Reframing Business When The Map Changes The Landscape:

Reframing Business Richard Normann, 2001-07-10 In 1983 Richard Normann published the world's first book presenting an integrated framework on the management of service producing companies. Now he provides a new approach to strategy, an original way to think about organisations and create a different future. In this demanding but rewarding book he shows that providing organisations are prepared to rethink the way they do business, they can occupy the competitive high ground of the future. To do this, they must transform concepts and frameworks into action. Provides new business models. Shows companies how to reframe their business and take advantage of the opportunities created in the space of unbundling and rebundling.

Reframing Business Richard Normann, 2001 [Business Transformation for a Sustainable Future](#)
Samuel Sebhatu, Bo Enquist, Bo Edvardsson, 2021-09-05 Interconnecting the concepts of sustainability innovation and transformation, this book explains how organizations have successfully transformed themselves and wider society to foster a more sustainable future and identifies the difficulties and challenges along the way. Part of the Principle of Responsible Management Education (PRME) series, the book promotes a strong voice for meeting sustainability challenges for transformative change in a globalized world through business education and practice. A transition to a more sustainable way of doing business can only be attained by combining technology with profound system innovations and lifestyle changes. The chapters in the book, each written by a strong and well-recognized team of researchers in the field, open up the discussion about a new partnership between sustainability innovation and transformation that includes the global society, big world, the biosphere, small planet, and also requires a deep mind shift. The book presents cases from business including Ikea and Eataly and other service networks including the Base of the Pyramid (BoP) and illustrates how these organizations have transformed themselves for a sustainable future. The research perspectives are macro policies and legislation, meso institutional practices and micro business practices and individual behavior. This book is where research meets real world business and societal practice. The chapters are grounded in business research, specifically the interdependencies between sustainability innovation and transformation, which makes for a robust basis for describing, explaining, and understanding the complex challenges faced by business and society in the 21st century. The book is intended for graduate and postgraduate level students and executive education with implications for practitioners. Furthermore, it contributes to multidisciplinary research in the field of interaction between business and society with a view to extending the firm-centric view to encompass a broader systemic and dynamic understanding of business and societal transformation.

Service-Dominant Business Design Egon Lüftenegger, This dissertation presents a tool-supported process for designing work by following a Service-Dominant Logic. The tools supported by the design process are the following: The Service-Dominant Strategy Canvas, The Service-Dominant Business Model Radar, the Business Service Composition Blueprint, and the Business Services Catalogue.
