poor originated in New York as did government subsidies for middle class housing A standard in the field since its publication in 1992 *A History of Housing in New York City* traces New York's housing development from 1850 to the present in text and profuse illustrations Richard Plunz explores the housing of all classes with comparative discussion of the development of types ranging from the single family house to the high rise apartment tower His analysis is placed within the context of the broader political and cultural development of New York City This revised edition extends the scope of the book into the city's recent history adding three decades to the study covering the recent housing bubble crisis the rebound and gentrification of the five boroughs and the ecological issues facing

the next generation of New Yorkers More than 300 illustrations are integrated throughout the text depicting housing plans neighborhood changes and city architecture over the past 130 years This new edition also features a foreword by the distinguished urban historian Kenneth T Jackson

**The Affordable Housing Reader** J. Rosie Tighe,Elizabeth J. **The Concrete Dragon** Thomas J. Campanella,2012-03-20 China is the most rapidly urbanizing nation in the world with an urban population that may well reach one billion within a generation Over the past 25 years surging economic growth has propelled a construction boom unlike anything the world has ever seen radically transforming both city and countryside in its wake The speed and scale of China s urban revolution challenges nearly all our expectations

about architecture urbanism and city planning China's ambition to be a major player on the global stage is written on the skylines of every major city This is a nation on the rise and it is building for the record books China is now home to some of the world's tallest skyscrapers and biggest shopping malls the longest bridges and largest airport the most expansive theme parks and gated communities and even the world's largest skateboard park And by 2020 China's national network of expressways will exceed in length even the American interstate highway system China's construction industry employing a workforce equal to the population of California has been erecting billions of square feet of housing and office space every year But such extensive development has also meant demolition on a scale unprecedented in the peacetime history of the world Nearly all of Beijing's centuries old cityscape has been bulldozed in recent years and redevelopment in Shanghai has displaced more families than 30 years of urban renewal in the United States China's cities are also rapidly sprawling across the landscape churning precious farmland into a landscape of superblock housing estates and single family subdivisions laced with highways and big box malls In a mere generation China's cities have undergone a metamorphosis that took 150 years to complete in the United States The Concrete Dragon China's Urban Revolution and What it Means for the World sheds light on this extraordinary chapter in world urban history The book surveys the driving forces behind the great Chinese building boom traces the historical precedents and global flows of ideas and information that are fusing to create a bold new Chinese cityscape and considers the social and environmental impacts of China's urban future The Concrete Dragon provides a critical overview of contemporary Chinese urbanization in light of both China's past as well as earlier episodes of rapid urban development elsewhere in the world especially that of the United States a nation that itself once set global records for the speed and scale of its urban ambitions

**Housing Market Response to Sea-Level Rise in Florida** Risa Palm, Toby Bolsen, 2021-11-17 South Florida continues to attract new residents despite its susceptibility to sea level rise This book explores the views of real estate agent with respect to how prospective homebuyers assess the risk of flooding It reports on their observations as to whether house prices are stagnant or falling in coastal areas vulnerable to flooding and their conclusions after working with prospective homebuyers as to whether coastal south Florida is a good place to find a home or alternatively a risky investment in a place that will eventually be submerged by rising seas The book reports on a 2020 survey of real estate agents and concludes that it is not clear that the housing market has integrated flood risk either into reduced demand for housing or in reduced prices

for houses susceptible to flooding These conclusions have important implications for understanding how the risks of climate change and sea level rise are reflected in the housing market both now and in the near term future **Post-Disaster**

**Reconstruction of the Built Environment** Dilanthi Amaratunga, Richard Haigh, 2011-06-13 Disasters threaten all parts of the world and they appear to be increasing in frequency scale and intensity Despite huge improvements in the emergency response permanent reconstruction is often uncoordinated inefficiently managed and slow to begin International agencies are geared to an efficient response in terms of humanitarian relief but they are not well versed in the requirements of long term reconstruction which is often constrained by lack of planning and poorly coordinated management The construction industry is typically engaged in a range of critical activities after a disaster including provision of temporary shelter in the immediate aftermath and restoration of permanent shelter and public infrastructure once the immediate humanitarian needs have been attended to Post Disaster Reconstruction of the Built Environment identifies the challenges that face the industry and highlights best practice to enable the construction industry to address those problems which make an effective response to these unexpected events difficult Written by an international team of experts this book will help researchers and advanced students of construction understand the problems faced by communities and the construction industry when faced with a natural or man made disaster and identify the planning and management processes required by the industry to mount an effective response Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1986

Congress. House. Committee on Appropriations.

Subcommittee on Transportation, Housing and Urban Development, and Related Agencies, 2007 **World Development Report 2009** World Bank, 2008-11-04 Rising densities of human settlements migration and transport to reduce distances to market and specialization and trade facilitated by fewer international divisions are central to economic development The transformations along these three dimensions density distance and division are most noticeable in North America Western Europe and Japan but countries in Asia and Eastern Europe are changing in ways similar in scope and speed World Development Report 2009 Reshaping Economic Geography concludes that these spatial transformations are essential and should be encouraged The conclusion is not without controversy Slum dwellers now number a billion but the rush to cities continues Globalization is believed to benefit many but not the billion people living in lagging areas of developing nations High poverty and mortality persist among the world s bottom billion while others grow wealthier and live longer lives Concern for these three billion often comes with the prescription that growth must be made spatially balanced The WDR has

a different message economic growth is seldom balanced and efforts to spread it out prematurely will jeopardize progress The Report documents how production becomes more concentrated spatially as economies grow proposes economic integration as the principle for promoting successful spatial transformations revisits the debates on urbanization territorial development and regional integration and shows how today's developers can reshape economic geography

**A History of Financial Crises** Cihan Bilginsoy, 2014-11-27 Once in a lifetime financial crises have been a recurrent part of life in the last three decades It is no longer possible to dismiss or ignore them as aberrations in an otherwise well functioning system Nor are they peculiar to recent times Going back in history asset price bubbles and bank runs have been an endemic feature of the capitalist system over the last four centuries The historical record offers a treasure trove of experience that may shed light on how and why financial crises happen and what can be done to avoid them provided we are willing to learn from history This book interweaves historical accounts with competing economic crisis theories and reveals why commentaries are often contradictory First it presents a series of episodes from tulip mania in the 17th century to the subprime mortgage meltdown In order to tease out their commonalities and differences it describes political economic and social backgrounds identifies the primary actors and institutions and explores the mechanisms behind the asset price bubbles crashes and bank runs Second it starts with basic economic concepts and builds five competing theoretical approaches to understanding financial crises Competing theoretical standpoints offer different interpretations of the same event and draw dissimilar policy implications This book analyses divergent interpretations of the historical record in relation to how markets function the significance of market imperfections economic decision making process the role of the government and evolutionary dynamics of the capitalist system Its diverse theoretical and historical content of this book complements economics history and political science curriculum
