Reexamining Democracy Essays In Honor Of Seymour Martin Lipset:

Reexamining Democracy Gary Marks, Larry Jay Diamond, 1992-07 Seymour Martin Lipset is one of the best known and most prolific social scientists this century. These comprehensive essays pay tribute to his scholarship by exploring his core theme: the conditions, problems, dynamics, values, and institutions of democracy both in the US and throughout the world. Published originally as a Special Issue of *The American Behavioral Scientist*, *Reexamining Democracy* is devoted to rethinking the character and development of democracy worldwide. The contributors offer fascinating perspectives on an ever potent and compelling social force.

The Democracy Sourcebook Robert A. Dahl, Ian Shapiro, Jose Antonio Cheibub, 2003-08-15 The *Democracy Sourcebook* offers a collection of classic writings and contemporary scholarship on democracy, creating a book that can be used by undergraduate and graduate students in a wide variety of courses including American politics, international relations, comparative politics, and political philosophy. The editors have chosen substantial excerpts from the essential theorists of the past, including Jean Jacques Rousseau, John Stuart Mill, Alexis de Tocqueville, and the authors of *The Federalist Papers*; they place them side by side with the work of such influential modern scholars as Joseph Schumpeter, Adam Przeworski, Seymour Martin Lipset, Samuel P. Huntington, Ronald Dworkin, and Amartya Sen. The book is divided into nine self-contained chapters: **Defining Democracy**, which discusses procedural, deliberative, and substantive democracy; **Sources of Democracy**, on why democracy exists in some countries and not in others; **Democracy, Culture, and Society**, about cultural and sociological preconditions for democracy; **Democracy and Constitutionalism**, which focuses on the importance of independent courts and a bill of rights; **Presidentialism versus Parliamentarianism**, representing which is the fairest system of democratic accountability; **Interest Groups and Democracy's Effects**, an examination of the effect of democracy on economic growth and social inequality; and finally **Democracy and the Global Order**, which discusses the effects of democracy on international relations, including the propensity for war and the erosion of national sovereignty by transnational forces.

The Dynamics of Democratization Nathan J. Brown, 2011-07-01 The explosive spread of democracy has radically transformed the international political landscape and captured the attention of academics, policy makers, and activists alike. With interest in democratization still growing, Nathan J. Brown and other leading political scientists assess the current state of the field, reflecting on the causes and diffusion of democracy over the past two decades. The volume focuses on three issues very much at the heart of discussions about democracy today: dictatorship, development, and diffusion. The essays first explore the surprising but necessary relationship between democracy and authoritarianism; they next analyze the introduction of democracy in developing countries; last, they examine how international factors affect the democratization process. In exploring these key issues, the contributors ask themselves three questions: What causes a democracy to emerge and succeed? Does democracy make things better? Can democracy be successfully promoted? In contemplating these questions, *The Dynamics of Democratization* offers a frank and critical assessment of the field for students and scholars of comparative

Reproductive Health and Gender Equality Guang-zhen Wang, 2016-04-08 Since the late 1990s approaches to women's reproductive health has shifted from a service based model to a human rights approach This approach associates reproductive health with freedom from discrimination and enjoyment of a satisfying and safe sex life and full access to information and services related to reproduction In spite of this shift and the global effort to promote women's reproductive health through the enhancement of human rights and gender equality progress has been very slow In this book the author fills a much needed empirical study of women's reproductive health The author assesses data from 137 developing countries or areas and challenges the prevailing bioscience and public health models by linking women's reproductive health to gender equality measures and development policies Discussion on abortion rights regional variations and reproductive health needs among refugees and internally displaced persons are also discussed This is a timely study which provides a theoretical and social policy basis for monitoring and improving women's reproductive health in developing countries This is particularly important in the light of insufficient research in the field and a lack of analysis on the empirical and theoretical linkages between reproductive health and gender equality The book will be of interest to researchers professionals and students interested in women's health issues gender women's studies and human rights

Democratization in Morocco Lise Storm, 2007-10-29 This book explores the political games of the Moroccan democratization process in the period from independence in 1956 until 2006 By combining a great degree of political theory with empirical material on Morocco it analyzes the strategies and actions of the various political actors and evaluates the level of democracy present in the country after the adoption of new constitutions in 1962 1970 1972 1980 1992 and 1996 Lise Storm demonstrates that in at least some instances democratization has been more than simply a survival strategy every so often key figures within the political elite have taken the democratization process further than strictly needed for them to stay in power In the case of Morocco it has been the monarch who on more than one occasion has moved the country further towards the democratic ideal than he necessarily had to and that sometimes even against the wishes of one or more of the established political parties This book illustrates how the Moroccan political parties like so many

of their counterparts in the region have become the main obstacle to further democratization as most of them have never honoured or appear to have abandoned the key function of political parties popular representation Democratization in Morocco will be a very valuable contribution to students and researchers interested in the dynamics behind the Moroccan democratization and the role of electoral politics in North African and Middle Eastern politics 21st Century Political Science: A Reference Handbook John T Ishiyama, Marijke Breuning, 2011 Offering full coverage of major subthemes and subfields within political science this reference handbook includes entries on topics from theory and methodology to international relations and institutions *Lipset's Agrarian Socialism* David E. Smith, 2007 Reflecting on the seminal work of Seymour Martin Lipset *Agrarian Socialism The Cooperative Commonwealth Federation in Saskatchewan A Study in Political Sociology* academics and political practitioners revisit these questions and consider whether the reputation of the best known social science text on Saskatchewan still holds As the political practitioners make clear the geographic and constitutional boundaries may remain as they were but the economic and cultural boundaries that once defined provinces have manifestly altered if not disappeared as a result of technological change and global perspective **BOOK JACKET** *The Coming Age of Scarcity* Michael N. Dobkowski, Isidor Wallimann, 1998-03-01 Michael Dobkowski and Isidor Walliman have edited a book that although ominous is not a fatalistic look at the future *The Coming Age of Scarcity* lays out the perils of not recognizing the reality of genocide or of acknowledging the full implications of warfare Showing how scarcity and surplus populations can lead to disaster *The Coming Age of Scarcity* is about evil It tells of ethnic cleansing and excavates the world's expanding killing fields The writers in this volume are all too aware that the future suggests that present day population growth land resources energy consumption and per capita consumption cannot be sustained without leading to greater catastrophes The essays in this volume ask What is the solution in the face of mass death and genocide As philosopher John K Roth says in the Foreword The essays can sensitize us against despair and indifference because history shows that human made mass death and genocide are not inevitable and no events related to them will ever be **Globalization - The Juggernaut of the 21st Century** Jan-Erik Lane, 2016-04-22 While some people debate whether globalization really exists it proceeds apace affecting all societies It presents us with unknown challenges and as governments start to discuss what to do about these challenges it is becoming obvious that globalization is not manageable With globalization the juggernaut of the 21st century all countries of the world become interdependent in relation to the coming energy crisis climate change the sharper cleavages between rich and poor countries and people and the emergence of a multicultural social structure This interesting and erudite book adopts a distinctive approach to the multiple dimensions of the globalization debate The impressive coverage of philosophical thought including Popper Weber Habermas Lipset and Hobbes makes a valuable contribution to the debates on globalization **The Arab Spring** Jason Brownlee, Tarek E. Masoud, Andrew Reynolds, 2015 Several years after the Arab Spring began democracy remains elusive in the Middle East While Tunisia has made progress towards democracy other countries that

the underpinnings of rational choice analyses of electoral competition as well as the misapplication of standard party models as the catch all party. Several chapters reexamine existing models of parties and party typologies particularly with regard to the capacity of commonly used concepts to capture the wide variation among parties that exist in old and new democracies today and with regard to their ability to deal adequately with the new challenges that parties are facing in rapidly changing political social and technological environments. In particular two detailed case studies demonstrate how party models are significant not only as frameworks for scholarly research but also insofar as they can affect party performance. Other chapters also examine in detail how corruption and party patronage have contributed to party decline as well as the public attitudes towards parties in several countries. In the aggregate the various contributions to this volume reject the notion that a decline of party has progressed to such an extent as to threaten the survival of parties as the crucial intermediary actors in modern democracies. The contributing authors argue however that parties are facing a new set of sometimes demanding challenges. Not only have parties differed significantly in their ability to successfully meet these challenges but the core concepts typologies party models and methodological approaches that have guided research in this area over the past 40 years have met with only mixed success in adequately capturing these recent developments and serving as fruitful

frameworks for analysis. This book is intended to remedy some of these shortcomings.

Religion and Civil Society in Europe Joep de Hart, Paul Dekker, Loek Halman, 2013-07-15 Religion is back again in Europe after never having been gone. It is manifest in the revival of religious institutions and traditions in former communist countries in political controversies about the relationship between the churches and the state and about the freedom of religion and the freedom to criticize religion and in public unease about religious minorities. This book is about religion and civil society in Europe. It moves from general theoretical and normative approaches of this relationship via the examination of national patterns of religion state relations to in depth analyses of the impact of religion and secularization on the values pro social attitudes and civic engagement of individuals. It covers Europe from the Lutheran North to the Catholic South and from the secularized West to the Orthodox East and Islamic South East with comparative analyses and country studies concluding with an overall Europe USA comparison.
