Pohl, Cameron White, Christine

Beaudry, 2021-02-01 There is only one place where social education can occur and flourish through the voices that create a pedagogy of change And it is these voices where the most exciting and provocative moments can occur for those of us who are passionate about education teaching social justice equity and love As such social education is a journey an endeavor that makes us savor the experience of the journey more than the destination And social education is a journey that is enhanced through educator and student voices because it occurs in the most important spaces of our personal and professional lives It occurs in the hallways of the schools we teach in the staff meetings we attend in the mountain villages we venture to visit in the places we work and in the spaces we occupy Moreover social education is a unique kind of journey because it is a human experience that seldom occurs alone It happens with our colleagues and our loved ones It happens with our students

administrators and other professionals who are fighting for the same things that we so fervently believe In the end social education occurs and flourishes in the trenches because it is the active pursuit of getting our hands dirty in our endless pursuit for a better and more just world Social education is also a narrative which takes on a different meaning for each one of us This is because sooner or later each person that embarks into the journey of social education develops its own personal definition of what social education entails through his or her own personal landscape and knowledge This personal landscape has been evolving since we were very young with some of the best examples of human courage and tenacity in the fight for social justice Voices of Social Education A Pedagogy of Change is a collection of personal stories In this volume academics teachers students activists and artists share their personal stories of triumph tribulations and courage in their daily fight for social justice and equality The term social education is not defined as a set number of guidelines or a specific definition we give the term an organic fluency to stress that social education is a point of encounter a common space where we can share with each other our experiences values and culture to form a more genuine and just social experience

Space, Curriculum and Learning David Scott, 2006-01-01 In recent years there has been increasing interest in issues of space and spatiality in the social sciences and humanities generally if less so in the study of education This relative lack of interest is surprising given the importance of space and time in the organization of teaching learning and research For instance the timetable and project timeline are central to the organization of learning and knowledge production whether in schools colleges or universities Classrooms workshops and laboratories have different spatial layouts which support certain forms of interaction and communication When we add to this the increasing distances across which knowledge understanding and competence are being distributed through the use of information and communications technologies the fact that issues of space have not been taken up seems more than an oversight This relative lack of interest in space becomes even more surprising when one considers the extensive use of spatial metaphors in the discussion of education and pedagogy For instance the notions of open distance and distributed learning and student centredness border crossing and communities of practice all have a spatial dimension to them Notions of a spiral curriculum act as a spatial imaginary Indeed some metaphors such as flexibility seem to be suggestive of the possibility that all constraints of space and time can be conquered in the provision of learning opportunities throughout life This collection of chapters from researchers around the world attempts to address these issues to examine the significance of space for curriculum learning and identity
