**The Origins of World War Two** Robert Boyce, Joseph A. Maiolo, 2017-03-14 No issue in modern history has been more intensively studied or subject to wider interpretation than the origins of the Second World War A conflict involving three arguably four major aggressor Powers operating simultaneously but largely separately on two continents inevitably raises complex theories and debates Each participating power has its own history and each one must take account of various influences upon the behaviour of its soldiers and statesmen His wide ranging collection of original essays each by an international expert in their field covers all aspects of the subject and highlights the controversy that continues to characterise current thinking on the origins of the war Going beyond the usual Eurocentric approach Part I examines the roles of all seven of the Great Powers including Japan and the USA as well as the parts played by several of the lesser Powers such as Czechoslovakia Poland and China Part II contains chapters which explore key themes that cannot be fully understood within the context of any single country These themes include the role of ideology propaganda intelligence armaments economics diplomacy the neutral states peace movements and the social science approach to war Written in clear jargon free prose together these essays provide a comprehensive single volume text for students and teachers and are essential reading for all with an interest in the debates surrounding the causes of World War Two *Caught in the Middle* Johan den

Hertog, Samuël Kruizinga, 2011 The essays in this collection cover not only multiple countries but also multiple aspects of the concept of neutrality political economic cultural and legal These case studies have led to a re evaluation of the notion of neutrality and the role of neutrals during the First World War making this collection of great value to all scholars of neutrality the history of individual neutral countries and of the war itself **Justice among Nations** Stephen C. Neff, 2014-02-18 Justice among Nations tells the story of the rise of international law and how it has been formulated debated contested and put into practice from ancient times to the present Stephen Neff avoids technical jargon as he surveys doctrines from natural law to feminism and practice from the Warring States of China to the international criminal courts of today Ancient China produced the first rudimentary set of doctrines But the cornerstone of international law was laid by the Romans in the form of universal natural law However as medieval European states encountered non Christian peoples from East Asia to the New World new legal quandaries arose and by the seventeenth century the first modern theories of international law were devised New challenges in the nineteenth century encompassed nationalism free trade imperialism international organizations and arbitration Innovative doctrines included liberalism the nationality school and solidarism The

twentieth century witnessed the League of Nations and a World Court but also the rise of socialist and fascist states and the advent of the Cold War Yet the collapse of the Soviet Union brought little respite As Neff makes clear further threats to the rule of law today come from environmental pressures genocide and terrorism      *Neutral Europe and the Creation of the Nonproliferation Regime* Pascal Lottaz,Yoko Iwama,2023-11-03 Lottaz Iwama and their contributors investigate the role of neutral and nonaligned European states during the negotiations for the Treaty on the Nonproliferation of Nuclear Weapons NPT Focusing on the years from the Irish Resolution of 1958 until the treaty s opening for signatures ten years later the nine chapters written by area experts highlight the processes and reasons for the political and diplomatic actions the neutrals took and how those impacted the multilateral treaty negotiations The book reveals new aspects of the dynamics that lead to this most consequential multilateral breakthrough of the Cold War In part one three chapters analyze the international system from a bird s eye perspective discussing neutrality nonalignment and the nuclear order The second part features six detailed case studies on the politics and diplomacy of Ireland Sweden Finland Switzerland Austria and Yugoslavia Overall this study suggests that despite the volatile and dangerous nature of the early Cold War the balance of the strategic environment enabled actors that were not part of one or the other alliance system to play a role in the interlocking global politics that finally created the nuclear regime that defines international relations until today A valuable resource for scholars of nonproliferation the Cold War neutrality nonalignment and area studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
