Rights And Duties Of Riparian States Of International Rivers:

Pollution of international watercourses Johan G. Lammers, 2024-09-02 *Rights and Duties of Riparian States of International Rivers*, 1994

The Law of International Watercourses Stephen C. McCaffrey, 2019 This fully updated new edition of *The Law of International Watercourses* examines the rules of international law governing the use of international rivers lakes and groundwater shared by two or more countries

The Legal Regime of International Rivers and Lakes/ Le régime juridique des fleuves et des lacs internationaux Lucius Caflisch, Ralph Zacklin, 2024-11-04

The Transit Regime for Landlocked States Kishor Uprety, 2006-01-01 The Transit Regime for Landlocked States assesses the strengths and limits of existing international law related to the free access of landlocked states to and from the sea The book analyzes whether the provisions of international law satisfy the economic demands of landlocked states the majority of which are among the world's poorest nations The book reviews the several principles of international law that dominated the evolution of the rights of access It discusses both general and specific conventions as well as treaty regimes emanating therefrom and examines some restrict

Peaceful Uses of International Rivers: The Euphrates and Tigris Rivers Dispute Hilal Elver, 2021-10-25 This book by a renowned environmental lawyer and scholar proposes a regime scheme that is not only based soundly on existing treaties concerning access rights to fresh water but also on the human rights of persons dependent on rivers and lakes for water and food Focusing on the Tigris Euphrates basin which is shared by Iraq Syria and Turkey Professor Elver explores the transnational arrangements among these three countries for the allocation of river resources The author clearly exposes the potential for conflict and sets forth the role that international law can play in resolving such conflict and protecting the human rights of local populations Published under the Transnational Publishers imprint

The United Nations Convention on the Law of International Watercourses Attila Tanzi, Maurizio Arcari, 2021-11-29 Problems relating to the non navigational uses of international watercourses have the capacity to be among the most serious causes of international conflicts in the new century The Convention adopted by the UN General Assembly on 21 May 1997 is the first comprehensive attempt to provide at the universal level a coherent set of rules for the avoidance management and settlement of such conflicts This book gives a brief history of the codification process leading to the adoption of the Convention and considers the conflicting approaches to the subject that have been taken over the years It examines the Convention as future treaty law and considers its impact on customary law putting it in the context of existing relevant international instruments It analyses the substantive principles of equitable utilisation and of no harm on the one hand and the procedural obligations on the other and emphasises their mutual complementarity The specific rules on the environmental protection of watercourses are given separate consideration underlining the indivisibility of water quality and water quantity issues while the dispute settlement provisions set out in the Convention are studied with special emphasis on negotiated settlement as their ultimate aim This book will be a compulsory tool for law makers negotiators of future watercourse agreements and water law

practitioners as well as a required reading for students of the international law of shared natural resources **The Rights and Duties of Transport Undertakings** Herbert Barrs Farthing Davies,1926 **International Law in the Netherlands** Haro Frederik van Panhuys,1978-10-20 International Watercourses Law in the Nile River Basin Tadesse Kassa Woldetsadik,2013-06-26 The Nile River and its basin extend over a distinctive geophysical cord connecting eleven sovereign states from Egypt to Tanzania which are home to an estimated population of 422 2 million people The Nile is an essential source of water for domestic industrial and agricultural uses throughout the basin yet for more than a century it has been at the centre of continuous and conflicting claims and counter claims to rights of utilization of the resource In this book the author examines the multifaceted legal regulation of the Nile He re constructs the legal and historical origin and functioning of the British Nile policies in Ethiopia by examining the composition of the Anglo Ethiopian Treaty of 1902 and analyses its ramifications on contemporary riparian discourse involving Ethiopia and Sudan The book also reflects on two fairly established legal idioms the natural and historical rights expressions which constitute central pillars of the claims of downstream rights in the Nile basin the origin essence and legal authority of the notions has been assessed on the basis of the normative dictates of contemporary international watercourses law Likewise the book examines the non treaty based claims of rights of the basin states to the Nile waters setting out what the equitable uses principle entails as a means of reconciling competing riparian interests and most importantly how its functioning affects contemporary legal settings The author then presents the concentrated diplomatic movements of the basin states in negotiations on the Transitional Institutional Mechanism of the Nile Basin Initiative NBI pursued since the 1990 s and explains why the substance of water use rights still continued to be perceived diversely among basin states Finally the specific legal impediments that held back progress in negotiations on the Nile Basin Cooperative Framework are presented in context **International Watercourses Law and Multilateral Environmental Agreements** Yang Liu,2024-02-06 This book anchors its arguments in Article 20 of the Watercourses Convention and explores consistencies and inconsistencies in parallel definitions substantive and procedural obligations and institutional arrangements in IWL and the Ramsar and Biodiversity Conventions with respect to the protection and preservation of ecosystems of shared inland waters Dr Yang Liu argues that the all around informed and integrated application of IWL and MEAs is essential for the effective protection and preservation of shared inland water ecosystems However the degree of cross fertilization of parallel provisions should be examined on a case by case basis in light of the legal analytical framework deployed in this study International Rivers. According to a famous Talmudic story Babylonian Talmud Tractate Shabbat 31a a gentile once approached Rabbi Hillel and asked to be taught the entire Torah while standing on one foot Hillel replied Love your neighbour as yourself That is the entire Torah The rest is simply an explanation Go and learn it In much the same way Jewish law can be described in one word Torah All the rest is simply an explanation The Torah also known as the Bible the five books of Moses and the Pentateuch was written over 3 000 years ago Since then Jewish law has developed various interpretations and applications of the Torah interpretations of those interpretations and so on Jewish law contains civil dictates as well as religious protocol Problems that arose in the framework of religious life and problems surrounding civil relationships both found solutions in the same legal source the Torah and the Halacha the Jewish legal interpretations and rulings This chapter on water law in the Jewish tradition provides insight into Jewish law and custom in general and rules related to the protection of water sources in particular One should not look however to find a written code of Jewish law as there is none

Conflict and Cooperation on South Asia's International Rivers Salman M. A. Salman, Kishor Uprety, 2002 Conflict and Cooperation on South Asia's International Rivers traces the development of international water law This book focuses on the hydro politics of four countries in the South Asia region Bangladesh India Nepal and Pakistan It analyzes the problems that these countries have encountered as riparians of international rivers and how they have addressed these problems In particular this study reviews the treaty regimes governing the Indus River basin the Ganges River basin and the Kosi Gandaki and Mahakali river basins Each of these regimes is described in depth with special attention devoted to the main problems each of these treaties sought to address The authors also review the treaty experience and offer observations on bilateralism and multilateralism

Environmental Protection of International Watercourses under International Law Owen McIntyre, 2016-05-13 McIntyre's work explains the legal means by which requirements of environmental protection influence the determination of a reasonable and equitable regime for allocating rights to riparian states to utilize shared freshwater resources The work examines the means and processes by which environmental considerations can act upon the operation of the principle of equitable utilization The volume provides a comprehensive analysis of the subject outlining the development scope and operation in general and customary international law of key rules of environmental protection
