**Reformation and Revolution 1558-1660** Robert Ashton, 1985 **From the Communal Reformation to the Revolution of the Common Man** Peter Blicke, 2021-10-11 From the Communal Reformation to the Revolution of the Common Man brings together important studies related to a coherent interpretation of the Reformation and the Peasants War of 1525 as a mass movement rooted in the structures of the communities of towns and villages The volume presents both detailed studies from the archives and conceptualized essays *Reformation Europe* De Lamar Jensen, 1981 *Revolution as Reformation* Peter C. Messer, William Harrison Taylor, 2021-01-19 Essays that explore how Protestants responded to the opportunities and perils of revolution in the transatlantic age Revolution as Reformation Protestant Faith in the Age of Revolutions 1688 1832 highlights the role that Protestantism played in shaping both individual and collective responses to revolution These essays explore the various ways that the Protestant tradition rooted in a perpetual process of recalibration and reformulation provided the lens through which Protestants experienced and understood social and political change in the Age of Revolutions In particular they call attention to how Protestants used those changes to continue or accelerate the Protestant imperative of refining their faith toward an improved vision of reformed religion The editors and contributors define faith broadly they incorporate individuals as well as specific sects and denominations and as much of life experience as possible not just life within a given church In this way the volume reveals how believers combined the practical demands of

secular society with their personal faith and how in turn their attempts to reform religion shaped secular society The wide ranging essays highlight the exchange of Protestant thinkers traditions and ideas across the Atlantic during this period These perspectives reveal similarities between revolutionary movements across and around the Atlantic The essays also emphasize the foundational role that religion played in people s attempts to make sense of their world and the importance they placed on harmonizing their ideas about religion and politics These efforts produced novel theories of government encouraged both revolution and counterrevolution and refined both personal and collective understandings of faith and its relationship to society

Gregory,2015-11-16 In a work as much about the present as the past Gregory identifies the unintended consequences of the Reformation for the modern condition a hyperpluralism of beliefs intellectual disagreements that splinter into fractals of specialized discourse the absence of a substantive common good and the triumph of capitalism s driver consumerism

**Five Legal Revolutions Since the 17th Century** Jean-Louis Halpérin,2014-07-22 This book presents an analysis of global legal history in Modern times questioning the effect of political revolutions since the 17th century on the legal field Readers will discover a non linear approach to legal history as this work investigates the ways in which law is created These chapters look at factors in legal revolution such as the role of agents the policy of applying and publicising legal norms codification and the orientations of legal writing and there is a focus on the publicization of law The author uses Herbert Hart s schemes to conceive law as a human artefact or convention being the union between primary rules of obligations and secondary rules conferring powers Here we learn about those secondary rules and the legal construction of the Modern state and we question the extent to which codification and law reporting were likely to revolutionize the legal field These chapters examine the hypothesis of a legal revolution that could have concerned many countries in modern times To begin with the book considers the legal aspect of the construction of Modern States in the 17th and 18th centuries It goes on to examine the

consequences of the codification movement as a legal revolution before looking at the so called constitutional revolution linked with the extension of judicial review in many countries after World War II Finally the book enquires into the construction of an EU legal order and international law In each of these chapters the author measures the scope of the change how the secondary rules are concerned the role of the professional lawyers and what are the characters of the new configuration of the legal field This book provokes new debates in legal philosophy about the rule of change and will be of particular interest to researchers in the fields of law theories of law legal history philosophy of law and historians more broadly
