Black Sea Region Russell King, Maja Povrzanović Frykman, Julie Vullnetari, 2018-04-19 The Southeast Europe and Black Sea region presents fertile terrain for examining recent international migration trends. The contributions to this book cover a range of examples from Ukraine and Moldova in the north to Greece and Albania in the south. By intersecting the three key concepts of migration, transnationalism and development, they offer new insights based on original empirical research. A wide range of types of migration can be observed in this region: large scale emigration in many countries; recent mass immigration in the case of Greece; return migration; internal migration; internal and external forced migration; irregular migration; brain drain etc. These migratory phenomena occur within the context of EU migration policies and EU accession for some countries. Yet within this shifting migration landscape of migrant stocks and flows, the fundamental economic geography of different wealth levels and work opportunities is what drives most migration now as in the past. This book was previously published as a special issue of *Southeast European and Black Sea Studies*. *New Directions in Race, Ethnicity and Crime* Coretta Phillips, Colin Webster, 2013-10-08 The disproportionate criminalisation and incarceration of particular minority ethnic groups has long been observed, though much of the work in criminology has been dominated by a somewhat narrow debate. This debate has concerned itself with explaining this disproportionality in terms of structural inequalities and socio-economic disadvantage or discriminatory criminal justice processing. This book offers an accessible and innovative approach, including chapters on anti-Semitism, social cohesion in London, Bradford and Glasgow, as well as an exploration of policing Traveller communities. Incorporating current empirical research and new departures in methodology and theory, this book also draws on a range of contemporary issues such as policing terrorism, immigration detention and youth gangs. In offering minority perspectives on race, crime and justice, and white inmate perspectives from the multicultural prison, the book emphasises contrasting and distinctive influences on constructing ethnic identities. It will be of interest to students studying courses in ethnicity, crime and justice.

Refugees, Capitalism and the British State Tom Vickers, 2016-04-08 Today, in a period of economic crisis, public sector cuts and escalating class struggle, Marxism offers important tools for social workers and service users to understand the structures of oppression they face and devise effective means of resistance. This book uses Marxism's lost insights and reinterprets them in the current context by focussing on one particular section of the international working class: refugees and asylum seekers in Britain. Vickers' analysis demonstrates the general utility of a Marxist approach, enabling an exploration of the interplay between state policies, how these are experienced by their subjects, and how conflicts are mediated. The substantive focus of the book is twofold: to analyse the material basis of the oppression of refugees in Britain by the British state, and to examine the means by which the British state has managed this oppression through the cultivation of a refugee relations industry within a broader narrative of social capital building. These questions demand answers if social workers and other practitioners are to successfully work with refugees and asylum seekers, and this book provides these through a detailed Marxist analysis.
