

its extreme complexity, he believed that any new treatment, such as Dr. Bancroft's, must take into account the necessity for more accurate knowledge concerning the chemistry of the opium alkaloids; more reliable information as to their effect on the human body and the exact nature of addiction; together with a satisfactory evaluation of the many psychobiological factors involving addiction about which we have little accurate, concrete knowledge.

"So far as we know there is no treatment for drug addiction from the standpoint of a specific cure that will miraculously operate to rid the drug addicts of their addiction," Dr. Treadway said. "Any treatment advocated for this particular purpose must be scrutinized with care and conclusions about it drawn only after months of experience with a very large group of patients."

HUMANS 75,000 YEARS AGO DESCRIBED BY PRE-HISTORIAN

PROFESSOR GEORGE G. MACCUDY, Director of the American School of Prehistoric Research, Yale University, writes that the records bearing on the physical characters of Neanderthal man are still relatively rare. But in the past few years they have become much more complete than are those of the pre-Neanderthal period, when such beings as Eoanthropus, Pithecanthropus, Sinanthropus and Homo Heidelbergensis existed.

Neanderthal man lived in the third inter-glacial and the early part of the fourth glacial epoch. In his physical make-up he retained many primitive characters, due to his branching from the main human stem as early as the Pliocene epoch. His lowly estate physically is even reflected in his kit of tools. Although a hunter, he never got so far as to represent by means of carvings, engravings or drawings in color the animals he hunted. This step was taken by his successor, the so-called race of Cro-Magnon.

The cable received from Theodore D. McCown, field director of the Joint Expedition of the American School of Prehistoric Research and the British School of Archeology at Jerusalem, said: "Three adult Mousterians surely Neanderthal, heavy brow ridges, taurodont dentition." This is said to be the greatest discovery of Neanderthal remains ever found. They are at a moderate estimate at least 75,000 years old.

The present is the fourth season of joint expeditions by the British and American Schools near the foot of Mount Carmel, during which time scores of thousands of artifacts, dating from the Mousterian and subsequent epochs, have been unearthed.

ITEMS

CANCER, it is claimed, can be detected by a serum reaction discovered by Dr. H. J. Fuchs, of Berlin. The reaction is based on the fact that fibrin from the blood of a person without cancer is broken down or digested by the serum of the blood of a person with cancer, with the production of some non-protein, nitrogenous substances which can be detected by suitable chemical means. The method, as it was described by Dr. Fuchs, required special apparatus and some special training for the observer, which tend to prevent its general use.

Professor M. von Falkenhausen, of the University of Breslau, Germany, now reports a simplification of the method that may make it possible for other observers to test its validity. He has introduced into the reaction a colorimetric procedure which he states makes the method more exact and at the same time much simpler to carry out. He reports a series of eighty cases in which the reaction was used and in which there was not a single failure in the diagnosis.

THE light from a distant nebula, such as one in the constellation of Ursa Major, reaches the earth at the ordinary speed of about 186,000 miles a second, even though the nebula is apparently moving from the earth at a velocity of 11,500 kilometers per second. This fact was discovered last year by Dr. Gustaf Strömberg, of the Mount Wilson Observatory. It has been confirmed by independent work of Dr. George Van Biesbroeck, at the Yerkes Observatory, of the University of Chicago. Both Dr. Strömberg and Dr. Van Biesbroeck have found that the aberration with the rapidly receding nebula is just the same as for nearer stars, even ones that are approaching us.

A POSSIBLE reconciliation between the at present discrepant results of "ether drift" experiments has been presented to the American Physical Society by Dr. N. Galli-Shohat, of Bryn Mawr College. This famous experiment, known as the Michelson-Morley experiment for the men who first performed it, failed to show any positive evidence of the existence of an ether, and set a train of scientific investigations in motion that eventually led to Einstein's relativity theory. Later, Professor Dayton C. Miller, of the Case School of Applied Science, repeated the experiment, and reported positive results. Dr. Galli-Shohat claims to reconcile the disagreement by taking into account, not the earth's motion about the sun, but the motion of the whole solar system through space.

DR. W. J. HUMPHREYS, of the U. S. Weather Bureau, told the American Meteorological Society, meeting in Washington, that the melting of the great ice caps of the earth would raise the ocean level about 150 feet. Explorations of the past year, which determined by sonic sounding the average thickness of the great Greenland ice sheet to be about one mile, make possible a fairly accurate estimate of the height the oceans will rise. Dr. Humphreys said that there must be 4,000,000 cubic miles of ice on Greenland, the Antarctic continent and Iceland, which may be expected eventually to melt.

THE germs of typhus fever and of spotted fever are very much alike, but differ in the important respect of growing in different parts of the cells they invade, Dr. Henry Piskerton and Dr. G. M. Hass, of Boston, reported to the American Association of Pathologists and Bacteriologists. The spotted fever germs grow and multiply massively in the nucleus of the cells, but infect the surrounding part of the cell only sparsely, they found from studying how the germs grow on animal tissues. Typhus fever germs, on the other hand, do not invade the nuclei of cells, but grow on the cytoplasm.

References For The Historian Of Science Introduction

In the digital age, access to information has become easier than ever before. The ability to download References For The Historian Of Science has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download References For The Historian Of Science has opened up a world of possibilities. Downloading References For The Historian Of Science provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading References For The Historian Of Science has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download References For The Historian Of Science. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading References For The Historian Of Science. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading References For The Historian Of Science, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download References For The Historian Of Science has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About References For The Historian Of Science Books

What is a References For The Historian Of Science PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a References For The Historian Of Science PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a References For The Historian Of Science PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a References For The Historian Of Science PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a References For The Historian Of Science PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
