Historical Bibliography as an Essential Source for Historiography Bernadette Cunningham,Václava

Horčáková,Kristina Rexová,2015-10-05 This volume brings together papers presented at the Fifth International Conference of the European Historical Bibliographies Project held in Prague on November 7 8 2013 under the auspices of the Department of Historical Bibliography of the Institute of History of the Academy of Science of the Czech Republic The conference attracted bibliographers historians and librarians from Denmark France Ireland Lithuania Germany Switzerland and from a number of Czech institutions and libraries who gathered to discuss a wide range of topics The main theme of the conference was the significance of historical bibliography for historical science Given the diversity of professional focus among the conference participants this topic was approached and examined from a variety of viewpoints The most important outcomes of these meetings were firstly explaining the way individual participating organisations dealt with historical bibliography and secondly providing a comparison of different methodological and technological approaches for processing specialized bibliographies in various European countries This book introduces the wider public to the current shape and prospects of historical bibliography projects across a range of European countries Obviously such projects must reflect the needs of their users which mainly comprise historians and librarians The ongoing development of historical bibliography does not only involve a technical challenge but also a methodological one as well as a societal one when interpreted in a broader context Mutual communication helps form the future direction of historical bibliography which will undoubtedly face many new tasks and challenges

Two Roads to War Robin Higham,2012-06-15 Noted aviation historian Robin Higham has written this comparative study of the evolution of the French and British air arms from 1918 to 1940 to determine why the Arm e de l Air was defeated in June 1940 but the Royal Air Force was able to win the battle over Britain in September After analyzing the structure men and mat riel of the air arms and the government and economic infrastructure of both countries he concludes that the French force was dominated by the Arm e de Terre had no suitably powerful aero engines and suffered from the chaos of French politics In contrast the independent RAF evolved into a sophisticated scientifically based force supported by consistent government practices Higham s thorough examination however finds the British not without error

The Great Powers and Poland Jan Karski,2014-01-16 This definitive study provides a comprehensive diplomatic history of Poland during the most seminal period in its existence when its destiny lay in the hands of France Great Britain and the United States Although sovereign in principle Poland was little more than an object of the Great Powers politics and rapidly changing relationships from the end of WWI to the end of WWII Focusing on the shifting policies of the Great Powers toward Poland from the Treaty of Versailles to Yalta the book ends with Poland s tragic abandonment by the West into the hands of the Soviet Union Enriched by unique anecdotal and archival material this book will be essential reading for all those seeking to understand Poland s role in twentieth century history

Revolution and Civil War 1917-1921 Jonathan Smele, 2006-04-15 The Russian Revolution and Civil War in the years 1917 to 1921 is one of the most widely studied periods in history. It is also somewhat inevitably one that has generated a huge flow of literature in the decades that have passed since the events themselves. However, until now, historians of the revolution have had no dedicated bibliography of the period and little claim to bibliographical control over the literature. The Russian Revolution and Civil War 1917-1921 offers for the first time a comprehensive bibliographical guide to this crucial and fascinating period of history. The Bibliography focuses on the key years of 1917 to 1921, starting with the February Revolution of 1917 and concluding with the 10th Party Congress of March 1921, and covers all the key events of the intervening years. As such, it identifies these crucial years as something more than simply the creation of a communist state.

European Armies and the Conduct of War Hew Strachan, 2005-07-28 Through the eyes of the major theorists of the day and discussing the key issues of modern warfare, Hew Strachan's work examines the theory and practice of land warfare in Europe since 1700.

War and Displacement in the Twentieth Century Sandra Barkhof, Angela K. Smith, 2014-03-14 Human displacement has always been a consequence of war, written into the myths and histories of centuries of warfare. However, the global conflicts of the twentieth century brought displacement to civilizations on an unprecedented scale, as the two World Wars shifted participants around the globe. Although driven by political disputes between European powers, the consequences of Empire ensured that Europe could not contain them. Soldiers traversed continents and civilians often followed them or found themselves living in territories ruled by unexpected invaders. Both wars saw fighting in Europe, Africa, the Middle East, and the Far East, and few nations remained neutral. Both wars saw the mass upheaval of civilian populations as a consequence of the fighting. Displacements were geographical, cultural, and psychological; they were based on nationality, sex, gender, or age. They produced an astonishing range of human experience, recorded by the participants in different ways. This book brings together a collection of interdisciplinary works by scholars who are currently producing some of the most innovative and influential work on the subject of displacement in war, in order to share their knowledge and interpretations of historical and literary sources. The collection unites historians and literary scholars in addressing the issues of war and displacement from multiple angles. Contributors draw on a wealth of primary source materials and resources, including archives from across the world, military records, medical records, films, memoirs, diaries, and letters, both published and private, and fictional interpretations of experience.
