Reflexive Communication In The Culturally Diverse Workplace:

Reflexive Communication in the Culturally Diverse Workplace John Kikoski, Catherine Kikoski, 1996-07-22 America's rapid and drastically changing demographics pose new challenges to society and particularly to the workplace. Taking as their theme that the only antidote to stereotyping and discrimination is to know each other as individuals, the authors look carefully at the direction in which America is heading demographically and where it will be in the 21st century. They discuss what the workplace will be like and how it will be affected by the characteristics of the people who will comprise it. The essence of the problem, say the authors, is communication: the face-to-face interaction between people of different ethnicities, races, and genders. They may be speaking to each other but are not being heard. Exploring the relationship between culture, communication, and management, this new research in management introduces and applies the theory of Reflexive Communication and the microskills necessary for using it in day-to-day work situations. The authors lay out the patterns of culture-specific values and behaviors of the major demographic groups in the workplace: white males, women, African Americans, Hispanics, and Asian Americans. In each of these chapters, the authors apply their theory and show step-by-step how individuals within each group can be accessed and trained by the precepts of Reflexive Communication. The book concludes with a thoughtful examination of the future of diversity and diversity training in America and reasserts the need for people of differing cultures to find ways to work together not only for their own personal benefit but for the benefit of their workplaces and organizations. The Inquiring Organization

Catherine Kikoski, John Kikoski, 2004-07-30 This book provides the context and tools to create knowledge via a proven process of inquiry: questions and conversation. It introduces the theoretical background to explain why, as well as the practical hands-on skills and processes to demonstrate how to surface tacit knowledge that which we know but which we have not yet made explicit in conversation: e.g., background, education, and experience, and create new knowledge in collaboration with colleagues. In the information economy, knowledge is an asset and a currency. The creation of new knowledge therefore enhances an organization's position in the marketplace. How do we create new knowledge? We don't do it by learning what is already known. The learning organization is already past. Instead, we do it by inquiring, which is a method of bringing tacit knowledge to the forefront of awareness. The inquiring organization surfaces tacit knowledge, which is what its employees bring to the table: their background, education, experience, character, and judgment, and transforms that knowledge into new, explicit.
