Producing Security Stephen G. Brooks, 2011-10-16 Scholars and statesmen have debated the influence of international commerce on war and peace for thousands of years Over the centuries analysts have generally treated the questions Does international commerce influence security and Do trade flows influence security as synonymous In Producing Security Stephen Brooks maintains that such an overarching focus on the security implications of trade once made sense but no longer does Trade is no longer the primary means of organizing international economic transactions rather where and how multinational corporations MNCs organize their international production activities is now the key integrating force of global commerce MNC strategies have changed in a variety of fundamental ways over the past three decades Brooks argues resulting in an increased geographic dispersion of production across borders The author shows that the globalization of production has led to a series of shifts in the global security environment It has a differential effect on security relations in part because it does not encompass all countries and industries to the same extent The book's findings indicate that the geographic dispersion of MNC production acts as a significant force for peace among the great powers The author concludes that there is no basis for optimism that the globalization of production will promote peace elsewhere in the world Indeed he finds that it has a net

negative influence on security relations among developing countries **A New Capitalist Order** Hilary Appel, 2010-06-15

After the collapse of communism in the Soviet Union and eastern Europe more than a dozen countries undertook aggressive privatization programs Proponents of economic reform championed such large scale efforts as the fastest most reliable way to make the transition from a state run to a capitalist economy The idea was widely embraced and in the span of a few years policymakers across the region repeatedly chose an approach that distributed vast amounts of state property to the private sector essentially for free despite the absence of any historical precedent for such a radical concept But privatization was not a panacea It has instead become increasingly synonymous with collusion corruption and material deprivation Why was privatization so popular in the first place and what went wrong In answering this question Hilary Appel breaks with mainstream empirical studies of postcommunist privatization By analyzing the design and development of programs in Russia the Czech Republic and across eastern Europe Appel demonstrates how the transformation of property rights in these countries was first and foremost an ideologically driven process Looking beyond simple economic calculations or pressure from the international community she argues that privatization was part and parcel of the foundation of the postcommunist state A New Capitalist Order reveals that privatization was designed and implemented by pro market reformers not only to distribute gains and losses to powerful supporters but also to advance a decidedly Western liberal vision of the new postcommunist state Moreover specific ideologies such as anticommunism liberalism or nationalism to name but a few profoundly influenced the legitimacy the power and even the material preferences of key economic actors and groups within the privatization process *The Routledge Handbook of East European Politics* Adam Fagan, Petr Kopecký, 2017-08-15

Communist Power in Europe, 1944-49 Mary McCauley, 2016-01-03 [The Privatization of Russia](#) Marshall I. Goldman, 2003-04-10 Examines the debacle of Russian reform especially the emergence of oligarchs accused of using guile intimidation and violence to reap riches Explains Russia's problems and how they could have been avoided *Owning Russia* Andrew S. Barnes, 2018-07-05 During and after the breakdown of the Soviet Union a wide range of competitors fought

to build new political and economic empires by wresting control over resources from the state and from each other In the only book to examine the evolution of Russian property ownership in both industry and agriculture Andrew Barnes uses interviews archival research and firsthand observation to document how a new generation of capitalists gained control over key pieces of the Russian economy by acquiring debt ridden factories and farms once owned by the state He argues that although the Russian government made policies that affected how actors battled one another it could never rein in the most destructive aspects of the struggle for property Barnes shows that dividing the spoils of the Soviet economy involved far more than the experiment with voucher privatization or the scandalous behavior of a few Moscow based oligarchs In Russia the control of property yielded benefits beyond mere profits and these high stakes fueled an intense enduring and profound conflict over real assets This fierce competition empowered the Russian executive branch at the expense of the legislature dramatically strengthened managers in relation to workers created a broad array of business conglomerates and fundamentally shaped regional politics not only blurring the line between government and business but often erasing it

When Majorities Fail Josephine T. Andrews, 2002-10-21 When Majorities Fail is a study of institutional failure in Russia's first democratic legislature Inadequate rules and a chaotic party system combined to make it nearly impossible to pass a coherent legislative program including a new constitution The internal instability in Russia's parliament is known as cycling one of the most important theoretical concepts in formal study of legislatures There are few recorded cases of cycling in politically important settings This book documents the presence of cyclical majorities in Russian Parliament with comprehensive case and statistical analysis and demonstrates how the failure to adopt a new constitution led to the confrontation between parliament and president in the fall of 1993 Earlier research has shown that the design of a legislative institution is crucial in preventing cycling The author shows how the institutional design of the parliament failed underscoring the importance of institutional design in a democratic transition
