*Reforming Science Education* Rodger W. Bybee, 1993      *Researching and Teaching Social Issues* Samuel Totten, Jon Pedersen, 2012-05-01 originally published by Lexington Books A division of Rowman Littlefield Researching and Teaching Social Issues The Personal Stories and Pedagogical Efforts of Professors of Education is comprised of original personal essays in which notable teacher educators delineate the genesis and evolution of their thought and work vis a vis the teaching of social issues In relating their personal stories the authors were asked to discuss among other issues those individuals and or scholarly works that have most influenced them and how their own aspirations in the field the frustrations they have faced their perceptions of the field their major contributions and their current endeavors Our goal was that each and every story be as informative instructive and engaging as possible We believe that readers will be thoroughly engaged as they read the stories of these individuals stories that are inspiring filled with passion and reflective in nature We also believe that readers will gain unique pedagogical insights into the field and ample food for thought The individuals selected for inclusion in the book dedicated a great amount of time thought energy and commitment to creating powerful and pedagogically sound ways to teach about social and or controversial issues Many have done so for well over forty years and have been among the strongest advocates vis vis the place social issues have in the extant curriculum and beyond      **Going Back for Our Future** Jon Pedersen, Kevin D. Finson, Barbara S. Spector, Paul Jablon, 2013-04-01 This book is the first volume of an attempt to capture and record some of the answers to these questions either from the pioneers themselves or from those persons who worked most closely with them We know there are many pioneers and early trailblazers who are not included in this volume but there are other volumes to follow As we have posed questions rummaged through files and oft neglected books and probed the memories of many individuals we have come to realize our list of true pioneers is ever growing There are names on the list that most of us readily recognize and there are names of whom few of us have heard yet who were significant in their roles as mentors or idea development and teaching We quickly discovered that the family tree showing connections between these people is not a neat clean simple branching tree but is more like spaghetti The connections are many are intertwined and all have their significance The stories in this volume demonstrate how vital this network was in supporting the individual pioneers during their journey in difficult times and continues to be for those of us today in our own enterprise      **Inside Science Education Reform** J. Myron Atkin, Paul Black, 2003-01-01 Two international leaders offer important insights into the ways in which the discipline of science education has developed and how school curriculum has been shaped by both scientific discovery and social change J Myron Atkin U S and Paul Black U K share their vast and varied experiences in this historical account that chronicles the many developments in the field from the end of World War II to the present The chapters in this volume cover the aims and politics of science education curriculum development subject matter boundaries pedagogy and learning assessment and evaluation educational research and practice

and the teaching profession Each theme is introduced in its historical and philosophical context with current issues emphasized The authors then analyze these themes by drawing on relevant episodes from their transatlantic careers These episodes act as a springboard for developing insights into each theme including comparisons between educational practices in the United States and the United Kingdom Featuring compelling examples and a cohesive presentation this groundbreaking volume is essential reading for anyone making decisions about the future of science education ENC

Focus ,2000 **Emerging Research in Agricultural Teacher Education** Barrick, R. Kirby,Thoron, Andrew C.,2024-05-06 Struggling to navigate the complex landscape of agricultural teacher education scholars face a daunting challenge the need for a comprehensive research synthesis tailored to their specific needs While valuable existing resources often need to provide the focused guidance required to address this discipline s myriad issues This gap leaves scholars needing a clear roadmap for advancing agricultural teacher education hindering progress and innovation in the field Emerging Research in Agricultural Teacher Education revolutionizes the field of education through agricultural research Offering a comprehensive synthesis of current research and proposing crucial areas for future investigation this book serves as the definitive solution to the challenges plaguing scholars in the field Consolidating decades of research and expertise into a single accessible volume it provides scholars with the tools they need to navigate the complexities of agricultural teacher education with confidence and clarity **Curriculum, Schooling and Applied Research** Jennifer Donovan,Karen Trimmer,Nicholas

Flegg,2020-10-15 This book explores how teachers can navigate the complex process of managing change within the classroom The chapters highlight the new challenges that have arisen with the emergence and introduction of educational technology as teachers find themselves having to be responsive to the needs and demands of multiple stakeholders Traversing a range of conceptual disciplinary and methodological boundaries the editors and contributors investigate the tensions that impinge on research based change and how to integrate directed changes into their education system and classroom Subsequently this volume argues that posing these questions leads to increased understanding of the possible long term effects of educational change and how teachers can know whether their solutions are effective Making it comparable David Waddington,Peter Nentwig,Sascha Schanze,2007 One of the most significant developments in school education in recent years has been the development and introduction of standards a subject of considerable controversy This book is the result of a symposium held in Kiel a symposium that was arranged by two leading science education groups one at IPN Leibniz Institute for Science Education at the University of Kiel in Germany and the other at the University of York UK The seminar brought together experts from 15 countries These countries include those that have extensive experience with the effects of standards on the educational system on individual schools and teachers and on students Other reports concern countries which are introducing them shortly and yet others on countries that are in the early stages of development of standards 11 are from Europe and the others are from Australia Israel Taiwan and the U S The book is divided into three

parts In Part A two of the organizers set the scene describing the reasons for arranging the symposium and outlining the preparations and the work done at the meeting Part B contains 17 reports from the 15 countries and in Part C there are two summaries analysing the conclusions taken from two different vantage points The controversies surrounding standards remain However this book gives a succinct and authoritative overall account of the advantages and disadvantages of their introduction taken from the experiences of many countries

*Connecting Physics Education Research and Practice* Italo Testa, Marisa Michelini, Salvatore Esposito, 2025-08-15 This book presents a selection of the most recent research results from the Italian physics education research community aimed at enhancing the teaching and learning of physics The motivation for this publication arises from the lack of a comprehensive reference for teachers on research results in physics education Despite various physics curriculum reform initiatives such as the introduction of modern physics into high school curricula their effectiveness in improving the quality of physics teaching in schools has been limited The book offers a contextualized view of the main topics in physics education along with a comprehensive overview of the current challenges faced by physics education in Italy and abroad It also presents research findings that could potentially enhance students learning of physics Throughout the book the implications of these studies are outlined acknowledging issues and knowledge gaps that will guide future research in physics education Specifically rather than covering all the contents addressed in the physics curriculum the book presents research contributions that suggest potentially effective strategies methods and practices at different school levels from primary school to secondary school and university level Regarding physics content the book presents teaching proposals highlighting conceptual aspects and exemplary methodologies of interpretation in physics such as the physics of fluids and quantum mechanics It also includes research contributions on different methods and proposals for implementing practical activities reflecting on the role of the laboratory in learning the discipline and providing examples of integrating experimental and cognitive skills The book also addresses the role of affective variables such as physics identity self efficacy and attitudes toward physics in the learning process Additionally studies on teachers professional development are presented which can inform the design of proposals for educational paths and methods within a framework of close collaboration between schools and physics departments

**Improving Instruction in Geometry and Measurement** Margaret Schwan Smith, Edward A. Silver, Mary Kay Stein, 2005-01-01 Helping students develop an understanding of important mathematical ideas is a persistent challenge for teachers In this book one of a three volume set well known mathematics educators Margaret Smith Edward A Silver and Mary Kay Stein provide teachers of mathematics the support they need to improve their instruction They focus on ways to engage upper elementary middle school and high school students in thinking reasoning and problem solving to build their mathematics understanding and proficiency The content focus of Volume One is rational numbers and proportionality Using materials that were developed under the NSF funded COMET Cases of Mathematics to Enhance Teaching program each volume in the set features cases from urban middle school

classrooms with ethnically racially and linguistically diverse student populations Each case illustrates an instructional episode in the classroom of a teacher who is implementing standards based instruction the teachers perspective including their thoughts and actions as they interact with students and with key aspects of mathematical content cognitively challenging mathematics activities that are built around samples of authentic classroom practice and facilitation chapters to help professional developers teach the cases including specific guidelines for facilitating discussions and suggestions for connecting the ideas presented in the cases to a teacher s own practice As a complete set this resource provides a basis on which to build a comprehensive professional development program to improve mathematics instruction and student learning

*Connecting Girls and Science* Elaine V. Howes,2002 Shows the positive results that can occur in secondary science classes when student s curiosity about science is brought to the centre of the curriculum In particular it demonstrates how girls can become more interested when such topics as childbirth and sexism in science are included *Science Teaching/science Learning* Elnora S. Harcombe,2001-01-01 Science Teaching Science Learning based on a model professional development program gives powerful proof that urban teachers can ignite curiosity and promote deep understanding in children when provided with the necessary intellectual infrastructure including a complex balance of increased science knowledge a safe environment for professional experimentation and a long term interaction with colleagues The ensuing invigoration and renewed dedication of program participants belies the inevitability of the projected national science teacher shortage Harcombe breaks new ground demonstrating that when professional teacher development is based on constructivist learning theory and framed in the knowledge domain of the sciences it empowers teachers to dramatically change what they know how they teach and what their students learn *The Reality of Change* ,2000
