**Reflecting on Darwin** Eckart Voigts, Barbara Schaff, 2016-04-08 Taking up the historical evolution of Darwin and his theories and the cultural responses they have inspired Reflecting on Darwin poses the following questions How are the apparatuses in the mid nineteenth century and at the turn of the twenty first century interconnected with bio scientific paradigms in art literature culture and science How are naturalism determinism and Darwinism the eugenics of the nineteenth century and the genetic coding of the twentieth century positioned embodied and staged in various media configurations and media genres and How have particular media apparatuses formed displaced or stabilized the various concepts of humankind in the framework of evolutionary theory Ranging from the early circulation of Darwin s ideas to the present this interdisciplinary collection pays particular attention to Darwin s postmillennial reception Beginning with an overview of the historical development of contemporary ecological and ethical fears Reflecting on Darwin then turns to Darwin s influence on contemporary media neo Victorian literature and culture science fiction literature and film and contemporary theory In examining the plurality of ways in which Darwin has been rewritten and reappropriated this unique volume both mirrors and inspects the complexity of recent debates in Victorian and neo Victorian studies **The Influence of Darwin on Philosophy and Other Essays in Contemporary Thought** John Dewey, 2007 This critical edition of The Influence of Darwin on Philosophy and Other Essays in Contemporary Thought presents the results of John Dewey s patient construction throughout the previous sixteen years of the radically new view of the methods and concerns of philosophical inquiry It was a view that he continued to defend for the rest of his life **The Literary Imagination from Erasmus Darwin to H.G. Wells** Michael R. Page, 2016-03-09 At the close of the eighteenth century Erasmus Darwin declared that he would enlist the imagination under the banner of science beginning Michael Page argues a literary narrative on questions of evolution ecology and technological progress that would extend from the Romantic through the Victorian periods Examining the interchange between emerging scientific ideas specifically evolution and ecology new technologies and literature in nineteenth century Britain Page shows how British writers from Darwin to H G Wells confronted the burgeoning expansion of scientific knowledge that was radically redefining human understanding and experience of the natural world of human species and of the self The wide range of authors covered in Page s ambitious study permits him to explore an impressive array of topics that include the role of the Romantic era in the molding of scientific and cultural perspectives the engagement of William Wordsworth and Percy Shelley with questions raised by contemporary science Mary Shelley s conflicted views on the unfolding prospects of modernity and how Victorian writers like Charles Kingsley Samuel Butler and W H Hudson responded to the implications of evolutionary theory Page concludes with the scientific romances of H G Wells to demonstrate how evolutionary fantasies reached the pinnacle of synthesis between evolutionary science and the imagination at the close of the century **Reflections of a Darwinian** Gavin Rylands de Beer, 1962 Essays in Moral Skepticism

Richard Joyce, 2016-01-28 Moral skepticism is the denial that there is any such thing as moral knowledge. Some moral skeptics deny that moral judgments are beliefs; some allow that moral judgments are beliefs but claim that they are all untrue; others claim that all moral judgments are unjustified. Since the publication of *The Myth of Morality* in 2001, Richard Joyce has explored the terrain of moral skepticism and perhaps more than any other living philosopher has been willing to advocate versions of this radical view. Joyce's attitude toward morality is analogous to an atheist's attitude toward religion: he claims that in making moral judgments, speakers attempt to state truths (e.g., that breaking promises is usually wrong) but that the world simply isn't furnished with the properties and relations necessary to render such judgments true. Moral thinking, he argues, probably emerged as a human adaptation but one whose usefulness derived from its capacity to bolster social cohesion rather than its ability to track truths about the world. This forms the basis of Joyce's evolutionary debunking argument according to which evidence that a certain kind of judgment can be explained with no reference to its truth may reveal those judgments to lack warrant. *Essays in Moral Skepticism* gathers together a dozen of Joyce's most significant papers from the last decade following the developments in his ideas, presenting responses to critics and charting his exploration of the complex landscape of modern moral skepticism.

**Nineteenth Century Religious Thought in the West** Ninian Smart, 1988. Now available in paperback, the successful three volumes of *Nineteenth Century Religious Thought in the West* provide a fresh appraisal of the most important thinkers of that time. Some essays centre on major figures of the period; others cover topics, trends, and schools of thought between the French Revolution and the First World War. The contributors are among the leading scholars in their field and analyse not only what was said but also why it was said and explore what is of lasting value in it. Contributions are sufficiently clear to be of use to students in religious studies and cognate disciplines but have enough depth and detail to appeal to scholars.

**A Calendar of the Correspondence of Charles Darwin, 1821-1882** Frederick Burkhardt, Sydney Smith, 1994-03-10. This Calendar is a catalogue of the letters the editors of the *Correspondence of Charles Darwin* have found to date. Information on the source and location of each letter is given together with a brief summary of the content. First published in 1985, the Calendar has been amended to take account of recently discovered material and re-interpretations or re-dating of known letters. A new supplement lists over 1000 amendments to the main body of the text together with over 500 addenda relating to newly discovered material.
