rhino and Javan rhino critically so Although the Indian rhino is to be found in greater numbers than the other two the threats to this species nevertheless remain significant As in the case of the African rhinos the threats to the Asian rhinos stem from poaching for the horn the primary demand for which is in traditional Chinese medicine but which is also a speculator s commodity in several consumer nations However a further threat to these animals is also posed by the destruction of their habitat Indeed two of these species inhabit the tropical rainforest which is being destroyed This action plan describes the major requirements for rhino conservation and describes some of the programmes which can and are being implemented to stem the threats to these species such as managed breeding and the in situ conservation of their habitats
