Reflections On Antipoverty Programmes:

Evaluating Anti-poverty Programs Martin Ravallion, 2005 The author critically reviews the methods available for the ex post counterfactual analysis of programs that are assigned exclusively to individuals households or locations The discussion covers both experimental and non experimental methods including propensity score matching discontinuity designs double and triple differences and instrumental variables Two main lessons emerge First despite the claims of advocates no single method dominates rigorous policy relevant evaluations should be open minded about methodology Second future efforts to draw more useful lessons from evaluations will call for more policy relevant measures and deeper explanations of measured impacts than are possible from the classic black box assessment of mean impact Cover verso **Panchayati Raj**

Critical Reflections on Cities in Southeast Asia Tim Bunnell, Lisa Drummond, Ho, 2021-11-15 Critical Reflections draws together the multi disciplinary research of scholars working in on cities across Southeast Asia The fourteen essays collected in the volume are organised into three thematic sections re conceptualisation competition and intervention Collectively these reflections contribute to and interrogate the expanding urban and regional studies literature The volume constitutes a critical corrective to the existing literature which all too often seeks to diagnose contemporary urban trends everywhere from a small number of mostly Western paradigmatic cases Yet while acknowledging the increasing interconnectedness and shared global orientation of most cities in Southeast Asia the volume is wary of positing an equally generalising regional model Individually these essays attend to the diversity of contemporary urban experiences in Southeast Asia **Hearings,**
