**International Economic Law in the 21st Century** Ernst-Ulrich Petersmann, 2012-07-24 The state centred Westphalian model of international law has failed to protect human rights and other international public goods effectively Most international trade financial and environmental agreements do not even refer to human rights consumer welfare democratic citizen participation and transnational rule of law for the benefit of citizens This book argues that these multilevel governance failures are largely due to inadequate regulation of the collective action problems in the supply of international public goods such as inadequate legal judicial and democratic accountability of governments vis a vis citizens Rather than treating citizens as mere objects of intergovernmental economic and environmental regulation and leaving multilevel governance of international public goods to discretionary foreign policy human rights and constitutional democracy call for civilizing and constitutionalizing international economic and environmental cooperation by stronger legal and judicial protection of citizens and their constitutional rights in international economic law Moreover intergovernmental regulation of transnational cooperation among citizens must be justified by principles of justice and multilevel constitutional restraints protecting rights of citizens and their public reason The reality of constitutional pluralism requires respecting legitimately diverse conceptions of human rights and democratic constitutionalism The obvious failures in the governance of interrelated trading financial and environmental systems must be restrained by cosmopolitan constitutional conceptions of international law protecting the transnational rule of law and participatory democracy for the benefit of citizens

converge in their search for a constitutional architecture which limits empowers and legitimises multilevel trade governance as well as in their common premise that respect for human rights private and democratic self government and social justice require more transparent participatory and deliberative forms of transnational cosmopolitan democracy *Reshaping the World Trading System* John Croome,1996-06 Tracing the history and evolution of the Uruguay Round this book seeks to explain how it came about why it covered the subjects it did what the participants sought the twists turns setbacks successes in each sector of the negotiations
