

## Lecture 6 - Reflections

### Language of Images

→ A Virtual Image is the location where the light *appears* to be coming from, when in fact the light is bouncing off the mirror from a different location

→ A Real Image is when the light *actually* comes from the image (rather than just appearing to come from there), though you may need a screen to see it

Flat mirrors have many uses because they show us clear and easy to interpret images.

### Image in a Vertical Mirror

- If a point on the object is a distance  $X$  in front of the mirror, the corresponding point on the image will appear to be a distance  $X$  in the back of the mirror ( $X_{\text{object}} = X_{\text{image}}$ )
- The image point is on the extended normal (perpendicular) line from the object to the flat mirror
- If the observer shifts a bit, the perceived image position remains the same

### How do we make a mirror?

- A layer of glass (transmits light)
- A layer of shiny silver painted on the back (reflects light)
- A layer of dark paint (stops transmitted light from escaping out the back)

### → Half-Silvered Mirror

- If the silver coating on a mirror is thin enough, the mirror can be made to transmit 50% of the light and to reflect the other 50%
- With proper lighting, a half-silvered mirror can show objects on one side of the mirror but not the other

### Summary

→ Plane mirrors make virtual images (no light rays actually come from this location)

- Image and object are located the same distance from, but on opposite sides of the mirror
- Independent of where observer is

### Big Ideas

- Specular reflection comes from smooth objects
- We see an image as a result of reflection
- Law of reflection: angle of incidence = angle of reflection
- In a flat mirror, image distance = object distance
- We can locate images by tracing back where the reflected rays originated

## **Reflections On Language:**

**Reflections on Language** Noam Chomsky, 1975 Noam Chomsky's work in linguistics has revolutionized our understanding of language. In these remarkable nontechnical *Reflections*, Chomsky considers the point and purpose of studying language and explores some of the more general intellectual implications that result from the study of linguistics. The questions he considers are the classical ones. From Plato to the present time, philosophers have been baffled and intrigued by how human beings with their limited and personal experience achieve such rich systems of knowledge, beliefs, and values systems that guide their actions and their interpretations of experience. In answer to this fundamental question, Chomsky argues that the growth of language is analogous to the development of a bodily organ and is in large measure predetermined by genetic factors. Throughout these *Reflections*, Chomsky offers incisive analyses of the controversies raging today among psychologists, philosophers, and linguists over the acquisition of cognitive structures, the way language interacts with other mental organs, and the way cognitive structures enter into and guide human activity. He explores the social and intellectual factors that have led to the dominance of certain ways of thinking and asks why the study of mind and behavior has so often followed a path remote from the general approach of the natural sciences. In examining some of the implications of recent work, he suggests that the conception of man as totally malleable not only is false but also serves naturally as a support for reactionary social doctrines. **The Complexity of Identity and Interaction in Language Education** Nathanael Rudolph, Ali Fuad Selvi, Bedrettin

Yazan, 2020-08-07 This book addresses two critical calls pertaining to language education Firstly for attention to be paid to the transdisciplinary nature and complexity of learner identity and interaction in the classroom and secondly for the need to attend to conceptualizations of and approaches to manifestations of inequity in the sociohistorical contexts in which they occur Collectively the chapters envision classrooms and educational institutions as sites both shaping and shaped by larger trans communal negotiations of being and belonging in which individuals affirm and or problematize essentialized and idealized nativeness and community membership The volume comprised of chapters contributed by a diverse array of researcher practitioners living working and or studying around the globe is intended to inform empower and inspire stakeholders in language education to explore potentially reimagine and ultimately critically and practically transform the communities in which they live work and or study

*Saussure's Philosophy of Language as Phenomenology* Beata Stawarska, 2015-01-15 This book draws on recent developments in research on Ferdinand de Saussure's general linguistics to challenge the structuralist doctrine associated with the posthumous Course in General Linguistics 1916 and to develop a new philosophical interpretation of Saussure's conception of language based solely on authentic source materials This project follows two new editorial paradigms 1 a critical re examination of the 1916 Course in light of the relevant sources and 2 a reclamation of the historically authentic materials from Saussure's Nachlass some of them recently discovered In Stawarska's book this editorial paradigm shift serves to expose the difficulties surrounding the official Saussurean doctrine with its sets of oppositional pairings the signifier and the signified la langue and la parole synchrony and diachrony The book therefore puts pressure not only on the validity of the posthumous editorial redaction of Saussure's course in general linguistics in the Course but also on its structuralist and post structuralist legacy within the works of Levi Strauss Lacan and Derrida Its constructive contribution consists in reclaiming the writings from Saussure's Nachlass in the service of a linguistic phenomenology which intersects individual expression in the present with historically sedimented social conventions Stawarska develops such a conception of language by engaging Saussure's own reflections with relevant writings by Hegel Husserl Roman Jakobson and Merleau Ponty Finally she enriches her philosophical critique with a detailed historical account of the material and institutional processes that led to the ghostwriting and legitimizing the Course as official Saussurean doctrine
