Reflections On Ice:

CRREL Report ,1988 Reflections on Ice Ashlee Sullivan Hale,2000 *Properties of Ice* Rudolf Brill,Paul R. Camp,U.S. Army Snow, Ice, and Permafrost Research Establishment,1961 Results of a number of studies on ice during the period 1955-1959 are summarized Sections are entitled as follows growth of large single crystals of ice and ammoniumfluoride ice lattice constants of mixed crystals of ice an ammoniumfluoride degree of perfection of glacial ice crystals thermal motion in ice and heavy ice viscoelastic properties of ice diffusion of H₂O through ice dielectric relaxation effect of pressure on dielectric properties and investigation of the polarity of ice crystals Author Modeling of Anisotropic Electromagnetic Reflection from Sea Ice Kenneth M. Golden,1980 **Proceedings** United States. Merchant Marine Council,1950

Délibérations Et Mémoires de la Société Royale Du Canada Royal Society of Canada,1925 **The Land Beneath the Ice** David J. Drewry,2023-01-24 As soon as humans spied and later set foot on the remote Antarctic continent in the early nineteenth century they became aware of its ice cover and desired to learn about its extent shape thickness and behavior In this book David Drewry glaciologist and former Director of the Scott Polar Research Institute recounts the science and history of a ground breaking time in recent Antarctic geophysical exploration in which scientists were finally able to see through the Antarctic ice sheet and take its measure From the mid 1960s to the mid 1980s scientists ability to peer beneath the Antarctic ice sheet and map its thickness was revolutionized by the technology techniques and exploratory campaigns of the Radio Echo Sounding Programme conducted by the Scott Polar Research Institute at Cambridge in the UK The exploratory radar mapping campaigns of this ambitious research program were largely accomplished during the Cold War as interest and concern in global climate change were just emerging To those involved in this research and fieldwork it was evident that the environment of the planet was indeed changing and that the great ice masses of Antarctica and Greenland and their evolving stability and behavior would feature significantly in understanding the future of our world This book gives an account of the Radio Echo Sounding Programme describing the scientific background goals various scientific human political and natural challenges and discoveries of the research program It follows the twists and turns of operating in a remote and hostile region where detailed and exact planning and preparations were constantly at risk of disruption by bad weather mechanical and electronic breakdowns aircraft crashes and human frailty It also highlights the strong international cooperation that occurred in Antarctica during this contentious time in history speaking to the importance of the 1961 Antarctic Treaty as well as the necessity of working together to tackle problems of global significance Cold Regions Science and Engineering Monograph ,1972 **Ice-marginal and Periglacial Processes and Sediments** Irene Peter Martini,Hugh M. French, Augusto Pérez Alberti,2011 Understanding the sediments deposited by glaciers or other cold climate processes assumes enhanced significance in the context of current global warming and the predicted melt and retreat of glaciers and ice sheets This volume analyses glacial proglacial and periglacial settings Papers include topics such

as sedimentation at termini of tidewater glaciers poorly understood high mountain features and slope and aeolian deposits that have been sourced in glacial and periglacial regions and subsequently transported and deposited by azonal processes Difficulties encountered in inferring Pleistocene and pre Pleistocene cold climate conditions when the sedimentary record lacks specific diagnostic indicators are discussed The main objective of this volume is to establish the validity and limitations of the evidence that is used to achieve reliable palaeogeographic and palaeoclimatic reconstructions On the much longer geological timescale an understanding of ice marginal and periglacial environments may better prepare us for the unavoidable reversal towards cooler and perhaps even glacial times in the future *Naval Research Reviews* ,1983

Atmospheric Technology , *Morphology, Hydraulics and Sediment Transport of an Ice-covered River* Cold Regions Research and Engineering Laboratory (U.S.),1986 This initial study of the ice covered Tanana River near Fairbanks Alaska attempted to 1 establish field methods for systematic and repetitive quantitative analyses of an ice covered river s regime 2 evaluate the instruments and equipment for sampling and 3 obtain the initial data of a long term study of ice cover effects on the morphology hydraulics and sediment transport of a braided river A methodology was established and detailed measurements and samplings including profiling by geophysical techniques were conducted along cross sections of the river A small portable rotary drill rig equipped with a 356 mm 14 in ice auger was used to cut large diameter holes in the ice cover for through the ice measurements Portable heat sources and a heated shelter were required to continuously thaw and dry equipment for the repetitive measurements Measurements included ice cover thickness water level water depth temperature flow velocity suspended load and bed load frazil ice distribution and bed material composition Remotely gathered data included apparent resistivity and subsurface radar profiling The various techniques sampling gear and problems encountered during use in the subfreezing cold are described in detail in this report CRREL Report Cold Regions Research and Engineering Laboratory (U.S.),1980 **Geophysical Research Papers** ,1958 Ice Physics Peter Victor Hobbs,2010-05-06 This monograph provides an account of the physics and chemistry of ice Informed by research from physicists chemists and glaciologists the book places emphasis on the basic physical properties of ice the modes of nucleation and growth of ice and the interpretation of these phenomena in terms of molecular structure Scientific Studies at Fletcher's Ice Island, T-3, 1952-1955 Vivian Bushnell,1959 **Antarctic Journal of the United States** ,1996 **Proceedings of the Royal Society of Canada** Royal Society of Canada,1925 **Hyperbolic Reflections on Beaufort Sea Seismic Records** K.
