Ride The Big Red Cars:

Ride the Big Red Cars Spencer Crump, 1965 For other editions see Author Catalog Ride the Big Red Cars Spencer Crump, 1970 Water and Power William L. Kahrl, 1983-11-08 It is not the purpose of this work to propose a specific format for the settlement of the city's current difficulties with the valley to resolve the environmental questions associated with Los Angeles's proposed groundwater pumping program or to promote any cause associated with the developing situation in the Owens Valley. But by performing the essential historical task of separating what happened from what did not and by distinguishing in this way the choices which have been made from those which have yet to be decided it is my hope that this effort will help to establish that common basis for understanding which is essential for the debate over specific issues to proceed most effectively. This book then is scarcely the last word on the Owens Valley conflict; the final chapter after all has yet to be written. The story that has emerged here is at once very different and more troubling than the conventional treatments of the conflict as a simplistic political morality play. Any attempt to deal with so controversial a subject however is almost certain to spark controversy itself. For that reason with the exception of a small collection of private letters this work is constructed entirely from the published documents and other materials available to the general public, anchoring the narrative in sources the reader can consult to trace the line of my argument on any point with which he or she may disagree. In addition the work as a whole has been reviewed for technical accuracy by officials of the Los Angeles Department of Water and Power although the department is in no way responsible for the content of this study or the conclusions drawn from it.

Inventing Autopia Jeremiah B.C. Axelrod, 2009-06-02 Flat out one of the most interesting books I've read in years. To say that a book about California might rank with Kevin Starr's *Americans and the California Dream* or Mike Davis' *City of Quartz* is dangerously high praise but I think Axelrod's book may someday be in that league. John Ganim, University of California Riverside. *Inventing Autopia* thoughtfully weaves together planning and policy history with cultural history to great effect. It is sure to change our understanding of the ways in which Los Angeles not only grew and developed but envisioned itself in the era. William Deverell, author of *Whitewashed Adobe: The Rise of Los Angeles and the Remaking of Its Mexican Past*. *The New Suburbia* Becky M. Nicolaides, 2024 *The New Suburbia* explores how the suburbs transformed from bastions of the white middle class in the postwar years into diverse communities after 1970. In the new suburbia white advantage persisted but it existed alongside rising inequality, ethnic and racial diversity and new household configurations. It focuses on Los Angeles at the vanguard of these trends. East Los Angeles Richardo Romo, 2010-07-05 This is the story of the largest Mexican American community in the United States, the city within a city known as East Los Angeles. How did this barrio of over one million men and women occupying an area greater than Manhattan or Washington D.C. come to be? Although promoted early in this century as a workers' paradise, Los Angeles fared poorly in attracting European immigrants and American blue collar workers. Wages were low and these workers were understandably reluctant to come to a city which was

also troubled by labor strife Mexicans made up the difference arriving in the city in massive numbers Who these Mexicans were and the conditions that caused them to leave their own country are revealed in *East Los Angeles* The author examines how they adjusted to life in one of the fastest growing cities in the United States how they fared in this country's labor market and the problems of segregation and prejudice they confronted Ricardo Romo is associate professor of history at the University of Texas at Austin
