Houghton, 2024-11-05 Offers the most comprehensive analysis and discussion of medievalist computer games to date Games with a medieval setting are commercially lucrative and reach a truly massive audience Moreover they can engage their players in a manner that is not only different but in certain aspects more profound than traditional literary or cinematic forms of medievalism However although it is important to understand the versions of the Middle Ages presented by these games how players engage with these medievalist worlds and why particular representational trends emerge in this most modern medium there has hitherto been little scholarship devoted to them This book explores the distinct nature of medievalism in digital games across a range of themes from the portrayal of grotesque yet romantic conflict to conflicting depictions of the Church and religion It likewise considers the distinctions between medievalist games and those of other

periods underlining their emphasis on fantasy roleplay and hardcore elements and their consequences for depictions of morality race gender and sexuality Ultimately the book argues that while medievalist games are thoroughly influenced by medievalist and ludic tropes they are nonetheless representative of a distinct new form of medievalism It engages with the vast literature surrounding historical game studies game design and medievalism and considers hundreds of games from across genres from Assassin s Creed and Baldur s Gate to Crusader Kings and The Witcher series In doing so it provides a vital illustration of the state of the field and a cornerstone for future research and teaching

**Death, Time and Mortality in the Later Novels of Don DeLillo** Philipp Wolf,2022-05-30 This book offers the first systematic study of death in the later novels of Don DeLillo It focuses on Underworld to The Silence along with his 1984 novel White Noise in which the fear of death dominates the protagonists most hauntingly The study covers eight novels which mark the development of one of the most philosophical and prestigious novelists writing in English Death in its close relation to time temporality and transience has been an ongoing subject or motif in Don DeLillo s oeuvre His later work is shot through with the cultural and sociopsychological symptoms and responses death elicits His reflection on dying revolves around defensive mechanisms and destruction fantasies immortalism and cryonics covert and overt surrogates consumerism and media and the mortification of the body His characters give themselves to mourning and are afflicted with psychosis depression and the looming of emptiness Yet writing about death also means facing the ambiguity and failing representability of death The book considers DeLillo s use of language in which temporality and something like death may become manifest It deals with the transfiguration of time and death into art with apocalypse as a central and recurring subject and as a kind of antithesis epiphany The study eventually proposes some reflections on the meaning of death in an age fully contingent on media and technology and dominated by financial capitalism and consumerism Despite all the distractions death remains a sinister presence which has beset the minds not only of DeLillo s protagonists
