Marsden, Deborah J. Pain**

Richard Meinertzhagen Soldier Scientist Spy:

Richard Meinertzhagen Mark Cocker, 1989 The Meinertzhagen Mystery Brian Garfield, 2007 Tall handsome charming Col Richard Meinertzhagen 1878 1967 was an acclaimed British war hero a secret agent and a dean of international ornithology His exploits inspired three biographies movies have been based on his life and a square in Jerusalem is dedicated to his memory Meinertzhagen was trusted by Winston Churchill David Lloyd George Chaim Weizmann David Ben Gurion T E Lawrence Elspeth Huxley and a great many others He bamboozled them all Meinertzhagen was a fraud Many of the adventures recorded in his celebrated diaries were imaginary including a meeting with Hitler while he had a loaded pistol in his pocket an attempt to rescue the Russian royal family in 1918 and a shoot out with Arabs in Haifa when he was seventy years old True he was a key player in Middle Eastern events after World War I and during the 1930s he represented Zionism's interests in negotiations with Germany But he also set up Nazi front organizations in England committed a half century of major and costly scientific fraud and oddly may have been innocent of many killings to which he confessed e g the murder of his own polo groom a crime of which he cheerfully boasted although the evidence suggests it never occurred at all Further he may have been guilty of at least one homicide of which he professed innocence A compelling read about a flamboyant rogue The Meinertzhagen Mystery shows how recorded history reflects not what happened but what we believe happened

Peculiar Liaisons John S. Craig, 2005 Presenting famous and infamous individuals and events that shocked the world and helped set the scene for today's history this book illustrates how little is really known about some of the most dramatic and most studied events Who motivated whom how and why and what counterplots and alternative scenarios may have been at play Terrorism the fomenting of revolution undermining from within and trumped up events to spur a nation to go to war these techniques are not new The public's interest in certain personalities never seems to wane Mata Hari Gavrilo Princip Sidney Reilly T E Lawrence Jimmy Doolittle Hitler Reinhard Heydrich and Lee Harvey Oswald among others Each chapter presents two or three characters and elaborates on their lives and how they relate to historical events in the 20th century The book starts with an incident in 1903 in the Balkans and moves chronologically forward to the assassination of JFK

British Military Intelligence in the Palestine Campaign, 1914-1918 Yigal Sheffy, 2014-02-04 Shortly after the end of the First World War General Sir George Macdonagh wartime director of British Military Intelligence revealed that Lord Allenby's victory in Palestine had never been in doubt because of the success of his intelligence service Seventy five years later this book explains Macdonagh's statement Sheffy also adopts a novel approach to traditional heroes of the campaign such as T E Lawrence Biologists in the Age of Totalitarianism Eugeniusz Nowak, 2018-07-26 This fascinating volume resulted from one man's frustration with the series of whitewashed obituaries and laudations he had to endure in his long career in West Germany These were often of biologists who had worked in the Third Reich a period generally skipped over in such eulogies Dr Eugeniusz Nowak born in Poland in 1933 therefore decided to do some historical research of his own His series of

controversial alternative biographies of mainly German biologists in various journals soon grew into a successful book with German Russian and Polish editions Now at last translated into English this revised and updated volume contains over 40 brief lives illustrated by 113 often dramatic photographs It uses material gathered from dozens of Central European archives only accessible since the collapse of the Eastern Bloc What makes this book so gripping is its personal element Dr Nowak with his contacts on both sides of the Iron Curtain either knew these scientists personally or interviewed family members and colleagues We see here how these victims and perpetrators were caught in the ideological nets of Nazism Stalinism or Maoism and how their lives were changed utterly by political forces beyond their control As such this book represents essential reading for those interested in the personal stories at the interface of totalitarian politics and biological science

Raptors of the World: A Field Guide James Ferguson-Lees, David A. Christie, 2020-09-17 Raptors of the World is the definitive handbook to this most popular group of birds This new field guide uses all of the illustration plates from Raptors of the World with a concise revised text on facing pages to create a conveniently sized lightweight field reference covering all 340 raptor species Several of the plates have been reworked and repainted for this guide The book also has an updated colour distribution map for each species Much of the extensive introductory material has been retained in this guide with the addition of a complete species list containing all subspecies and brief details of their ranges Armed with this guide birders will be able to identify with confidence any raptor encountered anywhere in the world *British Generalship on the Western Front 1914-1918* Simon Robbins, 2004-12-21 This book explores the British Army's response on the Western Front to a period of seminal change in warfare In particular it examines the impact of the pre war emphasis on worldwide garrison occupation and policing duties for the Empire's defence of the mindset of the Army's leadership and its lack of preparation for a continental war involving a massive unplanned increase in men and material The reasons for the poor performance in the early years of the war notably professionalism within the British Army including poor staff work trade unionism careerism within the high command and the tendency of an overconfident hierarchy to ignore the need for reform to tackle the tactical stalemate prior to 1916 are analysed The high command rapidly learnt from the defeats of 1915-16 and performed much better in 1916-18 an especially formative period resulting in the promotion of a younger more professional leadership and the development of the first truly modern system of tactics which has dominated wars ever since During 1917-18 the Army's commanders and staff evolved and improved these new methods developing a doctrine of combined arms to overcome the tactical stalemate bedevilling Allied offensives **Facing Extinction** Paul Donald, Nigel Collar, Stuart Marsden, Deborah J. Pain, 2013-12-19 Examines extinction in birds with case studies of critically endangered species and the research initiatives designed to save them *Militarism, Hunting, Imperialism* J.A. Mangan, Callum McKenzie, 2013-10-18 The late Victorian and Edwardian officer class viewed hunting and big game hunting in particular as a sound preparation for imperial warfare For the imperial officer in the making the bloody hunting ritual was a visible hallmark of stirring martial masculinity Sir Henry

Newbolt the period poet of subaltern self sacrifice typically considered hunting as essential for the creation of a masculine sporting spirit necessary for the consolidation and extension of the empire Hunting was seen as a manifestation of Darwinian masculinity that maintained a pre ordained hierarchical order of superordinate and subordinate breeds Militarism Hunting Imperialism examines these ideas under the following five sections martial imperialism the self sacrificial subaltern blooding the middle class martial male the imperial officer hunting and war martial masculinity proclaimed and consolidated martial masculinity adapted and adjusted This book was published as a special issue of the International Journal of the History of Sport Why Spy? Brian Stewart,Samantha Newbery,2015 With practical experience both of field work and of the intelligence bureaucracy at home and abroad Stewart examines successes and failures via case studies considers the limitations and usefulness of the intelligence product and warns against the tendency to abuse or ignore it when its conclusions do not fit with preconceived ideas
