Reflections On Latin American Development:

Reflections on Latin American Development Roberto de Oliveira Campos, 1967 **Reflections on Latin American Development** Roberto de Olivera Campos, 2014-11-11 Economic development has been a challenge facing the countries of Latin America. Because the United States from the very nature of its geographic and economic relationship with its southern neighbors must inevitably exercise a strong influence on the course which that development takes it is important that North Americans understand conditions in Latin America and the attitudes of its peoples. Roberto de Oliveira Campos, former Brazilian Minister of Economic Planning, is in a unique position to evaluate both past accomplishments and future problems. In this group of essays Campos gives a comprehensive analysis of many aspects of Latin American development in the mid twentieth century. He examines relations between the United States and Latin America from a variety of angles and he outlines the basic problems of economic development of governmental policy and of public and private administration. He gives particular attention in several essays to the relationship of foreign trade and foreign aid to economic development and he presents a long discussion of the Alliance for Progress, its history, its purposes, its accomplishments and its failures. Campos's philosophy regarding the role of the state in economic development and other questions emerges clearly from these pithy essays. The valid distinction I see on the basis of my analysis of men and things is between pragmatic or functional nationalists and romantic or temperamental nationalists, he writes. The latter confuse intention with results. They start with enthusiasm and end in fanaticism, this being according to Santayana the art of redoubling efforts after losing sight of objectives. Many romantic nationalists, though they do not confess it, favor the dangerous purgery of revolution. The pragmatic nationalist seeks to operate within the frame of democratic institutions and prefers reform to revolution. As to myself, I shall continue considering myself a pragmatic nationalist. I renounce the temptation of mobilizing resentment in order to gain the authority to plan development. I would rather strengthen the national entrepreneur than merely antagonize the foreigner. I would want the state not to do what it cannot do in order to do what it should do. I prefer to love my own country rather than to hate the others.

Reflections on International Cooperation for Latin American Development Raúl Prebisch, Latin American Institute for Economic and Social Planning, 1969 *Handbook Of Research On The International Relations Of Latin America And The Caribbean* G. Pope Atkins, 2018-02-12 The study of Latin American and Caribbean international relations has a long evolution both within the development of international relations as a general academic undertaking and in terms of the particular characteristics that distinguish the approaches taken by scholars in the field. This handbook provides a thorough multidisciplinary reference guide to the literature on the various elements of the international relations of Latin America and the Caribbean. Citing over 1600 sources that date from the nineteenth century to the present with emphasis on recent decades, the volume's analytic essays trace the evolution of research in terms of concepts, issues, and themes. The Handbook is a companion volume to Atkins' *Latin America and the Caribbean in the International System*. Fourth

Edition but also serves as an invaluable stand alone reference volume for students scholars researchers journalists and practitioners both official and private Reflections on Employment Opportunities in Latin America Mahmood A. Zaidi,1971

Human Development in the Era of Globalization J. K. Boyce,Keith B. Griffin,James K. Boyce,2006 This volume provides a very high quality set of papers on the relationship between globalization and human development any one with interest in this wide ranging subject matter would find the volume an interesting and engaging read Global Business Review Honoring Keith Griffin s more than 40 years of fundamental contributions to the discipline of economics the papers in this volume reflect his deep commitment to advancing the well being of the world s poor majority and his unflinching willingness to question conventional wisdom as to how this should be done Four overarching themes recur in Keith Griffin s work and this book the need to both eradicate poverty and redress inequalities in the distribution of wealth within and among nations the impact of growth on inequality and conversely inequality s impact on growth the political economy of policy making and the need for openness to heterogeneity in both analytic tools and in policy recommendations The volume begins with an introduction by the editors followed by a paper by Keith Griffin In succeeding chapters the contributors explore strategies for reducing poverty and inequality and provide perspectives on issues such as human development the rural urban divide in China and biodiversity and sustainability Students researchers policymakers and NGO analysts exploring issues in development economics development studies alternative economic systems globalization environmental sustainability inequality and well being will find this book of great interest **A Moment of Equality for Latin America?** Prof Dr

Barbara Fritz,Professor Lena Lavinas,2015-10-28 Unlike other regions around the world several Latin American countries have managed to reduce income inequality over the last decade Higher growth rates and growing employment but also innovative wage policies and social programs have contributed to reducing poverty and narrow income disparities Yet despite this progress nation states in the region demonstrate little capacity to substantially change their patterns of deeply rooted inequalities Focusing on the limits and challenges of redistributive policies in Latin America this volume synthesizes and updates the discussion of inequality in the region introducing the perspective of global and transnational interdependencies The book explores the extent to which redistributive policies have been interlinked with the provision and quality of public goods as well as with structural changes of the productive sector Inspired by structuralist and neostructuralist thinking of Latin American economists such as Raúl Prebisch and Celso Furtado authors question the redistributive impact of the

interplay of recent macroeconomic fiscal and social policies particularly under left and center left administrations committed to greater equality Bringing together experts in social fiscal and macroeconomic policies to investigate the interdependent and global character of inequalities this book will appeal to scholars of sociology economics development and politics with interests in Latin America inequality and public policy **Reports and Documents** United States. Ideas, Policies and Economic Development in the Americas Esteban Pérez-Caldentey,Matias Vernengo,2007-03-29 The interplay of ideas and policies is central to understanding the historical evolution of economies Ideas shape economic institutions and real economic constraints are the source of new economic ideas The history of economic ideas both those that are fairly recent and those that are considerably older may provide a fertile ground for new approaches to Latin American and Caribbean economic development However the history of economic ideas and their intricate relation to economic policies remains a relatively unexplored field in Latin American and Caribbean studies This book is a valuable new contribution to this emerging literature **Hearings, Reports and Prints of the Senate Committee on Foreign**

Relations United States. Congress. Senate. Committee on Foreign Relations,1968 *Industry, the State, and Public Policy in Mexico* Dale Story,2014-08-19 The industrialization process in Mexico began before that of any other nation in Latin America except Argentina with the most rapid expansion of new industrial firms occurring in the 1930s and 1940s and import substitution in capital goods evident as early as the late 1930s Though Mexico s trade relations have always been dependent on the United States successive Mexican presidents in the postwar period attempted to control the penetration of foreign capital into Mexican markets In *Industry the State and Public Policy in Mexico* Dale Story recognizing the significance of the Mexican industrial sector analyzes the political and economic role of industrial entrepreneurs in postwar Mexico He uses two original data sets industrial production data for 1929 1983 and a survey of the political attitudes of leaders of the two most important industrial organizations in Mexico to address two major theoretical arguments relating to Latin American development the meaning of late and dependent development and the nature of the authoritarian state Story accepts the general relevance of these themes to Mexico but asserts that the country is an important variant of both With regard to the authoritarian thesis the Mexican authoritarian state has demonstrated some crucial distinctions especially between popular and elite sectors The incorporation of the popular sector groups has closely fit the characteristics of authoritarianism but the elite sectors have operated fairly independently of state controls and the government has employed incentives or inducements to try to win their cooperation In short industrialists have performed important functions not only in accumulating capital and organizing economic enterprises but also by bringing together the forces of social change Industrial entrepreneurs have emerged as a major force influencing the politics of growth and the public policy arena has become a primary focus of attention for industrialists since the end of World War II **A Moment of Equality for Latin America?**

The world is at the crossroads of social change in the vortex of forces that are bringing about a different world a post neoliberal state This groundbreaking book lays out an analysis of the dynamics and contradictions of capitalism in the twenty first century These dynamics of forces are traced out in developments across the world in the Arab Spring of North Africa and the Middle East in Cuba and elsewhere in Latin America in the United States and in Asia The forces released by a system in crisis can be mobilized in different ways and directions The focus of the book is on the strategic responses to the systemic crisis As the authors tell it these dynamics concern three worldviews and strategic responses The Davos Consensus focuses on the virtues of the free market and deregulated capitalism as it represents the interests of the global ruling class The post Washington Consensus concerns the need to give capital a human face and establish a more inclusive form of development and global governance In addition to these two visions of the future and projects the authors identify an emerging radical consensus on the need to move beyond capitalism as well as neoliberalism Latin America, a Selected Functional and Country Bibliography: The Latin American area ,1968 Quo Vadis Latin America?
