Reform And Transformation In Communist Systems:

Reform and Transformation in Communist Systems Ilpyong J. Kim, Jane Shapiro Zacek, 1991 **The Transformation Of Communist Systems** Bernard Chavance, Charles Hauss, Mark Selden, 1994-10-20 Through a comparative and historical analysis of change in the socialist and postsocialist systems of the Soviet bloc and China this timely and original book clarifies the pitfalls in the formidable transition to a market economy Bernard Chavance provides a succinct analysis of the politics and economies of Eastern Europe from the creation of the Stalinist system through three major waves of reform to the ultimate dismantling of most socialist governments Exploring the link between the one party regime and the growing rigidity of socialist economic systems the author analyzes the failure of both incremental and radical reforms to adapt to new economic challenges thus leading to the ultimate collapse of communist regimes in Europe *Adaptation And Transformation In Communist And Post-communist Systems* Sabrina Petra Ramet, 2019-03-04 This book tackles different aspects of the adaptive and transformative process in communist and post communist systems in Eastern Europe offering competing models which locate the explanatory variable in different places and account for the unfolding of change in different ways **The Political Economy of Asian Transition from Communism** Sujian Guo, 2017-11-28 A comparative study of the political economy of the transition from communism in East and Southeast Asian countries China North Korea Vietnam Laos and Cambodia addressing the key theoretical questions generated from the debate between shock therapists and gradualists While accurately defining the pre reform model this book explores the causal variables that have contributed to reform efforts within Asia examining the significance of the sequencing of political and economic transition and the interplay between politics and the economy in determining variations in transition outcomes Comparing the real world experiences of transition nations in communist Asia with Eastern Europe prominent questions are brought to the fore will market capitalism or market socialism prevail after the grand failure of communism This book makes an important contribution to the political economy theory of comparative communist and post communist studies and provides detailed analytical insights that will prove influential in future theoretical work *Reform of the Socialist System in Central and Eastern Europe* Martin J. Bull, Mike Ingham, 2016-07-27 This book analyzes the reform of the socialist system in Central and Eastern Europe and the former Soviet Union Uniquely it adopts a multi disciplinary perspective which includes authors from both Western Europe and the former Communist world The volume contains analyses of the prospects for civil society economic reform and privatisation theories of economic transition and the role of the state political change and the persistence of former Communist parties the prospects for democracy in the former Soviet Union and gender aspects of labour market reform **Economic Reforms in the Socialist World** Stanislaw Gomulka, Yong-Chool Ha, Se-wŏn Kim, First Published in 1990 Routledge is an imprint of Taylor Francis an Informa company **The Political Economy of Dual Transformations** David L. Bartlett, 2010-05-06 In the early 1990s scholars voiced skepticism about the capacity of Eastern

Europe's new democracies to manage simultaneous political and economic reform. They argued that the surge of popular participation following democratization would thwart efforts by successor governments to enact market reforms that imposed high costs on major elements of post-Communist society. David Bartlett challenges the conventional wisdom regarding the hazards of dual transformations far from hindering marketization, democratization facilitated it. Bartlett argues that the transition to democracy in East Central Europe lowered the political barriers to market reforms by weakening the ability of actors most vulnerable to marketization to manipulate the existing institutional structure to stop or slow down the process. Although the analysis focuses on Hungary whose long history of market reforms makes it an ideal vehicle for assessing the impact of institutional change on reform policy, the author shows how his findings call into question the use of shock therapy and arguments based on the experience in East Asia that economic development and democratization are incompatible. This book will appeal to economists, political scientists, and others interested in transition problems in formerly communist countries, democratic transitions, and the politics of stabilization and adjustment. David L. Bartlett is Assistant Professor of Political Science, Vanderbilt University.

The Political Logic of Economic Reform in China Susan L. Shirk, 2023-04-28

In the past decade, China was able to carry out economic reform without political reform, while the Soviet Union attempted the opposite strategy. How did China succeed at economic market reform without changing communist rule? Susan Shirk shows that Chinese communist political institutions are more flexible and less centralized than their Soviet counterparts were. Shirk pioneers a rational choice institutional approach to analyze policy making in a non-democratic authoritarian country and to explain the history of Chinese market reforms from 1979 to the present. Drawing on extensive interviews with high-level Chinese officials, she pieces together detailed histories of economic reform policy decisions and shows how the political logic of Chinese communist institutions shaped those decisions. Combining theoretical ambition with the flavor of on-the-ground policy making in Beijing, this book is a major contribution to the study of reform in China and other communist countries. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1994. In the past decade, China was able to carry out economic reform without political reform, while the Soviet Union attempted the opposite strategy. The Political Economy of China's Great Transformation

Xingyuan Feng, Christer Ljungwall, Sujian Guo, 2016-07-15. The Political Economy of China's Great Transformation consists of three parts: first, covering the current political transformation, providing a general political background for the socio-economic, fiscal, and urban and rural transformation. The book analyses the economic transformation and addresses the shortcomings of existing interpretations of the Chinese Miracle and develops a new multi-dimensional framework. In addition, it shows how the

private sector has been developing and what a major role it is playing in pushing forward the overall economic development. The book also focuses on the analysis of China's fiscal transformation. With the set of refined principles of fiscal federalism that the author has developed, it examines the problems of Chinese fiscal federalism in contrast to them. It further elaborates on topics such as the local government debt and explains why further reforms are necessary, making this book a very comprehensive read to understand China's progress.

Warfare Since the Second World War Torsten Schwinghammer, 2018-04-24. *Warfare Since the Second World War* presents a wealth of analysis and data about one of the most pressing questions of our time: why does war continue to plague us fifty years after World War II? This book argues that the nature of war has shifted from inter-state conflicts toward internal conflicts, above all civil war. Low-intensity conflict helps explain the constant increase in wars over the last fifty years and makes it probable this trend will continue. Gantzel and Schwinghammer argue that modern warfare reflects a continuation of the nation-state building process begun in nineteenth-century Europe. In their analysis, economic modernization and social integration destroy traditional relations and create instability in the developing world. While these forces were successfully harnessed by the modern state in Europe and North America, economic and political globalization make a similar resolution considerably more complex. In addition to their insightful analysis, the authors provide a detailed list of all wars fought from 1945 to 1995. The authors' lucid explanatory commentaries are accompanied by lists, tables, and charts. In addition to a detailed war register upon which all statistical data and analyses for the volume are based, there are appendices with directories useful for locating specific wars as well as several supplementary lists. An afterword brings the reader closer to the world situation as we conclude the twentieth century, including the impact of political developments in Eastern Europe. Beyond its historical dimension, this book offers a policy-relevant empirical demonstration of the ongoing increase in internal civil wars and addresses the inability of modern society to prevent this scourge. *Warfare Since the Second World War* is an indispensable resource for anyone concerned with issues of war and peace, development, and the future of international relations.

The Political Economy of Fiscal Reform in Central-Eastern Europe Frank Bönker, 2006-01-01. Frank Bönker has done a masterful job. This is probably the best book available on this important subject, and its significance is not limited to studies of postcommunist societies. It has important theoretical implications for everyone interested in the Political Economy of Policy Reform perspective within the field of comparative political economy. John L. Campbell, *Slavic Review*.

Economic Reforms in the Socialist World Stanislaw, etc., Gomulka, 2016-07-22. First Published in 1990. Socialist countries now account for about a quarter of the world economy, about a third of the world population, and about half the world military power. What happens in those countries is therefore par excellence of importance to all of us. This book is an outcome of a Conference on Economic Systems and Reforms in a Changing World held in Seoul in September 1987. The Conference was significant in several respects. Foremost was the fact that this was probably the first such meeting of scholars from both socialist and non-socialist countries held to

discuss socialist economic reforms worldwide Policy Making in China Kenneth Lieberthal, Michel Oksenberg, 2020-11-10

Transformation and State Governance in China Xianglin Xu, 2020-06-08 This volume is a selection of Chinese political scholar Xianglin Xu's published works spanning nearly 20 years of research that explore and discuss the socio economic transition in China under state political reform Contextualized within the decades following the 80s the author analyzes patterns observed from empirical studies and breaks down the underlining reasoning conditions and functionalities behind

the incremental reform policies pushed forward by the Party and government The collection is broken up into four sections the first provides a general framework and theoretical historical introduction to social transition research in the case of China the second section discusses the underpinning logic behind political reform in China and practical concerns the third section follows with discussions on reform policy practices within China including application and trajectory the final section concludes with an analysis of reform within state institutional infrastructure and policy innovation

Inside the Mechanisms of Romanian Modernization Florin Grancea, 2006-09-05 This book analyzes in the relation with the Romanian modernity the transformations of the Romanian public sphere political system and journalism from the beginning of the 19th Century up to 2005 The argumentation starts from the idea that the Romanian Enlightenment never had the chance to reach its purpose the creation of the individual as a human category As a consequence of this historical fact the Romanian modernity was not explored in all its dimensions and was not congruent with its western model of development Only after late 90 s signs for a surpassing historical backwardness were seen in Romania and only after the integration into EU become sure From this perspective this book looks onto the change in the modernization engine of Romania in late 90 s This change is happening as a transgression from a three steps modernization model in which the role of the elite is central to a two steps modernization model in which the role of the elite is minimal Because the three steps modernization model fits the idea of an acclamatory public sphere while the two steps modernization engine fits the concept of civil public sphere this book proves that the Romanian democracy is evolving from its totalitarian background to become a participative democracy The only question unanswered yet is if the elite and the mass media are willing to let Romania and its citizens to breakup the ties with the totalitarian past

25 Years of Transformations of Higher Education Systems in Post-Soviet Countries Jeroen Huisman, Anna Smolentseva, Isak Froumin, 2018-04-24 This book is open access under a CC BY 4.0 license This open access book is a result of the first ever study of the transformations of the higher education institutional landscape in fifteen former USSR countries after the dissolution of the Soviet Union in 1991 It explores how the single Soviet model that developed across the vast and diverse territory of the Soviet Union over several decades has evolved into fifteen unique national systems systems that have responded to national and global developments while still bearing some traces of the past The book is distinctive as it presents a comprehensive analysis of the reforms and transformations in the region in the last 25 years and it focuses on institutional landscape through the evolution of the institutional types established and developed in Pre Soviet Soviet and Post Soviet time It also embraces all fifteen countries of the former USSR and provides a comparative analysis of transformations of institutional landscape across Post Soviet systems It will be highly relevant for students and researchers in the fields of higher education and sociology particularly those with an interest in historical and comparative studies
